

Marie Dionne Quits Convent

Family Says Quint Was Homesick

WATERLOO, Que. (AP)—Marie Dionne, the quintuplet who took a nun's first vows two months ago, has left the convent and gone home. A church official said she had departed temporarily for health reasons but her family said she was homesick.

The mother superior at the Quebec convent of the Servants of the Blessed Sacrament, which Marie entered as a postulant last November, said the 20-year-old girl left there Wednesday.

Marie's brother-in-law, Maurice Girouard, said at his home here she arrived at her parents' home in Callander, Ont., early Sunday, accompanied by three brothers and her quintuplet sister Emilie. The latter hit the headlines herself when she became lost in Montreal Friday en route to join Marie.

Commenting on that incident, Girouard said: "Apparently all kinds of rumors started to spread when Emilie approached a policeman in Montreal. The girl simply identified herself and asked for directions. She was visiting friends in Ste. Agathe, Que. and was on her way to St. Charles, Que., to meet Marie."

The brother-in-law said Marie had come to his home from the convent and that Emilie had joined her here Saturday.

Girouard said Marie—smallest of the quintuplets at birth—seemed confused and homesick. He added he did not know whether she planned to go back to the cloister, where she took her two-year vows of poverty, chastity and obedience May 24.

The Montreal Gazette quoted the quintuplets' father Oliva as saying Marie had written him last week complaining of homesickness.

"I suspected from her unhappy letter that she was trying to decide whether to remain in the cloisters or come back," the Gazette quoted him. "I know she has been terribly lonely, but she can always go back. It has been tough on her being separated from her four sisters with whom she had lived since they were babies."

The Dionne home in Callander could not be reached by telephone Sunday night.

When she took her vows last May, her father said Marie appeared genuinely happy in the convent.

The order requires candidates for nunhood to serve two years as novices.

Life at the convent was described as "not difficult or hard," but it was along austere lines. With other white-garbed nuns, Marie spent her days in prayer and silent work on priests' vestments, altar clothes and similar duties.

'WELL, HOW ABOUT IT?'—Little Jan (Squeaky) Zeboski, 14-months, impatiently drums his fingers and casts an anticipatory look toward his upcoming dinner. Jan's daddy, Walter, who lives in Burlingame, Calif., is an Associated Press Wirephoto operator and his hobby is photographing his pride-and-joy.

Permission to Delay Integration Seen

JACKSON, Miss. (AP)—Sen. James O. Eastland (D-Miss.) predicts the U. S. Supreme Court will permit the South "three or four years" in which to integrate white and Negro public school students.

Eastland made the prediction on a television forum here Sunday as part of his campaign for reelection. He returned to Washington Sunday night.

He said he believes the court, in its final decree in the five public school segregation cases involving 17 states, will order a

gradual integration, beginning gradually with single grades.

Eastland, opposed for the Democratic nomination by Lt. Gov. Carroll Gartin, said the court's decision outlawing segregation last May 17 was "foolish," and he called for a constitutional amendment to void it.

He outlined his proposal to establish a nationwide organization to promote an amendment to permit individual states to govern their own schools. He said he would attempt to pledge support of Democratic and Republican candidates, in both the North and in the South.

Eastland said his move was designed to counter the organized efforts of the CIO, the National Association for the Advancement of Colored People and others to break down racial barriers.

Marriage Links TV, Radio Singers

PASADENA, Calif. (AP)—TV songstress Joan O'Brien and radio singer William Strange, who met as singing sweethearts on a radio program two years ago, were married yesterday.

The 18-year-old blonde bride is featured on the Bob Crosby Show. Strange, 23, sings on the Tennessee Ernie Show and Home-town Jamboree.

Stassen Back in U.S.; Intends Public Report

WASHINGTON (AP)—Foreign Operations Administrator Harold Stassen, returned from week-long talks in Europe on the problem of East-West trade, says he hopes to make his recommendations public after conferences today with administration officials.

Stassen, who also appears today before the Senate Appropriations Committee to support fund requests for the new \$3,100,000,000 foreign aid bill, flew back from Europe yesterday.

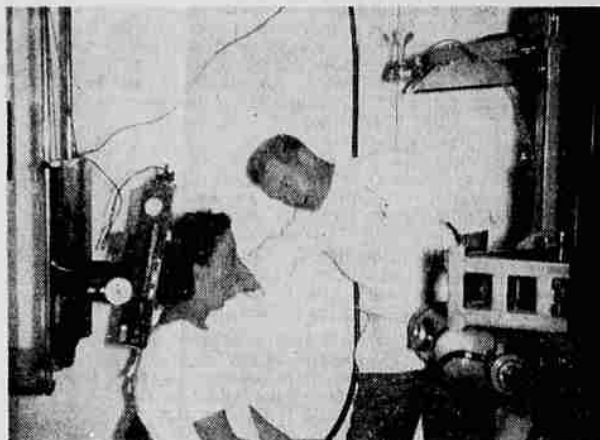

He met with French and British officials to iron out the Western approach to trade with Soviet Russia and its satellites.

DID YOU KNOW THAT . . .

It is a common accepted fact that Chiropractors can be of great help to one who is suffering from backaches and sore muscles. However, the practice of Chiropractic is not limited to these conditions. The Philosophy and Practice of Chiropractic is established on the facts that every condition has a Cause. It is the cause that the Chiropractor corrects in cases of Asthma, Arthritis, Polio, Diabetes, Migraine Headaches, etc. Symptoms are an expression of a condition that is being created by a cause. Correct the cause, and the condition and the symptoms will disappear.

Chiropractic has established that if a vertebra is out of its normal alignment it will create a pressure on a nerve or series of nerves. By interfering with the normal transmission of nerve energy it is impossible for an organ to function as it has been designed to do. Therefore, we find that the interference of nerve energy by a misaligned vertebra creating a pressure on the nerve is the Cause of disease.

These cases you find listed below are actual cases and indicate the wide scope of Chiropractic. They are but a few of the many who have been helped with their health problems by Chiropractic.

Dr. F. C. Warner, Chiropractor, making x-ray examination of a patient. X-rays are taken to locate the misaligned vertebra causing nerve interference which results in functional disorders of the various organs.

POLIO—Girl, age 3. Had been unable to sleep for three weeks, had pain in back of neck area, use of left leg and arm affected. Following the adjustment of the misaligned vertebra the pressure on the nervous system was removed. This child began sleeping and in less than six weeks all symptoms had disappeared. Today she is the picture of health.

LOW BACK PAINS—Woman, age 25. This woman had been unable to pursue her normal work and was constantly in pain and discomfort. X-rays were taken of the spine and upon analysis revealed a misaligned vertebra which was causing a pressure on nerves. Following the correction by adjustment normal feeling was again experienced. Upon discharge she related that no pain is evident and has not existed for some time.

NEURITIS—Male, age 48. The condition had existed for a number of years and was progressively getting worse. The pain was located in both shoulders and any movement was almost impossible. It was necessary to grasp one arm by the other to force movement. X-rays were taken of this case and with the nerve readings acquired with the nerve instrument the definite cause was located. After corrective adjustments were given all normal action returned to the left arm and approximately 90% returned to the right arm. At this time he states that the right arm is continually getting better.

SCIATICA—Male, age 34. This condition had been present for some time and nothing had been able to help. Upon x-ray examination a severe misalignment in the spine was discovered. By checking with the nerve instrument a constant nerve pressure was located. By correcting the cause, vertebral displacement, the nerve supply to the leg was normalized and in a short time normal action of the leg was regained. Today the man is free from pain and is now employed in his normal work.

NERVOUSNESS—Girl, age 7. This girl had a number of problems to contend with. She was constantly making uncontrollable facial movements, agonizing pain in the neck region, and itching of various parts of her body. These conditions had been present for one year. By checking the nervous system with the nerve instrument a definite pressure on nerves was exhibited. X-rays were then taken and revealed a spinal misalignment which was the cause of her problems. Corrective adjustment was made and in less than one month all symptoms disappeared.

Difficult MENSTRUATION—Woman, age 38. This woman came to my office and expressed this report. To her a normal cycle had never been experienced. She would have severe cramps, headaches, nausea. In addition to this problem this woman was troubled with nocturnal enuresis. After checking this woman with the nerve instrument and X-raying her spine a causative condition was found. By removing the cause by adjustments and stimulating normal nerve supply to the various organs all symptoms were removed. Also, she sleeps through every night with no worry concerning her enuresis problem as it has disappeared completely.

A patient is being checked by Dr. Warner with a nerve instrument. This instrument reveals nerve areas throughout the spine where nerve irritation is located. If a nerve interference is registered, it indicates some portion of the body is being deprived of its normal nerve energy.

to Jap Atom Base Planned

RAYO (AP)—Top U.S. Air Force officials said Monday the United States has no present plans to use atomic weapons or hydrogen bombs against Japan or the Philippines as a base for atom or hydrogen bomb-carrying planes.

Japan was eliminated as a possible base of pressure from the United States government, which did want atomic weapons or H-bomb-carrying planes based here, sources said.

However, Air Force bases in Japan might play a role in a "demonstration attack" by American bomb-carrying bombers in case of war. Big tanker planes from Japan or the Philippines might rise to feed an extra load of fuel to bombers from Guam or elsewhere, the sources said.

EE'S watch repairing is guaranteed.

It pays to deal with friends when you remodel!

Don't be high-pressed into remodeling your home! Don't admit to the tactics of unscrupulous, out-of-town operators who promise much—and who deliver little.

You can be sure of sound advice and honest, fair dealing when you bring your remodeling problems to us. We can recommend local contractors who are good workmen. And we handle only quality building materials—well-known brands such as Balsam-Wool® Sealed insulation and Nu-Wood® exterior finish.

Make use of our friendly remodeling service. You'll find it pays YOU.
