SERVICES THURSDAY—Rev. James McAuley, retired Presbyterian minister who died Monday at the age of 80 in Junction City, will be interred at Belcrest Memorial Cemetery at Salem Thursday.

Fruit Grower Disdains Aid

MEDFORD (AP)—One of the nation's largest orchardists Tuesday told the federal government it could keep its "giveaway" subsidies for improvements on private lands.

David H. Holmes, president of Harry and David's Bear Creek Orchards, the country's largest dealer in gift-packaged fruit and holder of extensive orchard properties, withdrew his applications for federal reimbursement on two irrigation and drainage projects.

The application had been made under the agriculture conservation program which entitles landowners to partial reimbursement on certain land improvements.

"We cannot complain about high taxes and the government's entry into private business on the one hand," Holmes said, "while holding out the other hand for giveaway dollars."

In a letter to the Medford branch of the Agricultural Stabilization and Conservation office, Holmes said "such payments are, in effect, subsidies, reimbursing us for costs which we feel our government should not be called upon to assume."

Lecturer Demonstrates Miniature Jet Engine

A story of progress through engineering and science was portrayed for members of the Eugene Optimist Club Tuesday noon in a non-technical science show sponsored by General Motors.

Robert Gregory of San Francisco, narrator of the show, used several pieces of complicated equipment to illustrate various scientific principles.

NOTHING NEW
Describing the evolution of jet propulsion, Gregory said this principle is more than 2,000 years old. He said a scientist named Hero built the world's first known jet engine about 200 B.C. which was operated on steam and called an aeolipile.

Jet propulsion, Gregory said, is based on Newton's third law of motion; that is, that for every action in one direction there is a reaction in the opposite direction.

To illustrate this principle, Gregory fired up a miniature jet engine. A blast of its high pressure flame created a roar that forced members of the audience to plug their ears.

This engine develops a five pound thrust, Gregory explained, in contrast with the 10,000 to 15,000 pound thrust developed by modern airplane jet engines.

Gregory also demonstrated certain principles in the manufacture of glass. He used a specially-built bottle to drive a 16-penny nail through a two by four, but when he dropped a minute piece of carborundum into the bottle it shattered.

Russ Renew Plane Dispute

WASHINGTON (AP)—Russia was disclosed Wednesday to have renewed its long-standing dispute with the United States over blame for three Far Eastern incidents involving planes of the two countries.

Informal officials said Soviet notes delivered to the U. S. Embassy at Moscow on New Year's Day reaffirmed the Russian viewpoint on these incidents:

1. The shooting down by Soviet aircraft on July 29, 1953, of an American RB50 plane over the Sea of Japan, with the loss of 15 crew members.
2. The shooting down two days earlier of a Russian IL12 airplane, with nine aboard, by a U. S. Air Force fighter plane on a combat mission in Korea. At the time, this country expressed regret over loss of the Russian airmen, but said the Soviet plane had no business being where it was.
3. The shooting down of a U. S. Air Force plane, with the loss of its eight-man crew, by Soviet fighters off northern Japan Oct. 7, 1952.

U. S. officials had no explanation of timing of the Russian notes except to say they were in response to questions raised by Washington and filled in more detail on some points.

Flue Fire Quelled
Eugene firemen were called to 2496 Cityview St. at 12:39 Wednesday to put out a flue fire which was brought under control without damage to the residence.

CARLOAD COOKIE SALE

• now get 3-lb. bag for 99¢
