

# BPA Speedup Involves Two Lane Projects

## Part of \$1 Million 'Booster' Program

Two Lane County projects are included in the Bonneville Power Administration's construction speedup ordered last week by BPA Administrator Charles F. Luce.

Some \$1 million in construction work is involved in the program for Oregon and Washington and is aimed at boosting the region's economy in keeping with President Kennedy's program for depressed areas, Luce was quoted as saying in Portland by the Associated Press.

Oregon projects include a speedup in construction of a 115,000-volt transmission line and a new Fern Ridge substation, both in Lane County.

The transmission project will integrate the Cougar hydro-electric plant, located on the south fork of the McKenzie River, with the federal grid and will carry power from the City of Eugene's Carmen-Smith project to Eugene.

L. A. Moore, BPA district manager in Eugene, said that 17 miles of the 46-mile line has been built. The remainder is scheduled for completion by October 1962.

While there have been no official instructions on the speedup, Moore says he expects plans for clearing the remaining transmission line right-of-way this year will be speeded up.

Design of a \$48,000 Fern Ridge substation is nearing completion and construction is expected to be finished by September, Moore said.

The substation will tap the BPA's Eugene-Mapleton transmission line in the vicinity of Veneta for service to Lane County Electric Cooperative.

# Display Brings 'Good Old Days' To 'Life' for Logging Conferees

Foundry patterns fashioned a half century ago for use in moulding logging equipment parts are taking on life-like characteristics at the Lane County Fairgrounds.

There, patterns for gears, pistons, plates and drums are being fashioned into objects resembling animals and people.

These assorted characters not only will offer persons attending the Oregon Logging Conference an opportunity to guess what they resemble but also the parts the various moulds were used to make "in the good old days."

More than 1,000 persons are expected to attend the conference, which opens for three days Thursday in Eugene.

Panel sessions will center attention on the conference theme, "The Man in the Woods." The Thursday morning keynote address is to be given by Orlo M. Brees, a representative of the National Assn. of Manufacturers.

Those attending the equipment show may observe the items being assembled from

foundry patterns by Kenyon R. Kaiser, 36-year-old Eugenean commissioned to handle the project for the conference.

Kaiser says he obtained the historic patterns from Z. A. Coop, a long-time blacksmith and foundryman at Cottage Grove.

They are original patterns used for casting in iron or brass the repair parts for logging and assorted equipment, Kaiser explains. Many were used years ago when horses and steam provided the power.

Kaiser, who is primarily a carver in wood and stone, has taken the various gears, rigging, pistons and other patterns and has created such objects as a little man and a character he calls "Beast From the Woods."

There's also a donkey made from donkey plates and a head made from a drum, brake shoes and block-and-tackle parts.

The logging equipment exhibit will be open to public viewing Thursday through Saturday.

## Army Engineers Announce Bids on 3 Jobs, Award One

The status of bids and contracts on four federal projects located in Lane County has been announced by the Army Engineers in Portland.

F. H. McEwen of Eugene has submitted the lowest of 19 bids for removal of stumps from the Hills Creek Reservoir project on the middle fork of the Willamette River, 50 miles east of Eugene.

The McEwen bid was \$6,522 on the reservoir cleanup work adjacent to the Packard Creek Forest Camp. Bids ranged as high as \$38,500.

A \$7,771 contract was awarded

## Hills Creek U.S. Engineer In New Post

Phillip L. Cole, resident engineer of the Hills Creek Dam project now nearing completion on the Middle Fork of the Willamette River, has been designated resident engineer in connection with construction of the Green Peter and Foster Dams on the Middle Santiam River, according to Col. Walter L. Winegar, Portland U.S. Army District Engineer.

Cole was named resident engineer at the Hills Creek Dam project June 23, 1958, after having served as acting resident engineer since May 31 of that year.

First construction work on the Green Peter project, which includes Foster Reregulating Dam, is expected to get under way this year. It will cost an estimated \$72,300,000.

Cole, a native of Casper, Wyo., is a 1947 graduate of Oregon State College, where he majored in civil engineering. Previous to that he attended Multnomah College for two years where he specialized in civil engineering.

The 38-year-old civil engineer is a graduate of Vancouver, Wash., Union High School. He worked briefly as a draftsman at the Kaiser Company's shipyards in 1942 and then entered the Army where he served as a first lieutenant. He had general duty as an engineer officer in training and the European Theater of Operations. He is a major in the U.S. Army Reserve.

He was assigned to the Hills Creek project as a supervisory construction engineer in June, 1957. His appointment as resident engineer made him one of the youngest resident engineers on major projects in the country.

## OSC Dads' Weekend

CORVALLIS — Some 1,500 fathers are expected at Corvallis Friday and Saturday for the annual Oregon State College Dads' weekend. Scheduled events include campus tours and a basketball series between Oregon State and the University of California.

Thompson Metal Fab of Portland for fabrication, assembly and mounting on a government supplied truck of a fish liberation tank for use at the Leaburg Trout Hatchery on the McKenzie River, 25 miles east of Eugene.

The engineers have taken under advisement eight bids submitted last week for furnishing low voltage switchgear for Cougar Dam. The apparent low bid was offered by Northeastern Engineering, Inc., of Manchester, N. H., for \$58,493.

The Portland office will open bids March 8 for construction of security fence and culvert installation at Lookout Point Dam on the middle fork of the Willamette River, 22 miles southeast of Eugene. Estimated cost is \$25,000.

Udall Appoints Oregon Resident

WASHINGTON (UPI) — Interior Secretary Stewart L. Udall Tuesday appointed John S. Hamilton of Klamath Falls, Ore., as special assistant to the undersecretary of the interior.

Hamilton, an employee of the department's Bureau of Reclamation since 1934, will be the principal staff assistant to undersecretary James K. Carr.

During his career, Hamilton, 43, worked on reclamation projects including the Shasta Dam and the Folsom Power plant on the Central Valley Project in California.

Esquire Cleaning Contractors, by James Dick, James E. Gaylor and Gilbert Miller, 1533 Hillyard St., Stanton-Tigner, by Arnold E. Tigner and Edward B. Stanton, 1193 Pearl St.

Gateway Used Furniture, by Grady L. and Della C. Miller, 4404 McKenzie Hwy., Springfield.

Central Supply, by Central Restaurant Supply Co., Robert E. Curtis, president, and Richard M. Murray, secretary. This follows retirement of same name by Robert L. Curtis.

Camp Creek Nursery, by Paul R. and Wanda M. Myers, Rt. 2, Box 501, Springfield. This follows retirement of Myers Begonia Gardens.

Scotties Restaurant, by Robert F. and Ruth Ann Sneddon, 47 E. Tenth Ave.

Mike's Trucks, by Leonard L. Weber, 3998 Franklin Blvd.

Construction Service Co., by Resort Development, Inc., by George W. Chaul and E. H. Thrall, 440 E. Eighth Ave.

Star Court, by Walter V. and Lawrence L. Patrick, 3301 E. Main St., Springfield. This follows retirement of same name by Marie Arlet.

## Floating Population

HONG KONG — Hong Kong's floating population totals at least 104,032 Chinese, living on 17,040 boats in bays and harbors of the British colony, the first stage of a new census shows. The census is Hong Kong's first in 30 years.

R & S Exchange, by Leonard W. Rust and William H. Shoemaker, 1132 D St., Springfield.

R & S Construction Co., by Clyde M., Paul M. and John M. Riley and James F. Swafford, Box 447, Cottage Grove.

B & G Cabinet Shop, by G. B. Schellinger, 2190 Hays St.

ETV & Co., by Thelma Coburn, 2588 Hillside Dr.

BEAST FROM THE WOODS — Kenyon R. Kaiser is pictured beside a life-like creation he fashioned from old-time foundry patterns once used in moulding logging equipment parts. This animal replica is called "Beast From the Woods" and will be one of 20 on display during the three-day Oregon Logging Conference which starts Thursday at the Lane County Fairgrounds in Eugene.

## A Family Affair

Duane Hafdahl, who has been chosen Junior Dealer of the Month of January, is representative of many successful young business men. He is a member of a family that pulls together.

He is one of four sons of Mr. and Mrs. R. O. Hafdahl who have carried the Guard for over ten years. Duane's brother, Myron, now 22, started the family tradition in 1951 when the route consisted mainly of bulldozed roads, rutty in summer, muddy in winter. During his second year on the route Myron was seriously ill. Duane, 8 years old and in the 2nd grade, helped his father substitute for Myron 'til he was well again . . . about five long months.

Now 15 years old, Duane has had the route for three years on his own. He took over from brother, Gordon, 18, who had the route after Myron. Now, Keith, 14, the youngest brother, substitutes for Duane.

Family cooperation makes a fine base for business teamwork later. Handling the route work has interested Duane in business as a life work. His activity in Junior Achievement, a youth group that tackles small business operations from wholesale production to retail profit and loss has boosted his business ability.

Sophomore Duane is a member of the North Eugene Math Club, studying graphs and computing after school. He attends Our Redeemer Lutheran Church. Marvin Schlosser, 112 McClure, is his best friend. Undecided about college yet, Duane is saving his money anyway. If he does go on to school, it will be to the U. O. Algebra and world history are his favorite subjects. He has good teachers. He says you can joke with them but you can't go too far! Basketball is the sport he likes best to watch.

His spread-out double route, #308 and #322, ranges from Maxwell and Howard to Grove in the River Road district. He has given consistent good service to his 137 customers and paid his monthly bills promptly.

As the high point man in January Duane Hafdahl, 1660 River Road wins a \$25 bond, a golden honor bag and the chance to compete this fall for Junior Dealer of the year.

Congratulations

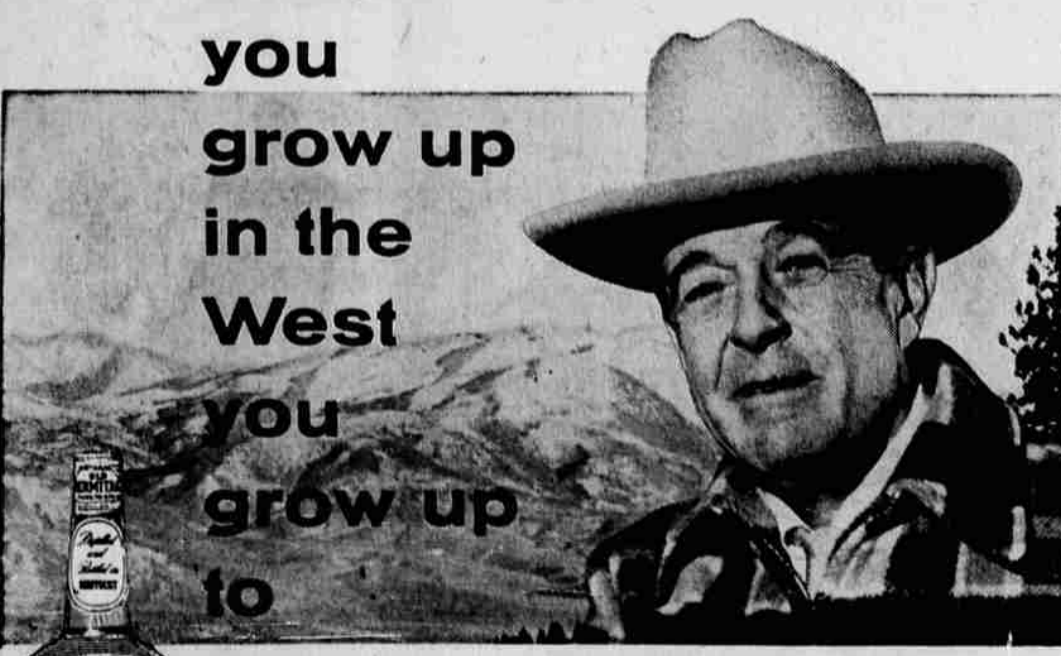

Mr. and Mrs. Hafdahl brought up a houseful of future Junior Dealers!
