Voters League Plans Coffees

Eugene League of Women Voters, through two orientation coffees next Tuesday, is offering an opportunity for Eugene women to become acquainted with the program and purposes of its organization.

The coffee hours, according to Mrs. John Hulteng, membership chairman of the Eugene league, are given annually to help new members and women considering membership to learn the organization's structure and goals.

The League of Women Voters is a non-partisan organization open to women of voting age. To achieve the league's purpose of promoting political responsibility through informed and active participation of citizens in government, members may choose from a variety of activities, limiting their degree of participation to the time they have available.

Eight discussion units meet monthly in members' homes; all discussing the same topics. In addition to these monthly meetings, there are three or four general membership meetings during the year.

Members may limit their time to the discussion meetings, or may work for league committees preparing discussion material, interviewing political candidates, public speaking, writing, hosting, or doing the office work of the organization. An invitation is extended to

interested women to attend either of the Tuesday coffees: at 10 a.m. at the home of Mrs. F. R. Lacey, 1976 Washington St., (DI 4-7723) or at 8 p.m. at the home of Mrs. Charles Bremer, 2162 Washington St., (DI 4-5353).

Anyone wishing transportation may call Mrs. Hulteng, (DI 4-4728).

Weightless Woolens
Handsome costume (left) uses white lightweight wool for dress and slightly heavier mesh for what is called the new 9/10ths-length coat. Both dress and coat mark a lifted, almost empire, waistline with gently fitted body line. Coat closes with two black buttons, has notched lapels, slash pockets and three-quarter length sleeves. Dress (right) is

fashioned of airy, almost diaphanous shadow plaid weave wool, soft to the touch, cool enough for the warmest day. Bodice is cut on the bias with gentle cowl neckline and sleeves cut in one with front and back. Slim skirt has soft open darts on each side at the waistline, front and back with contour belt of self fabric.

Spring's Lightweight Woolens Tell Exciting Story

There are so many wonderful things about Spring—new life everywhere, skies are more often blue, clouds puffy white, an upsurging joy of just being alive!

Then there are new clothes to see and to buy, new trends to sense and savor, new colors to lift your spirits high, delightful new wools to love and cherish!

Spring wools tell an especially exciting and lovely story both in fabrics and fashion. There's news in many cloud-light, even gossamer weaves and weights in wools fashioned into dresses, costumes, suits, also airy meshes in coats. There are changes in styling, too, not drastic enough to out-date your present wardrobe, but sufficiently new to stimulate your appetite for Spring, 1962.

The newest trend in wools and worsteds is in the light and airy constructions, which have been called "the naked wools", truly year-around weights that may be worn comfortably under coats or with small furs on cooler days and most pleasantly even in mid-summer.

Their open weaves admit the air, the natural absorbency of wool eliminates any damp or sticky feeling, its resilience keeps clothing looking fresh and unwrinkled. There are weights from nun's veiling, about 3½ oz. to the yard, through worsted voiles, various leno or meshy

weaves to new worsted crepes as light as 4½ to 5½ oz. and on to coatings of various weights. It all adds up to some of the most delightful fashions for Spring in many a season.

As for color, selection of a leader is not easy, but there is much evidence of white, off-white, pale bone and light beiges in coats, suits and dresses. White influences other colors, also, frosting, plaiding and otherwise lightening them.

The green family speaks up happily of new leaves and budding plants; apricot looks fresh and appealing in its true shade and also in its family, including shrimp, salmon, whitened orange ice, deeper and softer orange shades.

Daffodil yellows are new look-ers, also creamier yellows and

those tinged with green, almost chartreuse. Blues tend to clear shades, like sky, and bright navy is expected to be stronger than in some time.

Various tones of turquoise and aqua are important; light pearly and yarn-dye greys show increasing favor. Beiges through cinnamon, amber, butterscotch, and on to dark browns for town will add to the color picture. Brown and white and black and
