MRS. PHILLIP HART
Woman in Space Program

WASHINGTON—Sen. Phillip A. Hart's blonde wife — mother of eight — is asking Vice Presiden Lyndon B. Johnson to help break up the "men only" exclusiveness of the Americans in space program. She would like to be the first woman in space herself.

The wife of the Michigan Democrat wants the United States to launch a woman-in-space program. So far, she says, she has gotten the cold shoulder from the National Aeronautics and Space Administration.

A program for female astronauts "could be gotten off the ground very quickly if we could just convince men it would not destroy their virility," she said.

If she can't be the first woman in space, she is determined that an American woman will be—and not a Russian cosmomiss.

To further her campaign, Mrs. Hart—the former Jane Briggs, daughter of a Detroit millionaire — has an appointment Thursday with Johnson in his role as chairman of the National Aeronautics and Space Council.

She hopes Johnson will be able to swing a little weight with James E. Webb NASA head. Up to this point, she told a reporter, Webb has treated her proposal with reluctance.

How has her husband reacted to the idea?

"I've never asked him," she said.

Hart, pressed on the matter, responded: "I've always thought my wife was an extraordinary woman and this is most interesting.

Mrs. Hart, who is in her early 40s, is one of 12 women to have successfully undergone the tough physical tests given the seven male Mercury astronauts when they first aspired to the job.

Mrs. Hart and her group have logged more than 1,000 hours of flying time. She is a licensed airplane and helicopter pilot.

Accompanying her Thursday will be Jerrie Cobb of Oklahoma City, a widely known woman pilot who was the first to take the tests. Mrs. Hart has written members of the Senate and House space committees, urging them to invite Miss Cobb's testimony and to include women in future space plans.

In her letter to space committee members, Mrs. Hart said, "It is my belief that the Russians will have successfully space flown a woman by next September. I sincerely hope that your interest in this matter will serve to help get this program off the ground."

Mrs. Hart emphasized that her purpose is not seeking equality for women.

"We want to see this done for its scientific value," she said.

"Eventually, women are going to be needed. They might as well start in the early stages.

"When they start setting up these satellite stations, from which trips to far distant points will be made, people will be living on those stations for months, if not years," she said.

"They're going to have to provide some kind of family arrangements."

Report Cites Race Problem In N.J. City

School System Center of Conflict

ENGLEWOOD, N. J. (AP)—A condition of racial imbalance harmful to both white and Negro pupils exists in Englewood's elementary schools, warned a report released Monday night by the school board.

The report, prepared by the Englewood school superintendent and three expert consultants, declared that unless steps are taken to remedy the imbalance, "unrest, struggle and violence" probably will continue in this community of 26,000.

Englewood is split by bitter controversy over alleged racial segregation in its public schools. Conflict flared into the open six weeks ago when the school board announced a report on the schools was not ready. At that time the board denied applications by nine Negro children for transfer from the Lincoln Elementary School, which is 98 per cent Negro, to a predominantly white school.

An all night sit-in at City Hall, resulting in the arrest of 15 demonstrators, followed the board's action. Subsequently a suit was filed in U. S. District Court in Newark charging that Englewood maintained segregated schools through its drawing of school district lines.

Negro leaders also charged that the board was intentionally delaying the school report so that it could avoid taking action against segregation by the fall term.

"In so far as segregation exists in some of the schools, it appears to be a result of practices carried out within the confines of the housing market," the report said.

One of the report's six alternative proposals was establishment of an urban renewal program to break down present residential patterns in the city. About a quarter of the population is Negro.

Resolution Passes

WASHINGTON (AP)—A resolution sponsored by Sen. Hubert H. Humphrey, D-Minn., breezed through the Senate Monday without a murmur of dissent. It congratulated the Girl Scouts of America on their 50th anniversary.

Medical Care Program Support

Dems Going to Grass Roots

WASHINGTON (AP)—The White House is coordinating a massive grass roots effort aimed at driving President Kennedy's medical care program through Congress.

Administration sources point to Kennedy's engagement to address a rally boosting program in New York's Madison Square Garden May 20 as an example of how much energy will go into the effort.

Kennedy accepted an invitation Monday to appear at the Madison Square Garden rally sponsored by an organization called the National Council of Senior Citizens and the Golden Ring Clubs of New York. White House press secretary Pierre Salinger said later the White House would welcome requests from networks interested in putting the event on television and radio.

Richard Maguire, a White House assistant, is understood to be coordinating and counseling outside organizations which back Kennedy's program to finance medical care for the aged through Social Security.

The purpose is to whip up broad public support for the administration plan and to direct that support toward influencing members of Congress to adopt it against vigorous opposition of the American Medical Assn. and insurance groups.

The Democratic National Committee also intends to print and distribute material promoting the Social Security approach to care of the aged.

The National Council of Senior Citizens is one of the major vehicles for pushing the campaign. The council was launched only last year but already claims the backing of a half million men and women around the country, many of them associated with local Golden Age clubs and other organizations of senior citizens.

The council is an outgrowth of Senior Citizens for Kennedy, Former Rep. Aime Forand, D-R.I., headed that unit in the 1960 presidential campaign and is chairman of the revived council. Forand was an ardent advocate of a broad scale plan to defray costs of caring for older citizens while he served in Congress.

Lawrence A. Oxley, a consultant to the council, said it intends to circulate a million copies of a pamphlet to advertise the program and to serve as a basis for discussion at meetings of community groups.

Secretary of Welfare Abraham Ribicoff has been speaking frequently around the country in support of the Social Security method and attacking the AMA for its opposition.

Evans Planning Expansion Of Roseburg Plywood Plant

PORTLAND (AP)—Construction to double the productive capacity of Evans Products Co.'s Roseburg plant is scheduled to start within 90 days.

The plans were announced Monday by M. A. Orloff, general manager of Evans' building materials division in Portland.

He said the existing plant will be remodeled and new facilities added at a cost of $1-1½ million. Completion is scheduled in about a year with the capacity to be expanded to 8½ million feet of ⅜-inch plywood, an increase of about 4 million.

The output will nearly equal the combined capacity of the present Roseburg facility and Evans' Coos Bay plant, closed earlier this month.

Orloff said Evans also is studying feasibility of doubling its Corvallis hardboard plant's capacity, now 3½ million feet of ⅛-inch board monthly. It is the first hardboard plant west of the Mississippi River.

Orloff said Evans is considering, too, the possibility of building at Roseburg a flakeboard plant. It would utilize chips, veneer scraps and peeler cores too small for other uses.

Orloff also announced that construction of a one-half-million-dollar office building for the company is expected to begin soon in Portland.

Orloff told of the plans at a conference attended by Mayor Terry Schrunk and other city and state officials. It came on the first day of a week-long meeting of Evans officials from 34 cities. The meeting was called in connection with creation of the building materials division.

That came about through purchase of Aberdeen Plywood & Veneers, Inc., last September. Evans officials said the division will account for some 70 per cent of the firm's expected $100 million annual sales.

Printer Named Superintendent

Carryl H. Wines, who has been on the staff of the University of Oregon press since 1952, has been appointed superintendent of the press with the rank of instructor.

Wines fills the position left vacant by the resignation of Donald Shepardson, superintendent of the press from 1955 until he left in February, 1962, to become state printer of Oregon.

The new superintendent has been associated with printing and newspaper work since 1937. From 1937 to 1944 he owned and operated The Adams County Leader, weekly newspaper and job shop at Council, Idaho. He moved to Ashland, Ore., in 1944 where he owned and operated the Southern Oregon News-Review, weekly newspaper and job shop, until 1949. He then worked as a linotype operator on the News Tribune in Caldwell, Idaho, until 1952.

Wines started service at the University press in 1952 as a linotype operator. He was named foreman of the press in 1956 and assistant superintendent in 1959.

Teamsters Settle Dispute

SALEM (UPI) — The 3-year-old dispute between the Teamsters Union and a dozen Corvallis, Independence and Salem gravel firms has been settled.

A spokesman at the Teamsters Local 324 office here said Monday the dispute was settled about a week ago and pickets have been removed.

In Corvallis, John Gallagher, manager of Corvallis Sand and Gravel Co., said the union, which lost in court action over the dispute, has paid employers a judgment of about $23,000.

In May of 1959, Teamster pickets were set up at the plant of the Corvallis Sand and Gravel Co. over a contract dispute involving wages and fringe benefits.

The Cascade Employers Assn. including 12 firms, shut down operations the next day and later began operating with non-union and management workers.

Until recently, pickets were up in Salem.

Gallagher said his firm has signed a new three-year contract with the union.

Pat Blair, Salem, secretary-manager of Cascade Employers, said that only the Corvallis firm has a contract with the Teamsters, and that the other 11 firms have no contracts. However, he said the dispute has been settled.
