### Trump's Pick for Justice Dept Could Influence Immigration

WASHINGTON (AP) — As a senator, Jeff Sessions became Congress' leading advocate not only for a cracking down on illegal immigration, but also for slowing all immigration, increasing mass deportations and scrutinizing more strictly those entering the U.S. As attorney general, he'd be well positioned to turn those ideas into reality.

Immigration laws are enforced by other agencies, but the Justice Department plays a crucial role in setting the policies and legal underpinnings that shape the system. And if Donald Trump sticks with his campaign promises, immigration will be a top priority for his administration.

As the nation's top law enforcement official, Sessions could execute maneuvers to limit which nationalities the U.S. would accept as refugees and to reverse a federal policy that protects young people from deportation.

"The president has the clear power to suspend immigration to protect America," Sessions said during the Republican convention when he was discussing the threat of terrorism and the need to scrutinize refugees more closely.

The fourth-term Republican from Alabama was the first senator to support Trump's candidacy, and he helped shape Trump's positions on immigration. Sessions favors limiting the number of refugees coming into the U.S. and turning away children who arrive at the border alone who are attempting to reunite with families living in the U.S.

### Americans Who Live Near Border Say Trump's Wall is Unwelcome

LOS EBANOS, Texas (AP) — All along the winding Rio Grande, the people who live in this bustling, fertile region where the U.S. border meets the Gulf of Mexico never quite understood how Donald Trump's great wall could ever be much more than campaign rhetoric.

Erecting a concrete barrier across the entire 1,954-mile frontier with Mexico, they know, collides head-on with multiple realities: the geology of the river valley, fierce local resistance and the immense cost.

An electronically fortified "virtual wall" with surveillance technology that includes night-and-day

video cameras, tethered observation balloons and high-flying drones makes a lot more sense to people here. It's already in wide use and expanding.

If a 30- to 40-foot concrete wall is a panacea for illegal immigration, as Trump insisted during the campaign, the locals are not convinced. And few were surprised when the president-elect seemed to soften his position five days after the election, saying that the wall could include some fencing.

In this Nov. 17 photo, Sen. Jeff Sessions, R-Ala. speaks to media at Trump Tower in New York. As a senator, Sessions became Congress' leading advocate not only for a crackdown on illegal immigration, but for slowing all immigration, along with mass deportations and stricter scrutiny of those entering the U.S. As attorney general, he'd be well positioned to turn those ideas into reality.

### A Scare, Then Relief After Powerful Japan Quake and Tsunami

TOKYO (AP) — At first, it was 2011 all over again.

"It really came back. And it was so awful. The sways to the side were huge," Kazuhiro Onuki said after northeastern Japan was jolted Tuesday by a magnitude-7.4 earthquake, the strongest since a devastating quake and tsunami five years ago.

"But nothing fell from the shelves," Onuki, 68, said in a phone interview, his voice calm and quiet.

Coastal residents returned home from higher ground, and fishing boats to port, after tsunami warnings were lifted along Japan's Pacific coast. The earthquake gave Tokyo — 240 kilometers (150 miles) away — a good shake, but was much less powerful than the magnitude-9.0 quake in 2011, and only moderate tsunami waves

reached shore.

The Fukushima Dai-ichi nuclear power plant, which leaked radiation for kilometers (miles) after the 2011 tsunami, reported no abnormalities. Decommissioning work on the destroyed reactors was suspended and the site inspected.
