

WE DON'T HAVE TO CHOOSE BETWEEN OUR PLANET AND OUR COMMUNITIES. SB 5126 CUTS EMISSIONS TO BENEFIT BOTH.

The Climate Commitment Act (SB 5126) is a first-of-its-kind Cap & Invest program to push down both greenhouse gases and emissions that impact human health in our communities. All while boosting the economy. So many different groups support this program because it will make Washington cleaner, healthier, and more prosperous.

It's out of the Senate and on to the House. Representatives, do what's right for Washington, our planet, and our next generation. Support SB 5126.
