Agricultural & Geographical Statistics

WILLAMETTE FARMER.

This county, like Douglas, situa
ted on the ocean, possesses an unlim
ted amount of soil, which, if properly developed and worked to their full capacity, would permit the utmost fertility. This region is also well supplied with water and has a variety of climates for the growth of all kinds of trees and other products.

The Willamette Valley, situated in the middle of the state, is a fertile region, well adapted for agriculture. It is particularly noted for its production of wheat, hay, and other agricultural products.

The Willamette River is navigable for six months of the year and is used for transportation. The country is well supplied with water and has a variety of climates for the growth of all kinds of trees and other products.
