

Sheep Husbandry.

THE WOOL QUESTION.

CHICAGO, ILL.,
April 19, 1872.

EDITOR FARMER: At the present time there is a great flurry in the wool market. Every farmer, especially in the Western States, is going into the wool industry. Such an excitement was created the last year of the late rebellion, but after the close of the war wool met a speedy downfall in price, and farmers lost heavily, which caused them to discontinue the business. The violent fall in the price of wool at that time was caused, to a great extent, by the throwing on the market of an enormous supply of army goods. Such a thing cannot happen now, nor is there any other artificial or transient combination of circumstances which can lower the price of wool for the next two years; but on the contrary the price must increase. The late European war, between Germany and France, exhausted the supply of wool in England and her colonies, and the war preparations going on in the leading European nations keep up the demand for woolen fabrics, which the factories of England are unable to meet. In our own country the demand is greater than the supply. There is scarcely a supply of wool in the markets of Boston, New York, and Philadelphia, for the New England mills, still these manufacturing will not be allowed to stop though wool were five dollars a pound. Everything indicates that the clip of this year and of 1873 will find a sale at very high figures.

The wool industry is fast emerging from the drawbacks which it has had to encounter for the last five years. Mutton is fifty per cent. in advance of what it generally is at this season of the year, yet it is very scarce. The present demand for wool and mutton is strictly legitimate, and there is nothing which can take the places of these so as to affect the price for at least two years. Wool-growers will receive more than enough at present prices to compensate them for their loss during the few years past. If they could bring their influence to bear so as to direct legislation, and have suitable laws enacted against dogs being allowed to run at liberty to slaughter their sheep, it would save them thousands of dollars annually.

THE CARE OF SHEEP.

1. There is a wonderful difference between the well-doing of a small and a large flock of sheep. The small flock will often do exceedingly well, whilst the large one will fall in health and comparative profit and advantages.

2. Sheep will not do so well closed up in any yard or pen, no matter how well arranged it may be, as they will if allowed to roam about and have plenty of air and room. Outdoor exercise seems to suit them far better than a yard with but little space to run about. Where the winters are long and the snow covers the ground for many months, sheep are prevented getting at the earth, of which they naturally consume a great deal; and nature seems to require such a medicine, or change of diet.

3. Bran that is old or has been heated, or has become a little musty, is highly injurious to sheep, and must never be given; it will often produce severe scouring in the middle of winter. When one sheep is thus affected, the rest will often become infected also.

4. Any disease that affects one sheep, will infect the whole flock, even when not thought to be infectious.

5. In many localities sheep will not do well, even with the same care as elsewhere under the same treatment, whereas in some places sheep seem to thrive without any special cause of great care. Of this there is no doubt, and we see it continually made apparent. Adapting the breed to suit the locality will do much to assist; but young sheep farmers must not think, because they see sheep doing so well and costing so little in some places without care, that their flocks will thrive well under similar treatment.

6. It is a great mistake to suppose that sheep can do without water, or that they are better without it. It is so far true, as that sheep are certainly injured by drinking water in

large quantities at irregular intervals, and many are made sick thereby; but if water is always before them, so that they can drink a little at a time, as wanted, they will seldom or never hurt themselves. Watering once a day will not do; they will often hurt themselves by drinking too much when supplied at such long intervals. When fed with roots, there is no occasion for water—90 per cent. of such food is water, and is taken in small quantities and often.

—*Cor. Canada Farmer.*

STORING WOOL.—If the clip of wool be not sold or sent to market at once, it should be stored in a tight room, free from dust; and if intended to be held for any considerable length of time, should be well covered from the light. This latter precaution being taken, the fleeces will not so rapidly become yellow, and otherwise unsightly. —*Live Stock Journal.*

NEW ZEALAND.—The sixth annual show of the Tokomairiro Farmers' Club was held at Milton on the 20th February, and was the very best ever held in the district. The local paper says of the show: "The number of entries exceeded that of any former occasion, and an improvement in most of the classes was also manifest. The long-wooled sheep were generally considered the best part of the show; and, unquestionably, those exhibited by Mr. Allan Cameron, Manager at the Clydevale Station for the N. Z. Co., would be difficult to beat in the Colony. They have always secured first prizes when exhibited, and flocks of the same sent to the United States sold at very high prices."

THE NATIONAL FINANCES.—Secretary Boutwell reports that the national debt was reduced during the month of March last, \$15,481,968, making a total reduction since March 1, 1869, of \$317,025,606. The total debt, less cash in the Treasury (\$130,631,906), is \$2,174,374,298.

Wit and Humor.

COOL.—*Railway Official.*—You'd better not smoke, sir.
TRAVELER.—That's exactly what my friends say.
RAILWAY OFFICIAL.—But you mustn't smoke, sir.
TRAVELER.—So my doctor tells me.
RAILWAY OFFICIAL (indignantly).—But you shan't smoke, sir.
TRAVELER.—Ah! Just what my wife says.

A quaint old gentleman, of an active, stirring disposition, had a man at work in his garden who was quite the reverse. "Jones," said he, "did you ever see a snail?" "Certainly," replied Jones. "Then," said the old boy, "you must have met him, for you never could overtake him."

Brudder Lotter, of Montgomery, Alabama, was killed by lightning while appropriating grain from a corn crib. The loyal blacks are much perplexed, and piteously inquire—"Is de Lord turned Ku-Klux gin de poor darkies, jist for stealin a little co'n?"

A gentleman seeking a man to do some work met on his way a highly respectable lady, not as young as she once was, and asked her, "Can you tell me where I can find a man?" "No I cannot," she replied, "for I have been looking these twenty years for one myself."

FAIR PLAY.—An Irishman who was engaged to cut ice from a pond, was handed a cross-cut saw to commence operations with, pulled out a penny, and turning to his comrade, exclaimed, "Now, Pat, fair play; head or tail, who goes below?"

Conversation in a Wisconsin Store—**POLITE CLERK.**—Can I show you anything else to-day?
LUGUBRIOUS CUSTOMER.—No, I reckon not. I lost two horses and my wife last fall, and I feel pretty poor. Good span of horses, too.

A wife having lost her husband, was inconsolable. "Leave me to my grief," she cried sobbing, "you know the extreme sensibility of my nerves—a mere nothing upsets them."

DOMESTIC YOUNG LADY (making a pie)—"Frank, the kitchen's no place for boys. Has dough such an attraction for you?"
CLEVER YOUTH.—"It isn't the dough, cousin—it's the dear!"

The Cleveland Leader says the musician who puts his lips on a brass horn on a recent cold day would not be able to let go until navigation opens.

The heir on a camel weighs about ten pounds and sells for more than \$100, which shows that it was not only in the days of Mohammed that the animal bore a great prophet.

Make an impartial estimate of your revenue, and whatever it is, live upon less. Do this, and you will never be poor.

A laconic conversation: "What ails your eye, Joe?" "I told a man he lied!"

BREYMAN BROS.,
Commercial Street, third door from Moores' Corner,
Salem, Oregon,
WHOLESALE AND RETAIL DEALERS IN
**FANCY AND STAPLE
DRY GOODS!
CLOTHING,
Hats & Caps,
BOOTS AND SHOES,
GROCERIES, ETC.**

We have now
A Complete Assortment
of the above named goods, and are offering them
—AT—
EXTREMELY LOW RATES.

We also keep a full line of
**Carpets,
Oilcloths,
Matting,
Lace Curtains,
Window Shades, Etc.,**
to which we invite especial attention, as we can offer now

**SUPERIOR INDUCEMENTS
TO BUYERS.**
We have also the Agency for the Sale of
**ORSON CITY
WOOLEN GOODS,**
and constantly keep now a full supply of

**BLANKETS,
CASIMERES,
TWEEDS,
FLANNELS,
YARN, ETC.,**

We are enabled to sell to dealers at manufacturers' prices.

The Best Cure for Dyspepsia!

**Dr. Holey's
CELEBRATED
BITTERS**
A Most Efficient and Pleasant Tonic.

These Bitters are prepared from the most choice and wholesome herbs and roots, and have given universal satisfaction wherever tried. Thousands of dyspeptics have found relief through their use, and physicians recommend them for the cure of all diseases of the blood and liver, and irregularities of the digestive organs.

CERTIFICATES.
MRS. H. FRETEN & CO.
Gentlemen: I take pleasure in stating that agreeably to your wish I have carefully tested and examined the sample of your I. L. Bitters, which you sent me, and find it not only an agreeable Bitter, but also one that cannot fail to be beneficial as a tonic and promoter of Digestion.

G. HOLLAND, M. D.
CITY AND COUNTY HOSPITAL, San Francisco, June 20th, 1871.
I have carefully examined Dr. Holey's I. L. Bitters, and have found them to be a most valuable medicine. From the composition of the Bitters, as far as I am able to determine it, I should judge that the I. L. Bitters must be a very efficient remedy in Dyspepsia, Indigestion, Loss of Appetite and similar complaints, being composed of a number of vegetable drugs which are judiciously used in the case of that nature, and are of the greatest efficiency in their cure.

E. H. ENGELS, M. D.
Asst. Res. Physician Apothecary C. & C. Hospital. STATE AMATEUR'S OFFICE, San Francisco, July 21st, 1871.
MRS. H. FRETEN & CO.—Gents: I have made a careful examination of your I. L. Bitters, and have found them entirely free of deleterious mineral substances. Yours etc.
LOUIS FALKENAU, State Assay. Dr. of Counterfeits. None genuine without Dr. Holey's signature across the top of each bottle.
Every Family should have a Bottle in the house. Sold everywhere.

SOMETHING NEW ON THE PACIFIC COAST!

**BOSWELL'S
Standard Fruit Dryer,**

**Iron Heater, Bread Raiser,
Dairy Heater, &c.,
COMBINED!**

POSITIVELY THE MOST PROFITABLE and useful invention of the age, combining cheapness, durability and economy, and can be applied to a greater variety of purposes than any other machine extant.

As a Fruit Dryer,
It stands unrivaled, and is acknowledged by scientific men to contain the only true principles for drying fruit, and is so simple in construction that a mere child at once understands and operates it.

As a Room Heater,
The Prismatic Cylinder concentrates the heat, lightens the carbon, and produces more heat than any other known device, which, being distributed by the perforated shield in diable currents of hot air, will heat two, three, or even four rooms (if properly connected) with less fuel than any one of the same rooms can be heated to the same temperature by any stove or heating apparatus in use, while at the same time it detaches all noxious gases, causing a pleasant and healthy atmosphere and even temperature throughout all the apartments.

As a Clothes Dryer,
IT HAS NO COMPETITOR, and wherever known is hailed with delight by the ladies, as the greatest labor-saving invention of the age.

In Lumber Drying,
The principles of this invention, as applied, are invaluable and without competition.

MILLINERS, BAKERS, CIGAR MANUFACTURERS AND OTHERS
Will find it greatly to their advantage to see this machine and investigate its properties.

We could publish columns of testimonials from the best citizens of Ohio, Indiana, Illinois, Michigan, Iowa, and other States, of its superiority over any invention of the age, but as the machine must stand on its own MERIT, it must be seen in operation to be fully appreciated.

**FARMERS, BRING YOUR FAMILIES TO SEE THE
Boswell Heater and Dryer.**

It is exactly what you want and need, regardless of any dry-house or kiln you may now have. We do not ask you to buy a complication of patent rights, merely from an examination of a model, but come and see the full-sized machine perform its work as represented.

There is no Dwellling House, Church, Seminary, Public Hall, Hotel or Restaurant, to which this machine is not applicable, useful and profitable.

Ladies and gentlemen, you are respectfully invited to call and examine the machine for yourselves, for it is impossible in a short advertisement to enumerate ALL the good qualities of this truly wonderful, yet simple, FAMILY FRIEND.

Seven claims are secured by letters patent, which places it beyond the reach of a rival.

The subscriber, having purchased the exclusive right for the State of Oregon, is now manufacturing them for sale, on State Street, in Salem, where a variety of styles and a machine in operation can be seen at any time.

JOH. CARR,
Opposite Gil, Steel & Co.'s Book Store,
Salem, Oregon.
Nov 11-11.

**Willamette University,
SALEM, OREGON.**

THE OLDEST AND LARGEST INCORPORATED School in Oregon. Classical, Commercial, Normal, and Scientific Courses of Study. For full information, address the President, T. M. GARDNER, C. N. FERRY, Secretary Board of Trustees.

**Ayer's Sarsaparilla,
For Purifying the Blood.**

A medicine that cures is a real public blessing. **AYER'S SARSAPARILLA** makes positive cure of a series of complaints, which are always afflictive and too often fatal. It purifies the blood, purges out the lurking humors in the system, which undermine health and settle into troublesome disorders. Eruptions of the skin are the appearance on the surface of humors that should be expelled from the blood. Internal discharges are the determination of these same humors to some internal organ, or organs, whose action they derange and whose substance they consume and destroy. **AYER'S SARSAPARILLA** expels these humors from the blood. When they are gone, the disorders they produce disappear, such as *Eruptions of the Liver, Stomach, Kidneys, Lungs, Scalding Head, Ringworm, Itchiness of the Skin, St. Anthony's Fire, Ringworm, Erysipelas, Pimples, Itchiness, Hoarseness, Tetter and Salt Rheum, Sore Head, Ringworms (Ucers and Sores), Rheumatism, Neuralgia, Pain in the Bones, Side, and Head, Female Weakness, Sterility, Leucorrhoea arising from internal secretion and various diseases, Dropsy, Dyspepsia, Emaciation, and General Debility.* With their departure health returns.

PREPARED BY
DR. J. C. AYER & Co., Lowell, Mass.,
Practical and Analytical Chemists.
And sold by Druggists all around the world.
