THE Scientific American FOR 1873. BEAUTIFULLY ILLUSTRATED.

THE "SCIENTIFIC AMERICAN" NOW IN its 28th year, enjoys the widest circulation of any analogous periodical in the world. Its contents embrace the latest and most interesting information pertaining to the Industrial, Mechanical, and Scientific Progress of the World; Descriptions, with beautiful engravings, of New Inventions, New Processes, and Improved Industries of all kinds; Useful Notes, Facts, Recipes, Suggestions, and Advice, by Practical Writers, for Workmen and Employers, in all the various Arts. Descriptions of Improvements, Discoveries, and Important Works, pertaining to Civil and Mechanical Engineering, Mining, and Metallurgy; Records of the latest progress in the Applications of Steam, Steam Engineering, Railways, Shipbuilding, Navigation, Telegraphy, Telegraph Engineering, Electricity, Magnetism, Light and Heat. The latest discoveries in Photography, Chemistry, new and useful applications of Chemistry in the Arts and in domestic or household economy. The latest information pertaining to Technology, Microscopy, Mathematics, Astronomy, Geography, Meteorology, Mineralogy, Geology, Zoology, Botany, Horticulture, Agriculture, Architecture, Rural Economy, Food, Lighting, Heating, Ventilation, and Health. In short, the whole range of the Sciences and Practical Arts are embraced within the scope of the Scientific American. No person who desires to be intelligently informed can afford to be without this paper. Engineers, Mechanics, Engineers, Inventors, Manufacturers, Chemists, Lovers of Science, Teachers, Clergymen, Lawyers, and People of all Professions, will find the SCIENTIFIC AMERICAN to be of great value. It should have a place in every Family, Library, Study, Office and Counting Room, College, Academy, or School. Published weekly, splendidly illustrated, only \$3 a year. The Yearly Numbers of the SCIENTIFIC AMERICAN make two splendid volumes of nearly one thousand pages, equivalent in contents to Four Thousand ordinary Book Pages. An Official List of all Patents issued is published weekly. For Specimen Copies, send to the publishers, MUNN & Co., 37 Park Row, New York. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents, have had over 25 years' experience, and have the largest establishment in the world. If you have made an invention, write them a letter and send a sketch; they will promptly inform you, free of charge, whether your device is new and patentable. They will also send you, free of charge, a copy of the Patent Laws in full, with instructions how to proceed to obtain a patent. Address MUNN & Co., 37 Park Row, New York.

Farmers and Horsemen. Examine our Copper riveted Horse Collars. Adopted by U. S. Army. Best in Use 18,000 sold. ALL GRADES Heavy & Light. No Complaints No ripping. No Repairing Examine for yourselves. Don't believe prejudiced parties. FOR SALE BY ALL DEALERS. Manufactured by J. C. JOHNSON & Co., 104 Front St., SAN FRANCISCO. Dealers in Harness, Saddlery, Leather, etc. Liberal discount to the trade.

ALL SEEKING INFORMATION AS TO HOW, WHEN AND WHERE TO ADVERTISE SHOULD SEND FOR A COPY OF EVANS' Advertising Hand Book. Which contains a list of all the desirable advertising mediums in the Country, with CIRCULATION, RATES, &c. invaluable to all who desire to spend their money to Best Possible Advantage. Sent post free for 25 cents in paper, 50 cents in cloth. Address T. C. EVANS, General Newspaper Advertising Agent, 106 Washington Street, Boston.

Wanted, \$800 OR \$1,000, SECURED BY Real Estate in Salem. Inquire at this office. Nov. 16-17

BELT & HALL, Successors to BELT & JOHN'S AND J. W. CRAWFORD & Co. Druggists & Apothecaries. And Dealers in Drugs & Medicines, COMMERICAL STREET, Opposite Chemeketa House, SALEM, OREGON. DR. E. Y. CHASE, BREVET U. S. Col., late Surgeon U. S. Volunteers. Office, Umbria's block, up stairs, Ross-street, Commercial street Salem Oregon. Oct 27

NEWS BY TELEGRAPH.

New York, July 11.—The murder of Charles Goodrich is no longer a mystery. He was shot by Minnie Waltham, alias Kate Stoddard, on the 21st day of March last, and yesterday she made a full confession of her guilt to the police authorities of Brooklyn. Her trunks were seized upon and opened. In them was discovered some property of Goodrich's, including a watch and chain, a flogger ring and seal, and a pocket-book with \$40 in bills in it, believed to be the identical money taken from the murdered man. A revolver found in her trunk had three chambers loaded and three empty. There were three bullets found in Goodrich's head. Kate confesses that the revolver found in her trunk was the weapon which she killed Goodrich. Every article of property taken by her from the premises she seems to have carefully preserved.

New York, July 12.—Kate Stoddard, the confessed murderess of Goodrich, last evening spent the time in playing on her piano in the Captain's room at the station house, in Brooklyn. The police say of her that she is an educated, refined woman, but a little "touched." Roscoe's capture was certain, as there was a large force in search of him. The Goodrich inquest was resumed today at the Brooklyn Court House, by Coroner Whichell. The alleged murderess, Kate Stoddard, alias Amy Stone, was present. William C. DeWitt was retained as counsel for the prisoner.

The Orange procession to-day started from Lafayette Place at 10:40 a. m., with about 700 men in line and a strong escort of police. There were seven lodges, each with a banner of their Lodge and some with American flags. Two bands played along Broadway and on the way back from Thirty Fourth street, "The Orange and Green will Carry the Day."

A Washington dispatch says that the Treasury Department is prepared with a detailed statement showing the final settlement of Paymaster Hodge's defalcations. After deducting what was realized from the sale of his property, there remains as a total loss to the Government, \$44,306. The bonds which were given by Hodge at different times were four in number for \$20,000 each. They do not cover the period of defalcation, and it is not expected that the Government will be able to recover anything on any bonds it holds.

Milwaukee, July 12.—The Daily News of this city learns from Senator Carpenter that the Chief Justiceship will be offered to Senator Howe of this State should Conkling decline.

Concord, July 11.—Mrs. Mary Carlton was charged this afternoon in the Police Court with placing obstructions on the track of the Concord Railroad on the 8th inst. She pleaded not guilty, and was committed to prison in default of \$3,000 bail.

Minneapolis, Minn., July 12.—The proceedings in the Gordon case, at Fort Gary, have developed facts which materially change the complexion of affairs. It has been all along understood that the American party was arrested by the Manitoba officers on British soil, but the evidence proves that the arrest was made south of the line, located by the new boundary survey. It is expected that friends of the prisoners will at once apply to the American authorities to demand their release by the Manitoba Government.

Washington, July 12.—Six Treasury officials, under the direction of Colonel Jones, departed for San Francisco on Monday with currency, for which they will bring back gold.

Upon the question made by President Orton, of the Western Union Telegraph Company, the Attorney General has decided that upon lines of telegraph operating under act of July 24, 1866, officers and agents of the different Departments of the Government may telegraph to each other upon official business at rates fixed by the Postmaster General.

The Internal Revenue Bureau has been advised that upon the opening of Congress a combination of whisky distillers and railroad men will begin war upon it. The complaint of the railroad men is that the Bureau instituted a suit against them for the payment of the taxes assessed upon stock dividends; while the grievance of the distillers is that Commissioner Douglass insisted upon rigorous enforcement of the law which imposes a penalty of one per cent. on all taxes not paid at maturity.

Advices from Eagle Pass to July 26 state that upon the 22d a detachment of 40 men of the Fourth Cavalry, from Camp Shafter, while scouting for cattle thieves, struck a fresh trail which they followed to the Rio Grande. They captured one Mexican thief, who had not crossed the river; then crossed themselves, and captured a herd of 80 cattle, which had been stolen from various Texas ranchers, and the man in charge.

Frank Taylor, the well-known bookseller, died this afternoon, of apoplexy.

Halifax, July 12.—The only statement Capt. Phillips has made was to Captain Beau, and was to the effect that he could only account for the accident by the compasses being out of order. He had not obtained an observation that he could rely on during the whole voyage, and therefore

could not correct the deviation and lost the attraction of the compasses. He saw nothing to indicate a change in the water till the ship struck. He thought when the steamer first touched ground that she was on the south side of George's shoal. He got his boat down and went on shore to ascertain his exact position, and see if he could land the passengers. Pilots were then procured, who aided the officers and crew in taking the passengers off, which was speedily and successfully done.

Grand Rapids, Mich., July 13.—At 3 on this day this city was visited by another terrible fire, which broke out near the Bridge Street House, and was soon beyond control. The fire spread in all directions, consuming everything in its way from Bridge street to Trowbridge street, and from Canal to Division, except the buildings fronting south on Bridge street and west on Canal street and Bokey. At least 20 acres of ground were burned over and 200 buildings destroyed. The loss is not less than \$300,000.

Albany, July 13.—A fire in Greenbush, opposite Albany, this evening, destroyed 24 dwellings on Broadway, Columbia, and Academy streets. Loss estimated at about \$150,000. A boy named Brodt was burned to death.

New York, July 14.—The coroner's jury have found that Charles Goodrich came to his death by pistol shot wounds inflicted by Lizzie Lloyd King alias Kate Stoddard.

In Cheshire, Conn., on the 12th inst. Michael Higgins, a farm laborer, stabbed John O'Neil in the abdomen from the effects of which he died. Search for Higgins resulted in the discovery of his dead body in a room in the farm house. It is supposed he died from heart disease, superinduced by excitement.

The police found, on the 13th, in the house No. 135 East 87th street, the decomposed body of Charlotte Willal, aged 55 years, who had occupied the house alone, and had not been seen for several weeks. When the body was found it was half eaten by rats, which swarmed the room.

Washington, July 14.—The following statement is based on information from official sources: The accounts of General Howard and his officers show a deficiency of \$11,000, though only a small portion is in the name of Howard. He adds that he has a balance of \$6,000, which he is ready to pay over to the proper officers. Nearly one-half of the deficit is charged to the accounts of a subordinate formerly on duty in the West. Letters have been received from colored men who served in the army and navy stating that they never received their bounty, though in some cases the accounts show to the contrary. It will require an investigation to ascertain whether forged entries have to undergo further examination by the Collectors, and their figures may be changed either for or against Howard should those officers differ from others in the construction of the various laws bearing upon the subject. All agree that there has been some dishonesty on the part of subordinates, though it is not believed the defalcation will amount to as much as is generally supposed.

EUROPEAN.

Paris, July 14.—President MacMahon, in conversation with a correspondent, says: "The real government of the country is now vested in a Ministry, and I am firmly convinced that the only change which they will introduce into the Republic will be to carry out the program which the late Government proved itself incapable of doing. We are not impolitic enough to take steps similar to those taken by the Empire, but everything that can be done to insure the Pope's safety and the necessary liberties of all shall be done. It is directly against the interests of Italy to expel the Pope from his dominions, for were he obliged to take refuge in a foreign country the Catholics of all the world would unite in crying shame against Italy, and public opinion would be against the Italian Government to such an extent that not only would our interference become compulsory, but might become the signal for a European war from which Italy has little to hope and everything to fear."

London, July 14.—A heavy rain storm, accompanied by lightning, swept over Yorkshire yesterday. The crops were greatly damaged and several persons killed.

British revenue returns for quarter just ended show a falling off in receipts from postal telegraph at the rate of £82,000 below the estimates of the Department for the current year.

On the 12th, everything passed off quietly in Londonderry and Belfast, and there was no disturbance in Dublin.

Slight shocks of earthquake were felt on the 12th of Rome and other places in Italy.

Madrid, July 14.—The successes of the Carlists and the outbreak and atrocities at Alcoy have awakened strong feeling against the insurgents. War meetings are held in the provinces. At Barcelona a large meeting was held last night.

Berlin, July 15.—Rinderpest is so general and destructive among herds in Russia that German authorities have prohibited all importations from Russian ports.

Madrid, July 14.—The insurgents in Carthage are masters of the entire

town, with the exception of the arsenal, and it is feared the latter cannot hold out much longer, and with the ships in the docks, will fall into the hands of the insurgents.

Details of the recent disorders in Alcoy show that while the rioters held the city ten houses were burned and fifty persons killed and many wounded.

MODERN JERUSALEM.—One is sure to be disappointed first entering the interior of Jerusalem. The filth will surprise and annoy him. One who comes to Jerusalem from Egypt can endure a good deal in this direction, but even he will have attained to a high degree of equanimity if he does not occasionally lose his temper amid the superabounding filth of this city; and, what is worse, it seems to gather most about the most sacred places. You cannot with any comfort approach through the old bazaar of the cotton merchants—what was doubtless the "Beautiful Gate" of the temple—without holding your breath. The Mohammedans, while guarding with keenest vigilance the sacred enclosure from the pollution of infidel feet, seem quite regardless of the intrusion of filth. Yet it must be confessed that the Jewish quarter of the city is quite as unclean as any part of it; and it often gives one relief, when traversing these these dirty streets, to think that the Jerusalem of the Bible lies half a hundred feet or more beneath the present surface.

The New York Tribune has undertaken to enlighten the public in its financial columns touching the sale of the Central Pacific railroad. Its version is as follows:

Some of the city journals stated this morning, (June the 28th) that Mr. Huntington and one or two other gentlemen prominently connected with the Central Pacific Railroad Company had sold out their interest in the Company, and were about to retire from the direction. We learn from excellent authority that the statement is erroneous; that the gentlemen in question have no thought of severing their connection with the management of the road, and, while as yet nothing has been actually done in the way of changing the management of this important railway, negotiations are on foot which may result in adding to the direction Messrs. D. O. Mills, William Sharon, Michael Reese and A. A. Cohen, four of the most prominent capitalists on the Pacific coast, whose influence and energy would greatly add to the strength of this already strong enterprise. We notice that at the close to-day 103 and a fraction was bid for the first mortgage bonds of this Company, which is not surprising in view of the fact their semi-annual 3 per cent. coupons mature in July.

AGASSIZ ON DEVELOPMENT.—In the recent series of lectures on embryological development, Prof. Agassiz declared the development theory of Darwin a daring assumption. He declared that many of the lower animals were introduced under more highly organized forms than they have ever shown since, and have dwindled afterward. The following is one of his more explicit declarations:

I believe that all these correspondences between the different aspects of animal life are the manifestations of mind acting consciously with intention toward one object from beginning to end. This view is in accordance with the working of our minds; it is an indistinctive recognition of a mental power with which our own is akin, manifesting itself in nature. For this reason more than any other, perhaps, do I hold that this world of ours is not the result of the action of unconscious organic forces, but the work of an intelligent, conscious power.

LIGHTNING AND POTENTIAL ENERGY.—Says Nature, the English scientific authority: A correspondent puts the following case: A strong man is struck suddenly dead by lightning. What has become of the potential energy he possessed the instant before he was struck? To this we have received the following reply: His potential energy would be where it was before, viz., within the space bounded by his external service. What the lightning has done has been to destroy the mechanism for realizing that potential energy. A small portion of the man's potential energy might have been converted into actual energy by the lightning as, for instance, in the shape of heat; but the great bulk would be got by anybody who chose to eat his body!

In prosperity we need moderation; in adversity, patience.
