

TO THE PUBLIC.

THE PAIN-KILLER manufactured by PERRY DAVIS & SON has won for itself a reputation unsurpassed in the history of medicine. The demand for the Pain-Killer is a novel, interesting, and surprising feature in the history of this medicine. The Pain-Killer is now regularly sold in large and steadily increasing quantities, not only to general agents in every State and Territory of the Union, and every Province in British America, but to Buenos Ayres, Brazil, Uruguay, and other South American States, to the Sandwich Islands, to Cuba and other West India Islands, to England and Continental Europe, to Mesopotamia, Madagascar, Senegal and other African lands, to Australia and California, to Hong Kong and other places in India. It has also been sent to China, and we doubt if there is any foreign port or any island city in Africa or Asia, which is frequented by American and European missionaries, travelers or traders, into which the Pain-Killer has not been introduced.

The extent of its usefulness is another great feature of this remarkable medicine. It is not only the best thing ever known, as everybody will confess, for bruises, cuts, burns, &c., but for dysentery, cholera, or any sort of bowel complaint, it is a remedy unsurpassed for efficiency and rapidity of action. In the great cities of British India and the West India Islands and other hot climates, it has become the standard medicine for all such complaints, as well as dyspepsia, liver complaints, and other kindred disorders. For coughs and colds, croup, asthma, and rheumatic difficulties it has been proved by the most abundant and convincing trials and testimony, to be an invaluable medicine. The proprietors are in possession of letters from persons of the highest character and responsibility, testifying in unequivocal terms to the cures effected and the satisfactory results produced, in an endless variety of cases by the use of this great medicine. That the Pain-Killer is deserving all its proprietors claim for it is amply proved by the unparalleled popularity it has attained. It is a sure and effective remedy. It is sold in almost every country in the world, and is becoming more and more popular every year. Its healing properties have been fully tested all over the world, and it need only to be known to be prized.

Sold by all Druggists.

APPLETON'S AMERICAN CYCLOPAEDIA.

New Revised Edition. Entirely rewritten by the ablest writers on every subject. Printed from new type, and illustrated with several thousand engravings and maps.

The work originally published under the title of THE NEW AMERICAN CYCLOPAEDIA was completed in 1863, since which time the world has changed, and has attained in all parts of the United States, and the signal developments which have taken place in every branch of science, literature, and art, have induced the editors and publishers to make a new edition, and to issue a new edition, entitled THE AMERICAN CYCLOPAEDIA.

Within the last ten years the progress of discovery in every department of knowledge has made a new work of reference an imperative want. The improvement of political affairs has kept pace with the discovery of science, and their fruitful application to the industrial and useful arts and the consequent advancement of social life. Great wars and consequent revolutions have occurred, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the Cyclopaedia was published, has been ended, and a new course of commercial and industrial activity has been commenced.

Largely according to our geographical knowledge has been made by the innumerable explorations of Africa. The great political revolutions of the last decade, with the natural result of the lapse of time, have brought into play a multitude of new facts, whose names are in every one's mouth, and of whose lives every one is anxious to know the particulars. Great battles have been fought and important sieges maintained, of which the details are as yet preserved only in the newspapers, or in the transient publications of the day, but which ought now to take their place in permanent and authentic history.

In preparing the present edition, the editors have accordingly taken care to bring the work up to the latest information to the latest possible date, and to furnish an accurate account of the most recent discovery in science, of every fresh product of human industry, and of the newest inventions in the practical arts, as well as to give a succinct and original record of the progress of political and historical events.

The work has been begun after long and careful preliminary labor, and with the most ample preparation for carrying it on to a successful termination. None of the original stereotype plates have been used, but every page has been printed on new type, forming in fact a new Cyclopaedia, with the same plan and compass as its predecessor, but with a far greater pecuniary expenditure, and with such improvements in its composition as have been suggested by longer experience and enlarged knowledge.

The illustrations which are introduced for the first time in the present edition have been added not for the sake of pictorial effect, but to give greater facility and force to the explanations in the text. They embrace all branches of science and of natural history, and depict the most famous and remarkable features of scenery, architecture, and art, as well as the various processes of manufacturing and mechanical operations. Intended for instruction rather than embellishment, no pains have been spared to insure their artistic excellence; the cost of their execution is enormous, and it is believed they will and a welcome reception, as an inimitable feature of the Cyclopaedia, and a worthy of its high character.

The work is sold to subscribers only, payable on delivery of each volume. It will be completed in sixteen large octavo volumes, each containing about 500 pages, fully illustrated with several thousand Wood Engravings, and with numerous colored Lithographic Maps.

Price and Style of Binding.

In extra cloth, per vol. \$3.50
In Library Leather, per vol. 5.00
