THE MARKETS.

San Francisco Market.

[BY TELEGRAPH.]

San Francisco, May 2.

Wheat—There is a large addition to the receipts of last week's crop at $1 (not 15, below all other choice, $1 92½@1 95 for shipping, $1 95.

Barley—Feed, $1 60@1 70 for choice, $1 75@1 85.

Oats—Light feed, $1 52½. Good Oregon, $1 80, better none to market.

Dairy Products—Fresh Roll Butter fully 2c @ 3c higher than it was a week ago; best fresh roll Butter 30c, from that down to the California Cheese, 20@25c; Eastern, 20@25c; Oregon, 22½c are taken at Cals. California cheese, are in better demand for consumption, and the price is firm at 15@16c.

Wool—We take the following from the San Francisco Commercial Herald of April 29th:

"The receipts for the week exceed 1,000 bales, mostly accumulated middle in the various packing warehouses. Eastern buyers are, however, here in good force, and we hope for a continuance of present rates. Sales for the week approximate 2,000,000 lbs, say 1,000 lbs fall clip, 1850; 250,000 lbs southern spring fleece, within the range of 30@35c. A private circular, shown to us yesterday, says: 'Receipts for the past 48 hours aggregate 5,000 bales, mostly from San Joaquin Valley and southern ports. Buyers are operating very freely, and the bulk of the receipts find purchasers soon after arrival. We note one or two additional Eastern Wool sold in market since our last issue, which made strength, and hopes are entertained that the market will continue active at satisfactory prices during the season. A report circulates that London sales open somewhat in favor, but such reports need authenticity. At least, they have not affected our home market. Sales for the week and up very large—say 750,000 lbs, at the following rates: 22@25c for ordinary conditioned short coarse burry; 25@27c for better grades and for choice fleeces; 27@28c per pound of staple. Fancy parcels might bring 30c in the extreme case for choicest clips.' And their circular of late date says: 'Receipts of Wool to date are 12,081 bales, against 9,000 bales in 1873. The market continues active, and Wool is selling freely at satisfactory prices, especially for long stapled fine fleeces, some extra lots having sold as high as 32c. Fine Wools of good average length sell at staple, according to quality and condition. Long stapled, light, slightly burry Wools are in demand at from 18@22c. In Eastern markets there is no change for the better from a month ago."

CROP PROSPECTS IN CALIFORNIA.—The S. F. Commercial Herald, April 30th, says: "The weather continues propitious for the growing crops, and everything looks promising. There seems to be but one section in the whole State where the wheat looks unpromising, and that is on the west side of the San Joaquin, at Bantas Station, where the plant seems to be more or less shrivelled, by reason of dry moth winds upon poorly-prepared ground—too much surface plowing rather than deep cultivation."

HOPS.—The S. F. Com. Herald, April 30th, has the following: "We have no market here at present. Stock light, and the dealers feeding the brewers with a bale or two at a time—price nominal. In New York, April 30th, Hamer Wells's Circular says: Market weak and declining. Prices irregular and unsettled. 30c is now the outside cash price for the best. Hops to market, except Californians, coming in parcels of which being 180."

WHEAT in Liverpool—Average California, 10s 8d@10s 10d; Oregon, 10s 10d.

1856. 1874.

KNAPP, BURRELL & CO.,

OFFER FOR

The Harvest of 1874,

THE FOLLOWING

FARM IMPLEMENTS and MACHINES.

Champion Reaper and Mower—The Prize Machine of the World and now heads the largest sale of any Reaper made. We have secured the agency of this celebrated Reaper and Mower and can recommend it as being unexcelled as a Combined Machine. Before buying don't fail to send for circulars describing the "Champion," and carefully note the many advantages it possesses.

Dodge's Reaper and Mower.—"Ohio" and "Buckeye" patents combined, with Dodge's improvement; two Nos. 1 and 2 and are *Supported* for 1874, is one of the best Self-Rakers in the world. Can be set to *cut higher from the ground* than any other Machine. Send for Circular entitled "Twenty Reasons why Farmers should buy the Dodge."

Excelsior Reaper and Mower.—The *cheapest* and best "Dropper" and Hand-Raker; has *four* grain wheels and the new "Adjustable Reel."

McCormick's Reaper and Mower—Hand Raker—extra strong and durable. *Prices low.*

Buckeye Mower and Reaper and Mower—Ours are "GENUINE," made by *Aultman, Miller & Co.*, the originators and owners of the Buckeye patents.

Marsh Harvester.—*Desirable* and *economical* way of harvesting grain. Binders ride. Many prefer them to Headers or Reapers. *Prices reduced.* Send for Descriptive Circular.

Haines' Header or Harvester—With Hodges' improvements and other additions for 1874. Two sizes, ten and twelve feet cut. Our Headers are made in *Peoria, Illinois*, and are the most approved style and make. Look out for "*similar makes*" with *pretended* improvements, that must be odored.

Clipper Mower—Four sizes. Combines MOST *desirable features* that can be found in any Mower. Nos. 3 and 4 are more particularly recommended for *heavy wood* and *rough dirt sits*, the No. 2 being lighter and not as strong as the *larger sizes*. Descriptive Circulars furnished.

Sprague Iron Mower—A *model of simplicity and perfection of mechanism*, and is THE *best two-horse* machine yet introduced; is *strong* and *durable* and unquestionably THE BEST *moderate priced* mower in the market. Send for a Sprague pamphlet, and examine into the merits of the new Mower, which has created such a stir in the East.

Pitt's Improved "Challenger" Thresher—More *improvements* and *additions* for 1874 in both Separators and Powers. Want of space forbids enumerating. Is now recognized as "*the leading* Thresher, and stands far ahead of the "*Wonderful of the Heavens*" in the estimation of the Threshing public. GUARANTEED to *separate better* and *clean better*, without *cracking* or *waste* of grain, than *any other Thresher Inside*. Particular attention is called to the "*golden* ENDSHAKE" SHOE, and *new* improvements in the "*Mounted*" *Powers*, etc., etc. Threshermen who have not seen the *changes* and *improvements* made in the "Pitt's" Buffalo Thresher during the last two years, will *consult their own interest* by looking at the "CHALLENGER" before buying elsewhere. All sizes, from 4 to 12 horse power.

Endless Chain Threshers.—Wheeler, Melick & Co.'s two sizes, with *special* improvements not to be found elsewhere.

Horse Powers—All sizes and styles, including the "*new model*" Pitt's, both "Mounted" and "Down." *No farmer* who has once used a Mounted will buy a "Down" Power.

Taylor's Easy Rake—Superior to any other Rake yet introduced. Very desirable for mowing wheat fields as well as raking hay. Have had them made *expressly* "to order," *stronger* and *lighter* than can be found elsewhere.

Revolving Rakes 8 and 10 feet long, also the

Barnes Rake—Nine feet long, *mounted on "runners,"*—new tripping device—is much THE BEST Revolving Rake made.

Horse Hay-Forks—The "Belle" Harpoon, which is unquestionably "THE BEST"; also "Walkers" and Palmer's.

Feed Mills—Clark's "Double Shake" Pacific Mill. The only Mill that will *separate Oats* from Wheat *perfectly*.

Churns—"Blanchard's," the *best in the world*, also the Cylinder and Thermometer.

Wagons—We have both the "PACIFIC" and the "BAIN," with "NEW PATTERN," *extra strong and heavy Timbers*. Wheels soaked in BOILING OIL, and other improvements for 1874. Guaranteed to *outwear* and to *wear* any other wagon in this market.

Spring Wagons—We are importing a new style Ohio-made Spring Wagon, complete with 2 seats, brake, &c., which we can sell less than the same quality of wagon can be bought for elsewhere.

ALSO,

Harvesting Tools,
Repairs for Machines,
Sickle Sections,
Rubber & Leather Belting,
Turbine Water Wheels,
Mill Stones,
Smut Machines,
Steam Engines,
Planing Machines,
Buggies, Carriages, etc., etc.

We import only the BEST articles, and our prices will at all times be as low as the lowest.

Liberal terms to the trade. Manufacturers Descriptive Circulars mailed on application.

Harrow and Clod-Breaker.

THE Harrow and Clod-Breaker combined, invented by the undersigned, is the best machine ever used for pulverizing the soil. It harrows the ground and so thoroughly breaks all the clods as to leave the soil so fine and loose that it is in the best condition for receiving the grain sown. Many of the most distinguished farmers of Oregon have used it upon their farms, and have cordially added their testimony to its great value. It needs to be only seen by the practical agriculturist to be appreciated. It is being manufactured at the Plow Factory of the Capital Lumbering Company in Salem, where it may be had for the very

LOW PRICE OF $15.

The inventor will also be found at all times at the office of J. QUINN THORNTON, up stairs, at the corner of State and Commercial sts., in Durbin's building, Salem, where he will sell Farm Rights, County Rights, and single Machines.

Farmers, please patronize home inventions and home-manufactured agricultural implements.

TELEGRAPHIC.

EASTERN.

WASHINGTON, May 3.—The report of the Select Committee on Transportation Routes to the Seaboard, recently presented to the Senate, makes a strong recommendation in favor of Government aid for the following improvements on the Pacific Coast: First, an appropriation at the present session of Congress for a survey and estimate for a canal and lock at the Cascades and the Dalles; also, further appropriations for the improvement of the Columbia and Willamette rivers. Second, aid in the construction of two railroads running to the Eastern States. The latter reference is understood to be to the Portland, Dalles and Salt Lake Railroad and the Northern Pacific.

Senator Mitchell made an argument yesterday before the Committee on Public Lands in favor of his bill in aid of the extension of the Oregon Central Railroad from St. Jo, its present terminus, to some point on the line of the Oregon and California Railroad, not further south than Eugene City, nor further north than Junction City. A favorable report was confidentially expressed.

WASHINGTON, May 4.—The bill reported by Senator Kelly to-day, relative to the Portland, Dalles and Salt Lake Railroad, provides that the government shall guarantee to pay 5per cent. interest on bonds of the company to the extent of $8,000 per mile for 10 years, for any distance not exceeding 700 miles, in return for which the company are to transport United States mails, army and Indian supplies, etc., forever, free of charge. The committee's writen report accompanying the bill shows that the mail and army service which this road would directly supercede, costs the Government $341,700 per annum; that the Government outlay for interest on the company's bonds would amount to $280,000 per year for ten years only, and that the Government would in 20 years thus save by by the construction of this road some $4,000,000; the report therefore argues that aside from the vast benefits of a general nature to the country, it is a great pecuniary advantage to the Government.

WASHINGTON, May 5.—The Senate Finance Committee, by a majority vote, agree to recommend the following provisions in the House Finance Bill: To fix the maximum of greenback circulation at $382,000,000, and to issue $351,000,000 of new National Bank Notes, retiring for each million of such issue half a million of greenbacks, until the total greenback circulation is reduced to $300,000,000, and January 1, 1877, as the date for the resumption of specie payment.

PITTSBURG, PA., May 3.—The confession of Mintzing, the murderer of the Hammet family shows the assassination to have been one of the most horrible and cold-blooded in the annals of crime. The first victim was Hammet, whose head was cloven by a blow from an axe while his back was to the murderer. Then Mrs. Hammet came into the room, attracted by the noise, and the villain struck her twice, killing her. He next sought and killed an adopted boy with whom he had slept during his stay at Hammet's, and with fiendish thirst for blood, killed two little children who were too young to have exposed the wretch's guilt; then robbing the house of valuables, he set fire to it and fled.

AUGUSTA, May 3.—Ann Hunt was hanged at Elberton yesterday, for having poisoned Eliza Browner.

ST. LOUIS, May 4.—A special dispatch to the *Democrat* says Judge Searles and Bennett of the Supreme Court were arrested on their arrival by the Memphis train at Argenta, opposite Little Rock, by Captain Williams, acting under orders of Governor Baxter. The Judges refused to be arrested without proper authority. Williams thereupon forcibly arrested them. Judge Stephenson, of the same Court, was also on the train, but Williams appeared ignorant of the fact.

LITTLE ROCK, May 4.—The capture of the Supreme Court Judges last night, by a band of armed men, is charged by Brooks men to Baxter's adherents, and by the latter to Brooksites. The whereabouts of the Judges is still unknown. There is a report of another battle between King White's forces and a party of Brooksites. The city is full of warlike rumors that Brooks is about to to attack Baxter, and vice versa. United States troops occupy the old position between the beligerents.

LITTLE ROCK, May 5.—United States troops formed a line across Markham street several times last night, to prevent Baxter from advancing against Brooks.

Chief Justice McClure had a writ served on Generals Churchill and Blake to-day, commanding them to produce the bodies of Judges Bennett and Searle. The officers replied that martial law prevailed now in Pulaski county, and they knew no orders except from their military superiors.

Some days since Baxter sent to St. Louis for a duplicate State seal, which was yesterday forwarded, but this morning, before the express agent could deliver it, a squad of Brooks' men entered the office and captured it.

The *Gazette*, Baxter's organ, has a special from Pine Bluffs reporting a large meeting approving Baxter and denouncing Brooks. A dispatch from Helena states that J. T. White, ex Senator (colored), addressed a meeting, chiefly composed of colored persons, advising them to preserve neutral ground and leave the decision of the question to legislation.

CHICAGO, May 6.—A meeting of the Advisory Board of the State Farmers Association was held at Bloomington yesterday, 52 of the 102 counties in the State being represented. It was decided by a nearly unanimous vote to organize a political party independent of existing organizations, and to call a State Convention, to meet at Bloomington May 27th, to forward such action.

FOREIGN.

LONDON, May 4.—In the House of Lords to-day, Lord Russell, in view of the embittered feeling between France and Germany, moved that copies of correspondence with these Powers be called for, and asking what course the British Governments would take in event of rupture between them. Derby believed that peace for the immediate future was safe, and he trusted that England would do everything to maintain peace short of embroiling herself in a struggle. Russell withdrew his motion calling for papers on the Oregon boundary and Fenian raid questions. He said that the British people felt that the honor of England had been touched in the Washington treaty negotiation, the National character lowered and National interests jeopardized.

MADRID, May 4.—Serrano entered Bilboa Saturday. The municipality have sent congratulatory dispatches to Serrano. Dispatches from Bilboa state that small parties of Carlists are surrendering, in hope of amnesty.

LONDON, May 5.—Intelligence from Fiji states that the King and people are unanimously in favor of the cession of the Island to Great Britian.

PACIFIC COAST.

SAN FRANCISCO, May 6.—Mary C. Nickerson, second daughter of Capt. Nickerson, of Gen. Crook's staff, died at San Rafael to-day.

A large number of people visited Woodward's Gardens to-day to see Donald McKay and his band of Warm Spring scouts. On account of the storm they gave no performance.
