Harrow and Clod-Breaker.

THE Harrow and Clod-Breaker combined, invented by the undersigned, is the best machine ever used for pulverizing the soil.

It harrows the ground and so thoroughly breaks all the clods as to leave the soil fine and loose, so that it is in the best condition for receiving the grain sown.

Many of the most distinguished farmers of Oregon have used it upon their farms, and have cordially added their testimony to its great value.

It needs to be only seen by the practical agriculturist to be appreciated. It is being manufactured at the Harrow Factory of the Capital Lumbering Company in Salem, where it may be had for the very

LOW PRICE OF \$45. The inventor will also be found at all times at the office of J. G. INN THORNTON, up stairs, at the corner of State and Commercial sts., in Durbin's building, Salem, where he will sell Farm Rights, County Rights, and single Machines.
