

CENTAUR LINIMENTS.

One kind for the Human Family. The other for Horses and Animals.

These Liniments are simply the wonder of the world. Their effects are little less than marvellous.

THE WHITE LINIMENT is for the human family. It will drive Rheumatism, Sciatica and Neuralgia from the system; cures Lumbago, Chillsblains, Lock Jaw, Palsy, Itch and most Cutaneous Eruptions; it extracts frost from frozen hands or feet, and the poison of bites and stings of venomous reptiles; it subdues swellings, and alleviates pain of every kind.

THE YELLOW CENTAUR LINIMENT is adapted to the tough muscles, cords and flesh of horses and animals. It has performed more wonderful cures, in three years, of Spavin, Strain, Wind-galls, Struck-shin, Sweeney, and general Lameness, than all other remedies in existence.

ITCHER'S CASTORIA is a complete substitute for Castor Oil, and is as pleasant to take as Honey. It is particularly adapted to Teething and Irritable children.

LUIGI'S BELL, SUCCESSOR TO J. M. KEELER & CO., 95 LIBERTY ST., NEW YORK, Commission Agent.

ATTENTION SHEEPGROWERS! POLIC SHEEP DIP MANUFACTURED BY MALLINCKRODT & CO. ST. LOUIS, MO.

A SURE CURE FOR Scab, Screw Worm, Foot Rot, AND ALL Parasites that infest Sheep.

Improves the Health OF THE ANIMAL, AND THE QUALITY OF THE WOOL.

T. A. DAVIS & Co., PORTLAND, OREGON, Wholesale Agents for the State.

Mrs. Rohrer's New Remedy FOR THE LUNGS IS MEETING WITH WONDERFUL SUCCESS! THIS PURELY VEGETABLE REMEDY HAS no equal in the relief and cure of Coughs, Colds, Asthma, Bronchitis, Croup, Whooping Cough, Measles, &c.

"EVE'S GRANDDAUGHTERS."—Mary Clemmer, in a late letter to the Independent, writes of the new mistress of the White House as follows: She has a singularly and gentle and winning face. It looks out from the bands of a smooth dark hair with that tender light in the eyes which we have come to associate always with the Madonna.

THE WAY TO HARDEN BUTTER.—An English butter-maker of large experience, who is now on a visit to the United States for the purpose of looking over the cheese and butter dairies, gives us the following information concerning a method in practice among the best butter-makers in England for rendering butter firm and solid during hot weather.

ABOUT MOLES.—A correspondent of the Rural Sun gives the following method of destroying moles: "Collect a number of earth worms, kill them and mix them up with a lot of powdered nux vomica; let this mixture stand about 24 hours in a heap; then take the worms and place one or more of them here and there in the holes or tracks of the moles, and mark where you place them, and examine there in a day or two and you will find more dead moles than you do worms.

A LAND FULL OF GOLD AND SILVER.—A correspondent of the London Times writing from Alexandria, informs the public that Cap. Burton, the African traveler, has made a "find" of personal interest.

THE CHAMPION LIAR.—A Detroiter declared in the presence of a dozen passengers on a Woodward avenue car that he had seen forty-seven feet of snow at one time in Omaha, burying up a town, that the snow was dug out, and under the crust the trees blossomed and boys went in swimming, the same as in July.

full of metals especially good silver and lead. It is more than probable that Solomon's Ophir was situated there, as the small ships in which he imported gold, ivory, and peacocks were launched at the head of the Red Sea.

Proceedings of the Salem Teachers' Association, held at the Central School Building, 4140 P. M., June 11, 1877.

The Association was called to order promptly by the President. The Secretary being absent, Mr. X. N. Steeves was appointed to fill the place. The roll was called, and eight members responded to their names. Miss Mattie Powell was appointed special critic.

Mr. L. G. Adair brought up many interesting points. She would begin teaching words that children could understand, not necessarily short words, but such as could be put together in sentences.

Mr. Gregg was the fourth speaker. Subject—Orthopy. Mr. Gregg contended that this subject should receive much attention in the lower grades. Explained articulation, syllabification and accent; and showed how necessary a knowledge of the rules of each was to the learner.

Misses Taylor and Powell and Messrs. Gregg and Randle took part in the general discussion. As the election of officers and other irregular business comes before the Association, and will occupy the whole time of the next meeting, the 9th 10th and 11th items in the order of business, were omitted.

Under unfinished business the Secretary read the minutes of the previous meeting, and they were approved. Miss Adair was absent on account of sickness in family.

WEST VIRGINIA has the largest and most valuable body of timber of any state in the Union. Prof. Fontaine estimates that the area still covered by forests is between 9,000,000 and 10,000,000 acres, and that the value of the surplus exportable timber is fully \$75,000,000 as it stands in the forests.

THE TURKS confirm the report that the Turks suffered a severe defeat in Saturday's battle. The engagement commenced at six in the morning and lasted till 10:00.

BY TELEGRAPH.

Great Fire at St. Johns, New Brunswick! 15,000 People Homeless!

St. Johns, N. B., June 21.—This morning, at 2:30 o'clock, a fire broke out in McLoughlin's boiler shop, Portland street. A strong northerly wind was blowing, and in an incredibly short space of time the flames burst out, carrying with them hundreds of houses, stores, and lumber yards.

St. Johns, June 21.—Yesterday was the most calamitous day ever known in the annals of St. Johns. Nothing could have come more suddenly than the fire which destroyed so many valuable lives, wasted property by millions, arrested many and varied forms of industry and spread not only desolation but terror and consternation all around.

New York, June 21.—A Portland, Me., private dispatch from St. Johns, at p. m., says: "After careful estimate, it has been decided that fully half the city is destroyed. Women and children are on the streets crying for bread, and the scene beggars description."

New York, June 21.—A heavy thunderstorm prevailed yesterday throughout the Northern States. Reports of disaster come from all directions—houses and churches unroofed, fruit trees destroyed, and in some instances human life lost.

New York, June 21.—Secretary of State Rigelow, to-day, in defense of Mr. Fairchild's action in the case of Tweed, said that while the statement was under consideration information reached the Attorney General Tweed has to his credit in Europe two million dollars, and that he is only waiting to secure his discharge to rein in his confederates to embark with them in a large street railway speculation in Madrid.

FOREIGN.

St. Petersburg, June 21.—A Constantinople dispatch asserts that Layard, British ambassador, has counseled the Sultan to make peace immediately. All the ministers, except Redif Pasha, minister of war, were in favor of peace.

London, June 21.—A special from Dehba confirms the report that the Turks suffered a severe defeat in Saturday's battle. The engagement commenced at six in the morning and lasted till 10:00.

Chicago, June 21.—The Tribune's special from London says the cabinet has apparently made temporary but not unchangeable decision after daily meetings for over a fortnight. Where serious divisions existed among members it is now evident the war party has gained an important point in securing the occupation of Egypt, thus allowing England to preserve a pretense of neutrality yet manage to be ready for an emergency calling for active hostilities against Russia.

London, June 21.—In addition to the bridge constructed in front of Ibrail, which is from 700 to 800 yards in length, with an extension upon inundated Turkish territory, the Russians have built a large number of rafts which have been towed to-day into an arm of the stream, where the two monitors were sunk.

The Russians have constructed in all a thousand rafts, and pontoons, chiefly in the river Sobch, of which a large number are being used at Ibrail, but leaving enough for a bridge at Galatz also.

Constantinople, June 21.—Intelligence received to-day announces that Mukhtar Pasha has been engaged since Thursday with the Russian army at Takhod's between Kherson and Dellfaba. The battle was proceeding all day yesterday; result unknown.

London, June 21.—An Erzeroum dispatch confirms the report that Erzeroum has been recaptured by the Turks. The Russian garrisons were driven out and some made prisoners. It believed an engagement on a large scale between the Russian left and the Russian right is imminent.

Later from the Indian War. Lawrence, Thursday morning, 8 o'clock, June 21.—Five Davenport, John Bayard and two other men arrived from Mt. Idaho in night. They report that Mrs. Manuel and child, and George Woodard, had been murdered on Salmon river. Most of the remaining families are forced up at Slat Creek, and have a defense of about 40 able-bodied citizens.

The following dispatch was received at military headquarters yesterday morning from Gen. O. O. Howard: FORT LAPWAI, I. T., June 20—9:25 p. m. A message received from Col. Perry makes the loss 33, meaning exclusive of Lieut. Theller, whom Capt. Trimble placed, wounded, upon his horse. Theller was afterwards killed. The Florence people reported to having effectually blocked the Indian trail toward Little Salmon and Weiser. Reinforcements leave here Friday morning without fail. It is the worst possible country for us for Indian fighting.

A press dispatch from Boise City says:—The scene of the massacre is on Salmon river and tributaries of that stream, coming in from the northern side, draining Camas Prairie and the neighboring mountains. The settlement called Camas Prairie covers foothills to the north of Florence mountain, extending several miles northward into the plains which lie between Florence mountain and the breaking down of the table land called Craig's Mountain.

These few men are thus shut up in the midst of hostile Indians without adequate means of defense and without aid will certainly be overpowered and murdered, as the Indians declare their determination to take the fort and murder the men. It cannot be hoped the Indians will again spare the women and children after the losses they must sustain in capturing the fort, as the men will fight to the last. Our informant says he is reliably informed the Indians did not fire a single building or destroy any property, but cleaned the country of stock which they have driven to the south side of Salmon river. The Indians have now their principal camp and headquarters on Salmon river just below the mouth of a small stream called Shookum Chuck, while the stock is gathered and pastured on an extensive triangular shaped region formed by the Snake and Salmon rivers and the high mountain range lying about the forks of Payette and Weiser rivers. Here there is abundant pasture for summer and winter, and here they will doubtless make their final stand.

Each Improved. The Messenger of Monmouth, organ of the Christian Church in this State, comes to hand enlarged, and the title changed to Pacific Christian Messenger. It shows many signs of improvement, and under the direction of Bro. Stanley, is a faithful exponent of that church's principles and interests, and is deserving of a liberal support.

Hon. H. P. Bone, of this city, delivered the address before the graduating class of Philomath College last Wednesday evening.

WAKELEE'S PATENT Squirrel AND Gopher Exterminator! This is the Original Article—All Others are Inferior Imitations! Editors Rural Press: Dear Sirs—I have just made an experiment with prepared poison for killing squirrels, putting out a can of the following poisons: A can of Barney's, a can of Steele's and a can of the article called Wakelee's Exterminator. One can of Wakelee's kills as many as seven of Barney's Squirrel Poison; and as many as ten cans of Steele's Squirrel Poison. Thinking the result will be interesting to your readers, I send it for their benefit. Yours, very respectfully, S. P. WOODWARD. HAYWARD, April 8, 1876. In Purchasing care should be taken to order WAKELEE'S. WAKELEE'S SQUIRREL AND GOPHER EXTERMINATOR IS THE ONLY AGENT Successfully Used to Protect Standing Grain. The Best Medium for the Destruction of Gophers. Full Directions with each Can. WHOLESALE AGENTS FOR OREGON, T. A. DAVIS & CO., Portland. H. P. WAKELEE & CO., Importers of Drugs and Chemicals, AGENTS AND MANAGERS GOLDEN CITY CHEMICAL WORKS, Office, corner of Montgomery and Bush streets, SAN FRANCISCO.
