San Francisco Bulletin: Twenty years hence nearly all the breadstuffs for ex-port from the United States will be produced in the country west of the Rocky Mountains. Within a quarter of a cen-tury there will probably be ten states on this side of the Rocky mountains. These states will include an area of the most important mineral, wheat and lumber production. Every large and fertile valley will be made accessible by railroad, and every great belt of mines will be reached in the same way.
