Petroloum to be Utilized as Puel-A Discovcry of Unparaleled Importance to the Arts, that faithful servant, the ox. Manufactures and Navigation.

[Dispatch to the Circinnati Erquirer.]

New York, Cetober 2,-Mr. S. C. Salisbury, a mechanic, has been at work for twenty years on a plan to utilize petroleum for fuel in pro-ducing steam. He has hit it, and is in a fair told of an Arab horse which, when his mas way to make a fortune. It was tested in the loof, sought him out in the dark amidst Brooklyn Navy yard on Saturday, and was found to work to the utmost satisfaction of the officers who inspected it. The furnaces were in full blast, but no smoke was visible Great the control of the characted with the effort, fell down and the light the effort to the effort of the effort pipe, but no coal was thrown upon the fire below. It had the look of an effect without a present also in the brute creation. If nowhere else, we may find it in the brute

veteran engineer Sherwood said. "It revolu-tionizes the iron and steel manufacture the father-heart of the author and lover of all. world over, "It opens a new era in glass a holy affection, an extended humanity, manufacture. We shall soon have glass 100fs projection of the human heart by which we into our houses, and French plate will be as cheap as common window-glass," said a large city of God, as he with his wisdom and love

quickly produced, in the enormous pressure of the superheated steam, in the astonishing evaporation of water, in the freedom from dust, cinder, sulphur and all impurities, that these ex-

barrel to the furnace by means of a small gaspipe. At the end of this pipe as it enters into the door of the furnace is a funnel-shaped apparatus. As the fuel enters this funneliteomes in contact with a current of highly super-heated lier; Mr. Edward H. Knight, chevalier; Wr. W. Sterre chevalier. paratus. As the tuer enters that it with a current of highly super-heated lier; Mr. Edward H. K. Wm. W. Story, chevalier. leaves the machine. It induces the required amount of expert to enter and raise at the amount of oxygen to enter and mix at the point of ignition. Thus the atomized fuel shoots, Edison, photograph; Elisha Gray, telephone; in a faces but delicate array, into the blazing Brewster & Co., carriages; J. A. Bridgman, in a flerce but delicate spray, into the blazing furnace. The brick arches of the greatfurnaces furnace. The brick arches of the great furnaces are kept at a white heat, and a pure white flame flashes along the whole length, register-chevaliers in 1867, were made "officers" toing a heat of 5,000 degrees, meeting pig iron in ten minutes, and making liquid glass in two Commission, were also made chevaliers; hours instead of sixteen. All that there is to maintain this extraordanary heat is the slight spray darting in from the little furnace, just outside the door. "I can send this intense white flame from the Battery to Grace Church at the state of the superintendent of the educational section; D. M. Armstrong, superintendent of the Art gallery; Lieut, B. H. Buckingham, Naval Friday night last, in accordance with spray darting in from the little farnace, just if I have a furnace arch that long," said the in- attache. ventor.

The amazing scope of this new discovery may be estimated from its effect on the oil had none, as he knew of no rule by which trade alone. Mr. Salisbury says he is about to make a proposition to the producers and the United Pipe Lines for a permanent contract to take from them at Pittsburg all their surplus and all their distillate tar napthas at a price that will give the producers fully fifty per cent profit, and also pay the pipe lines for piping it to Pittsburg. The ocean steamship business will also feel the effect of this revolution in steam-producing fuel. Experiments already made show that in a single trip across the Atlantic a saving of about \$5,000 will be effected in Friedt room alone, as the space now taken steam-producing fuel. Experiments already in freight room alone, as the space now taken up for 800 tons of coal will be used for freight.

But the greatest achievements of the new system will be in iron-making. Said the leading representatives of this interest: "This is the grandest acheivement of science in this age, and this inventors income, even on very small Baker has been conducting a series of meetroyalties, will be greater than of any living ings in South Salem for three weeks past, capitalist. With the mechanism invented by which have been well attended and produc-Mr. Salisbury, a blasting furnace of thirty tons tive of much good in that part of the city. per day will convert its liquid iron into blooms.
