

NEW THIS WEEK.

"And the Leaves of the Tree were for the Healing of the Nations"

No more wonderful exhibition of the wisdom and power of the Creator can be given than the provision made for the curing of diseases by the use of those remedies which Nature furnishes in the roots, bark, leaves and berries of the common trees and shrubs which adorn our beautiful valleys and mountains.

COMMON PLANT!

With which every generation of inhabitants has been familiar! The latest discovery in this line is

The Oregon Kidney Tea!

A Vegetable Production which is Performing Wonderful Cures. It is a Specific for Pains in the Back, Non-Retention of Urine, Inflammation of the Bladder or Kidneys, Brick Dust Deposit in Urine, Leucorrhoea, Painful or Suppressed Menstruation

And all complaints arising from a diseased or debilitated state of the Kidneys or Urinary Organs of either sex. Many persons fear to take PATENT MEDICINES, as under cover of an unknown liquid may be hidden the most harmful of MINERAL POISONS, but the

OREGON KIDNEY TEA

Presents the Leaf in its Natural State!

And the Tea is made by the one using it, thus insuring its

ABSOLUTE PURITY AND FREEDOM FROM ANY INJURIOUS DRUGS!

It is found to very soon eradicate all the NOSTRUMS which are now SOLD IN BOTTLES. A single trial will convince anyone of its merit. Many persons mistake the pains arising from a diseased action of the Kidneys for Rheumatism, and by external applications fail to reach the seat of the disease.

The Oregon Kidney Tea has Cured Many Such Cases!

FULL DIRECTIONS IN ENGLISH AND GERMAN ARE ON EACH PACKAGE.

Read the following Testimonials from some of our most Respected Citizens:

Portland, Or., July 29, 1879. DR. W. HENLEY: Dear Sir: My kidneys were in a bad condition. The urine was like brick dust, and I suffered a great deal with my back. All remedies were unavailing until I tried the OREGON KIDNEY TEA, which gave me almost immediate relief. Yours truly, JOHN F. FARMER.

SOLD BY ALL DRUGGISTS AND DEALERS.

PRICE ONE DOLLAR.

State and Territorial.

Willamette Valley.

The Guard learns of the burning of a barn belonging to Mr. Montgomery, on the Long Tom, filled with hay, also five sets of harness and a grain cleaner. One man, who slept in the building, lost a \$50 watch, and narrowly escaped a horrible death.

The State Journal says: Dave Blanton, of Eugene, was waylaid by a couple of ruffians. Dave was very much intoxicated at the time, and for this reason was an easy prey. The men threw dust and sand in his eyes, and then dismounted him, taking from his pockets some \$300.

Harvest is now in full tide, says the Reporter. Every available man, beast and implement that can be of any service is employed, and still a scarcity is complained of. Many farmers have been compelled to delay their harvesting for several days yet for want of machines and help.

The Salem Talk says: G. W. Young, of Salem, is the inventor, and has the patent of a combination for padlocks which takes the lead of anything in that line we have ever seen. The combination is claimed by the inventor to be susceptible of 500,000 different changes.

While cleaning out the well at the rear of the barber shop, at McMinnville, a day or two ago, Mr. H. H. Welch and Grant Barnum made a raise of fifteen or twenty dollars in silver from among the accumulated trash. Some Chinaman that had used the well dropped a purse containing the money over a year ago.

The Minto pass trail is now open through to Eastern Oregon. The booths and Fair grounds are being put in order for the coming annual exhibition.

A. F. Johns, of Prospect Hill, south of Salem, got 92 bushels of wheat from two acres of ground.

The Statesman says: During the illness of Assessor Porter, Squire Johnson is superintending the making out of the assessment roll for the year 1879 for him. It will take about 10 days to complete the work.

E. M. Waite and John F. Miller, executive committee of the State Agricultural Society, state in a card that they will enforce the rules against allowing the buildings on the Fair grounds to be used for business purposes, and that the new pavilion cannot be used for dancing by excursionists next Sunday.

From the Astorian: The schooner Granger, from Astoria for San Francisco, put into Empire City on the 5th.

Expenses of Clatsop county for past twelve months, \$14,504; indebtedness, \$13,461; taxable property, \$1,159,811.

The Great Republic wrecking company have declared a dividend of 20 per cent. on the capital stock, payable in ten days.

The good ship Magnet is now ready for service again. Capt. Munson has made her better than ever before. She made her Klaskanin trip yesterday.

Pugot Sound. The Experiment says a large business has been done in the salmon fishing line at Tualip this season.

A fool separated himself from about \$600 of hard earned money, a few nights ago in Seattle. Cause, whisky.

The University at Seattle opened its Fall term with ninety students, which fact is a hopeful indication of what its future career is to be.

Another man was drowned a few days ago while en route to the Skagit mines by his canoe upsetting. His name was John Williams, and was an old settler on the Skagit.

The management of the Washington Territory Insane Hospital and the finances connected with it for the past two years has been highly creditable. New buildings have been erected and old ones repaired so that they are as good as new, costly water works erected, fences and out-buildings put up, all costing a large sum of money.

The Experiment says: The release of the railroad lands is having the effect to bring a large number of settlers into the Territory from California and Oregon.

With a bounty of \$5 for bears, cougars and wolves, and \$2 50 for wildcats, bear hunters are driving a paying business besides doing much to rid Washington Territory of a scourge to farmers.

Southern Oregon. Col. John E. Ross' mammoth four-year-old colt was weighed Wednesday and kicked the beam 1,580 pounds.

Douglas county is about to purchase a poor farm, or rather a farm on which to locate the county poor house.

Millers in Jackson county are now busily engaged in grinding the new crop, which seems to be quite heavy, considering the rust.

Millers are now offering 55 cents a bushel in Jackson county for wheat on thirty days' time, and 60 cents when six months' time is given.

The Parker boys, living on the road between Ashland and Linkville, killed a panther that measured ten feet from tip to tip last week.

The Tidings says: Emigrant wagons pass through Ashland every day. Most of them are bound northward, although occasionally one is seen heading southward.

Assessor Strange has completed the assessment of Douglas county, and returns the taxable property as amounting to \$2,100,000—a slight increase (\$20,000) over last year.

Another rich strike occurred at the Sugar Pine ledge on Galice creek last week, which promises to be of considerable extent. The vein is several inches wide and full of gold.

The Independent says: There has been a remarkable increase in individual indebtedness throughout the county, and in many instances the indebtedness of a number has doubled, and there is a still greater number of instances where the indebtedness has increased one-third in amount.

Capt. Ankeny, while at Sterling last week, let the contract for digging the extension of his ditch to a Chinese company at \$4 25 a rod, who took it quite low. This will bring the ditch to the place known as the Hayden & Cameron cut on Deming creek, and will then be in range of some of the very best mining ground he is possessed of.

The Linkville Jockey Club was organized on the 30th ult., with the following officers: Col. J. N. T. Miller, President; S. B. Cranston, Vice President; J. W. Hamaker, Secretary; Sikes Worden, Treasurer. The object of the club is to fit up and maintain a track, etc., for training and racing, and the membership fee has been placed at \$5.

A correspondent says that crops in Goose Lake valley are not so good as usual, and the grain yield will be lower than ever before. The stormy weather of the forepart of the season did much damage, but in all probability such a thing will not happen again for many years. Surprise valley, which usually yields a large surplus of grain, will barely harvest enough for its home use this year, and the same is true of Fall river and other valleys.

The house belonging to Brown's ferry, on Rogue river was entered by burglars who, while ransacking the same, aroused the man of the house. He seized a hatchet, with which he attempted to make a resistance. A de-

The Hillsboro Fair.

The Race Track—The Prospect This Year—Horses in Training, Etc.

Under invitation of the secretary of the Washington County Agricultural Society, we last Saturday went to Hillsboro and took a look through

THE SOCIETY GROUNDS.

The buildings are not all that can be desired; but Mr. Gault informs us that the society will next year build new booths and stalls, and make other necessary improvements, which will greatly add to the comfort of those attending. We do not wish to be understood as saying anything disparagingly of the society's buildings, as they are very good and will answer very well for this season. In fact all the stalls and booths are engaged.

The grounds of the society consist of nearly 60 acres of land. The leading feature of the Washington County Fair is its

DISPLAY OF FINE STOCK.

Consisting of horses, cattle, sheep and pigs. In this county one-fourth of all the thoroughbred stock can be found. The grain fields and orchards are to be seen on every side—even the distant hills are now enlivened here and there by an occasional yellow field—which shows where the industrious farmer has pushed his way into the mountains, turned the wilderness into a garden spot, stirred the soil, sowed the grain and now, as we write, is busy with an abundant harvest. Surely our Oregon farmers are blessed in having such a productive soil, from which, with little exertion, large yields of grain may be obtained. But to continue on about the Fair Grounds—it is conceded by all horsemen that the society has the

BEST RACE TRACK.

in the State. The track is in the shape of an "O," and as a consequence, no sharp turns occur. The track is not heavy, and is kept soft by continued harrowing. Last July the society offered some \$8,000 of worth premiums, and, although this was the first step taken in that direction, and notwithstanding the fact that it was not a success financially, the society intends to make the July meeting of annual occurrence. All our readers are aware of the fine racing occurring at that meeting. Mr. Gault spoke favorably of the society's setting aside a place suitable for base ball, and suggests that it would be a good place for clubs to play when they wish "neutral grounds." We hope by next year to see the society promulgate this idea, as it will be a success without a doubt.

"BRUSHING" THE HORSES. While there last week we were at the track early, and were thus enabled to witness the different trainers exercising their horses. A number of excellent "brushes" were made. We wish just here to tender our thanks to the different trainers for courtesies extended, and especially to Mr. N. G. Smith and Wm. Tompkins, who kindly assisted us.

The following is a correct list of the horses under training at the Hillsboro track:

WM. M. TOMPKINS' STABLES.

"Glenn Duddy" heads the list at "Bill's" stables; he is a five year old bay stallion, by Lexington, dam Madam Duddy. This horse was imported into Oregon this Spring; and is getting acclimated. He has a tremendous stride, and much can be expected of him. Among his three years olds we find a chestnut filly, by Enquirer, dam Emma Simpson, by Rogers. A bay filly, by Enquirer, dam Planet. A bay filly, by Longfellow, dam Planetarium by Planet. "Lucy Ashton," a sorrel, by Waverly, dam Annie Laurie. This is a compact animal and shows substance. A bay filly, by Red Dick, dam Lizzie Boyers. "Hoodlum," a four year old, bay horse, by Lindsey, dam well bred mare. To the casual observer it would look as though Tompkins ought to come forward with a good three year old, as no doubt he will, as he has plenty of good material.

SOOOINGS & POWERS' STABLES.

"Jim Merrit," two year old, brown, by Langford, dam Sweet Water, by Balsam. A bay colt, two year old, by Lindsey, dam by Rifleman, and an Oregon bred horse.

SMITH'S STABLES (TROTTING HORSES).

A black filly, three year old, by Autocrat. "Flora F.," three year old, sorrel, by Autocrat. "John M. Patchen," eight year old, bay, by Autocrat. "Lady Faustina," eight year old, bay, the property of Mrs. Laper, sired by Vermont, dam unknown. She was a favorite on our tracks two years ago, and is showing improved speed. Mr. S. has quite a number of young horses under his care.

A Reported Wreck.

The lighthouse tender Shubrick arrived at Port Townsend yesterday from Victoria. It was reported at Victoria that a vessel had gone ashore at Port Discovery, but nothing of her was seen by the Shubrick and it is thought the report is untrue.

Log Crushed.

Yesterday at the Salem depot, Geo. Hughes, son of John Hughes, got caught between a dray and one of the cars, and had his leg badly lacerated. A good sized hole was made in the limb below the knee. He had a narrow escape from having the bone crushed, which would in all probabilities have made him a cripple for life.

The Stranded Schooner.

A dispatch received from Port Townsend last evening says: The tug Blakely visited the wreck of the schooner Corsair at Point Greenville Saturday, and reports the schooner apparently in good condition. A north-west swell had forced the vessel upon the beach about three hundred feet from where she stranded. She was sold on Saturday.

The Rain.

Much grain is still standing in shocks throughout the valley and should the rain continue a few days longer will do much damage. Already the straw is spoiled and will be unfit for use. The farmers who hurried their harvest through and garnered the grain will be benefited by the rain, as they can commence plowing and putting in their Fall crop.

Mines at Bohemia.

A correspondent writing from Cottage Grove under date of the 8th inst., says: "There is considerable excitement about the mines up towards Bohemia, being about thirty-eight miles here from and eighteen miles above Sharns. Mr. J. D. King has been prospecting there about two years, and lately discovered three mines. He brought in one nugget worth about \$9 and \$10, and some shot gold about the size of bird shot, and had about \$100 worth of it. People of Oakland, Drains and here are going night and day. Three wagon loads are now starting to the mines, while your correspondent is writing. Just as the train is leaving we hear of a \$30 nugget being found by Mr. Ed. Estes."

The Cariboo Mines.

The following dispatch was received last evening from Victoria: J. Reid arrived last evening from Cariboo, bringing with him the product of a few days' crushing of rock on Hixon Creek, in the shape of a mass of amalgam weighing fifty-two and a half ounces. About forty tons of rock were crushed. The five stamp mill of the Quennelle company worked admirably. The rock crushed was obtained from the top of the ledge. The next crushing will be from rock one hundred feet below the surface, which assays from sixty to six hundred dollars to the ton. The hydraulic claims are doing very well and the output of gold is increasing. A telegram received last evening announces that thirty-six ounces were obtained from a crushing of Hixon Creek rock on Friday, and the ledge was looking well.

Rifle Practice.

A portion of the Astoria rifle team met a portion of the Eagle Cliff rifle team, (both teams are composed in part of ladies) at Astoria a few days ago and made several match shots, says the Astorian. The ladies from Eagle Cliff were Miss Eliza E. Brooks and Miss Annie Neal, those from Astoria were Miss Mary Jewett and Miss Calla Munson. The Astoria team won, and we regret that we have not the score to publish. Later, Miss Jewett, Miss Munson and Mr. John W. Hume met on the grounds and at a distance of 32 yards, off-hand shooting, Miss Jewett made 31 of a possible 36; Miss Munson 34 of a possible 36, and Mr. Hume 31 of a possible 36. The center of the target was one inch and a half in diameter.

A Queer Find.

The Coast Mail published at Marsh field, publishes the following: A short time since, Thomas Wilson, a miner on the South Fork of Sixes river, started to prospect a claim on the hill side where there was no sign of any work ever having been done. He was engaged in running an "open cut," when at a considerable depth under ground he found an old pick, of an awkward pattern, and worn off nearly to the eye. On the bedrock, at a depth of about ten feet; he also found a small coin a little larger than a dime, apparently composed of a mixture of gold and copper. It was badly rusted, but on being cleaned, letters or characters of some kind are distinctly visible. They are not Chinese nor English, and the experts of the camp are sorely perplexed. They are hunting for a "Daniel" to decipher the characters. It is evident that the earth where this coin was found, had never been moved by the present generation of men, and the question naturally arises whether, in the dim and unknown past, some other people had mined for gold in that unattractive mountain gorge, the last traces of whose work have long since disappeared upon the surface. The subject opens a wide field for conjecture.
