Important Land Decision.

WASHINGTON, Oct. 29.—The Acting Com-missioner of the General Land Office to-day marysville, California, register and receiver in the matter of application of Asa C. Ford, to enter under the law of June 15, 1880, the land embraced in his homestead entry of De tender, 1879, during the rendency of a con-test of Thomas Gohrman for cancellation of said entry on the ground of abandonment. Acting Commissioner, in rendering this de-vision, announces the following important construction of the two apparently conflicting laws for the relief of homestead settlers, which were enacted at the last session of Congress. He rules that when a person has commenced proceeding for cancellation of a homestead entry in order to avail himself of the privileges and rights secured by section 2 of the act of May, 14, 1880, he has acquired such an adverse standing and interest as will prevent the contestee from making payment under act of June 15, 1880, for the land embraced in the homestead, or in other words that the right laws for the relief of home estead settlers, which homestead, or in other words that the right of entry conferred by the last mentioned act is contined to cases wherein the United States and the applicant to purchase are the only parties interested.

North American Review.

The leading article in the North American

Review for November is by the Hon. iam Beach Lawrence, and is devoted to an exposition of the monachical principle in the United States Constitution. It is shown that under our Constitution the Executive is vested with powers far greater than those possessed by the king in a limited monarchy. The am plitude of the President's constitutional powers is best seen from the history of the war of secession, as when Mr. Lincoln, without waiting for the assembling of Congress, declared the blockade of the Southern purts, and called into service for three years a volunteer army of upward of 42,000 men. The author foresees danger to the permanence of our republican institutions, resulting both from the vastness of these powers and from the existing methods of choosing Presidents, and thinks The men who went from Jackson that a radical change in the Constitution is imperatively demanded. In the same number of the Review Bishop W. C. Doane points out the advantages of free religious discussion; even "the blasphemy of irreligious discussion, he thinks, works, the glory of God. The Hon. Montgomery Blair writes of "The Republican party as it was and is." Upon the suppression of the rebellion and of slavery, the mission of that party was accomplished, and since the death of Lincoln its career ha been one of usurpation, corruption and centralization. M. Desire Charnay contributes the third of his valuable illustrated papers on "The Ruins of Central America." The other articles in this number of the Review are "The Nicaragua Rout to the Pacific," by Rear-Admiral Daniel Ammen; "The Coming Revision of the Bible," by the Rev. Dr. Howard Crosby; "Recent Eurspean Publications," by Prof. T. F. Crane; and finally a paper entitled, "The Political Situation," designed to show how the business interests of the country would be compromised by a change from a Republican to a Democratic adplenty. Occasionally they have anteloge ministration of the general government. The document is signed by over twenty of the heaviest capitalists of New York.

IT is worthy of remark that the political heresay known as Communism in France Socialism in Germany and Nihlism in Russia is far more prevalent and pronounced abroad than here. Whether or not this dangerous this country may possibly depend upon the continuance of the protective tariff system in the United States. Logically agarianism is a great extreme for labor to claim an equal division of advantage with protected capital. If this is to be a paternal government it may ted in the mountains of Jackson county | well be argued that its beneficence shall not be confined to the owners of manufacturing establishments, but shall be extended to the werkingmen employed in them. How such a demand could be consistently resisted here it is difficult to see. It may be that the safety of capital from agrarian atta will be best subserved by removing all pretext of grievance as now found in the one sided operation of the protective system, and by letting capital stand on its own bottom and look out for itself the same as labor has always done. The protective theory is perilous is what it implies. Hands off is the true policy of the Government.-[Phil. Record.

A Surprised Englishman.

From the Pall Mall Gazette "Here is an extraordinary point in the present condition of this country," writes an Englishman traveling in the United States. "America is, as all would agree, an industrial country, and yet I do verily believe that not even vidual preparation made to fight in mass, and so much organization of the masses so drilled, as in America to-day. The Freemason's, a most important body here, are always on the drill; then there is the militia-quite a separate organization, of course; the army of the Three drunken, lawless vagabonds Great Republic, [sic.] (a Republican organization,) of which Grant is the head, which has its customs and meeting places, and other organizations of various kinds. In addition to these there are the working class unions and Socialist bodies, most powerful in Chicago, and they drill, too. It has come upon one as a sort of revelation. What are they all after! Ask them and they cannot tell you, except, perhaps, the Socialists, and they are hazy enough as to what they want. Most of those whom I have inquired of as to what this access the finest farming country in the world, has been awakening up of late, and since the ait until I asked the question, and then they of military furor means had not even noticed

A carefully prepared estimate of the amount of United States gold and silver coin in the

country on Oct. I has been made by Director of the Mint Burchard, which will be embodied in his forthcoming annual report, provided no material change occurs before Nov. 1, in which case the amount of coin in the United States at that time will be estimated for use in the report. The estimate is based upon the respective amounts in the country on June 30, 1879 and shows an increase since that date of \$83,390,305 in goild coin, and \$37,748,350 in silver coin. The increase is said to be from actual coinage, and the net import of United States coin. The total amounts estimated as in the country Oct 1 are \$369,881,003 gold and \$149,799,335 silver. Of these amounts there are \$67,204,293 of gold in the Treasury and \$302,676,709 in circulation or held by banks, and 872,454,600 silver in the Treasury and \$77,344,735 in circulation. In addition, the Treasury holds \$68,040,540 in gold bullion and \$5,557,750 in silver bullion, which the mints are turning into coin a rapidly as their facilities will admit. This is a larger amount of specie than has ever before been in the country. The increase of goldbullion is from imports of foreign gold during
