Green, 65@80c.

COFFEE—CostaRica 16@20c; Java, 28@30.

SUGARS.—Crushed A 13{c; Fine Crushed, 3{c; Cube, 13{c; Extra C, 12c; Golden C, 11{c; Sandwich Islands, No. 1, 11c.

SYRUP.—Five gallons 75c.

CANDLES—13@16c.

RAISINS. California, \$3.25@\$2.75 \$25 b.

\*\*SOAPS.—Good, 75c@\$1.75.

OILS.—Ordinary brands of ccal, 25c; high strades, Downer Co., 37½c; Boiled Linesed Raw Salmon oil, 40c; Turpentine, 70c, 2ure Lard, \$\varphi\$1.10; Castor, \$1.25@\$1.40.

YKAST POWDERS.—Donnelly, \$2 \$\varphi\$ doz; Preston & Merrill, \$2.25 \$\varphi\$ doz; BALT.—Stock, bay, \$12 \$\varphi\$ ton; Carmeltaland, \$12½; Coarse Liverpool, \$20; Fine quantly, \$25; Ashton's dairy, ditto, \$30.

### COMMERCIAL.

THURSDAY, September 22. Interest, of course, centers in the wheat market, which remains without change. European prices are maintained without ex-European prices are maintained without excitement and the demands of tonnage remain unchecked as yet, with little probability that they can be lowered soon and much more that exactions may be increased.

Austria-Hungary is the only country in Russne where crops are satisfactory execut a legislation of the corn belt. It is not better than in other portions of the corn belt. Iowa, from 33 reports show corn damaged 20 to 75 per cent. and a general average of damage of 63 per cent.

Nobraska reborts crops greatly reduced. Recent rains all over the northwest have greatly beloned the full seeding.

Europe where crops are satisfactory, except a portion of Russia, which produces well, while a belt a hundred miles on the South border suffers a failure of wheat crops. The returns we have published of late, show that storms caused disaster to British harvests; France falls considerably short of 1880; Germany falls 25 per cent, short of meeting expectafalls considerably short of 1880: Germany falls 25 per cent, short of meeting expectations entertained early in the Summer; while Italy, France, Spain, Belgium, the Turkish provinces—all show a poor out-turn of breadstuffs and will be heavy customers for American wheat, even though Russia shall come forward with fifty millions more bushels than forward with fifty millions more bushels than

1880, Oregon and the Pacific northwest being pressed hay in increased quantities. about the only region that has held its own. wheat the terrible drouth that has prevailed for ten weeks past has despoiled the States that reach from Nebraska to the Atlantic, and Southward from Minnesota and New York, to the Carolinas. Orchards, vegetables, hay and corn are more or less of a failure through this great extent of territory, and the cotton and tobacco crops are damaged in sections. All this will in time react on the wheat market, and we can hardly believe it possible that the price of wheat will not go up during reached a total of 7,269,000 quarters, the Winter as high as has been known of late against 9,926,000 quarters in the previyears, and much higher than at present, enough to benefit the Oregon farmer materi- this week has been firm, but the adally if he can hold his own with the tonnage question.

seven arrivals of wheat ships in the river, general indisposition to operate at the with capacity to carry 8,000 short tons. Two high prices. The quantity of wheat on of these vessels are without charters, the rest passage to France by sail is now 270,600 are engaged. The tourage question remains quarters, and by steam 55,000 quarters, as it was ; 90s. per ton is asked for iron ships against a total of 230,000 quarters last and 85s. for wood. During the month there year. have been two departures.

Valley wheat is changing hands at \$1 574 per cental; there is a suspicion that a trifle more has been paid for choice lots, but it is not positive. The wheat of the upper country is all sold and handled there, prices at Walla Walla and above ranging from 55 to 75 cents a bushel. Sibson & Church 'are entering that trade largely, and Mr. Church spends most of his time there buying and shipping wheat. Contracts are made on the spot and sacks shipped from here.

We publish so much that relates to the death of President Garfield, just received the last day, that we have to cut market reports rather short this week.

No particular change in local markets. a bushel and are scarce and wanted, while pears range from 60 to 75 cents and are also in good demand.

The Peansylvania Railway lines, from St. Louis and Chicago, are the shortest, quickest and most attractive routes to the principal wheat and rye, the greater advance be-

GOLD AND STOCK COMPANY'S REPORTS San Francisco Markets.

SAN FRANCISCO, Sept. 21. Wheat—Buyers manifest the same indisposition. Sellers are not disposed to grart concessions. Among sales to-day were: 80 tons off grades shipping at \$1.37\frac{1}{2}; No. 1 sold at \$1.62\frac{1}{2}; no sales of extra choice or choice shipping reported. Quote choice to extra choice at \$1.62\delta[1.70.

choice at \$1.62\(\frac{1}{2}\)\(\text{\text{\$\emptyset\$}}\) 1.70.

Barley—Marked firm, with prices against buyers. Sales of good brewing, new, at \$1.45; fair brewing, old, at \$1.52\(\frac{1}{2}\); coast chevalier, \$1.40\(\text{\text{\$\emptyset\$}}\) 1.42\(\frac{1}{2}\). Quote good coast reed at \$1.35\(\text{\text{\$\emptyset\$}}\) 1.37\(\frac{1}{2}\).

Oats—Market is steady at the advance. Sales of common feed at \$1.42\(\frac{1}{2}\). We quote as before

#### Crop Reports

Chicago, Sept. 19.—The Tribune's comprehensive reports of drought, and its effects show that it has almost ruined pastures in the northwest and made plowing for winter wheat almost impossible. It has caused a great decrease in the prospect of wheat acreage for 1882. The potato crop is nearly a total failure everywhere, and all kinds of vegetables will be scarce and prices of living will be high this winter. In Minnesota, Dakota and Wisconsin there has been to much rain. In southern Illinois corn is being imported to supply the home demand, and people are shipping away all theirstock in order the better to meet the Winter. Eight reports from this state show the corn crop to be equal to 1880; 52 report it damaged; from 25 to 50 or 55 report the damage from 70 per cent. to a failure.

In Missouri two-thirds of the corn damaged 20 to 50 per cent. Kansas, though more favored by rain, reports corn 20 to 50 per cent. damaged. Ohio and Indiana out of 67 reports 24 show corn damaged 50 to 75 per cent, and 23 report the damage from 10 to 40 per cent. It can be readily seen the condition of sin there has been to much rain. In south

helped the fall seeding.

#### Failure of Crops in Germany.

forward with fifty millions more bushels than in 1880, which is doubtful.

There is no mistake about the failure of the wheat crop in America, which is likely to fall squares for the same period last year.

Commercial Agent Warner strongly advises

Commercial Agent Warner strongly advises

The so'emnity of the day without compreses for rain. Meteorlogical reports from April the moling it, and put aside their crackers and borns. #### And in addition to this diminished yield of FOREIGN CROPS AND MARKETS.

[Dates of Aug. 26.] FRANCE.

Heavy rain has fallen in the north of wheat crop. Concerning the total yield. it is now evident that at least as much wheat will be required to be imported as during the past season, during which the net imports of wheat and floor have ous season of 1879-80. The wheat trade vance in England and America has not been freely followed, owing to the in-During the past week there have been crease in the farmers' supplies, and a

A firm and improving tone has prevailed in the wheat trade this week, but there has not been very much activity. At Antwerp, yesterday, wheat was firm, but quiet, and rye firm. The quantity of wheat on passage to Antwerp by sail is 123,200 quarters, and by steam 40,000 quarters, against a total of about 100,000 quarters last year.

GERMANY.

Wet weather has delayed the harvest and deteriorated the crops in the north of this country, and in the south also and best business stands in Portland and their the yield does not come up to expecta- way of doing ousiness is to win friends by tions. Altogether it is feared that the liberal dealing and keep them by deserving general result of this year's harvest will their trade. Green fruit is in demand. Plun.s are about be a poor one, although in some cases an out of market. Apples range from 75 to 90c excellent yield is anticipated. The Ger-

ing on wheat. At Berlin, last week, "term" wheat was very strong, especially for near delivery, which improved 8 marks. Rye also was 2 marks higher. At Hamburg spot wheat rules firm and is gradually advancing. In the first six months of the present year, Germany imported 785,500 quarters wheat and 1, 237,200 quarters rye. The imports in the second half are expected to be much

HOLLAND. The weather has likewise been wet in this country, interfering with the harvest and deteriorating the quality of the new grain. This, with rising markets abroad, has caused great firmuess, and at Amsterdam November wheat is 8fl higher on the week. Rye is also 4fl higher for October delivery. This delay in the harvest, and the fact that millers who have sold flour for forward delivery are bare of stocks, has caused an active demand for wheat. The quantity of wheat now on passage to Holland is 69, 400 quarters by sail, including 47,100 quarters from India. Owing to the rapid advance in London, Antwerp is now a more remunerative market for Dutch buyers.

AUSTRIA-HUNGARY.

women would resent the charge that they are weaker because they are civilized. A distinguished writer sequence that they are weaker because they are civilized. A distinguished writer sequence that they are weaker because they are civilized. A distinguished writer sequence that they are weaker because they are civilized. A distinguished writer sequence they are civilized. A distinguish and sequence they are civilized. A distinguish and sequence they are civilized. A distinguish and sequence the sequence they are civilized. A distinguish and sequence the sequence th who have sold flour for forward delivery

According to advices of the 21st inst., rain had fallen, but was too late to do much good to the maize plant. Barley and tye prove very deceptive, but wheat is still spoken well of. The trade had been improving for both wheat and flour, the latter meeting a good inquiry for export to Eugland and South Germany. According to official statistics the exports of flour from Austria-Hungary in the first half of this year were 565,594 quintals (444,500 sacks of 280th) against 493 995 quintals in the corresponding period last year, the imports being 255,484 quintals, against 379,375 quintals last year.

RUSSIA. The crop reports from this country are somewhat conflicting, but on the whole quite favorable for a good crop of wheat, rye and especially barley. Some reports state that the yield of wheat will not be so abundant as had been expected, but others say that it is very large. It is certain, however, that a very much larger quantity of wheat will be available for export than last year, the estimates varying from 4 to 7 million quarters over last year, but it must not be forgotten that the new crop comes upon a country quite bare of old grain. So far, the recent advance has notattracted large offers from South Russia, probably owing to the difficulty in moving the grain to the seaboard. ITALY.

Telegraphic advices from Naples state that the extraordinary heat and drought have seriously impaired the out-standing crops, maize being almost lost. A large demand has consequently sprung up for maize for Italy in the Danube and in the Black Sea, as well as in America.—Beerbohm.

WHEN Pompeii was overthrown, the city was transfixed so perfectly that the excavators delving beneath the scoria 1,800 years afterward, read as they uncover, page after page, the story of Pompeii in life on that day when the fiery mountain sent down its dreadful winding sheet and composed the doomed city. in death. On the Fourth of July a mental volcano stretched its cloud over Washington, and hushed it into silence. No bells were rung; no steam whistles were permitted to sound; no bands played; the children caught music died out of the city, and laughter fled cowering away. It was believed that the President lay dying, and that belief was what made the hush. The winds caught the infection and fled, too, leaving only a noiseless breeze to fan the throbbing temples of the President. If on that day the recording anthis country, doing some injury to the gel, from his station in the sun, made any report as he swept above our planet, it must have been "all the Union is in mourning, and all Washington waits in silence in the antechamber to take up the chant for the dead." It was the saddest birthday this nation had ever seen except that one in which the people were trying to pierce the battle clouds that is still hung over Gettysburg and Vicksburg. May there never be such another one. The sorrows which come in the course of nature, men are nerved to bear; but it is cruel, indeed, when a worthless man, with an eightdollar weapon, can burt to the quick fifty millions of people. - [Ex.

SUGGESTIONS IN TIME.

WHAT A WOMAN OF PROMINENCE IN THE MEDICAL WORLD HAS TO SAY ABOUT HER SEX.

psis of a Lecture Delivered by Mrs. Doctor Kenton, on Woman's Society of New England.

[From the Home Journal, New York.] In all ages of the world, poets, scientists and men of prominence have looked with enthusiasm often akin so reverence upon woman; but it is only within the last few years that she has begun to assume her right place, not only in society, but with the world in general. Why so desirable an end should have so long delayed it is difficult to understand; but that it has at last come is certainly cause for gratede. In her social sphere, in her mental development, and especially in her physical improvement,

as astonishes the world. They who have made a careful luvestigation tell us that heathen women are much more able to endure pain than are the women of civilization, but civilized somen would resent the charge that they are weaker

ian has shown wonderful advancement, and such

ENJOYMENT BEGINS,

And all the luxuriant attendants of a healthy body come forth. The maiden feels the glorious possibilities of life; the mother becames conscious of the grandeur of maternity and the joys of a family. All this is not only woman's privilege, it is her duty, and it embedies the highest definition of "woman's selects".

this is not only woman's privilege, it is her duty, and it embodies the highest definition of "woman's rights."

After enumerating many of the blessings that follow perfect health, the writer continued:

All these desirable things can be accomplished, but in one way only. The Creator has given both woman and man perfect physical forms, and each is constitutionally equal to all matural demands. It is a mistaken and pernicious notion that one is strong and the other weak. No curse was pronounced upon woman which did not apply with equal penalty against man. If women believe the fatalism that disease is a necessary condition of their existence, it is chiefly because the disciples of the schools of medical practice have been utterly incapable of competing with the multitude of ills which, by personal carelessness or prefessional incompetency, they have permitted to fasten upon women.

A few weeks ago I received a call from a charming lady, whose carnest face clearly showed that she desired advice and is stance. Upon questioning her she stated that she believed she was suffering from a paralyzed liver, and wished to know if I could in any way aid her recovery. Now, imperfect as her statement was in regard to the disease which troubled her, there is no doubt that

there is no doubt that

THOUSANDS OF WOMEN

Are suffering to-day, from similar troubles, who do not recognize their cause so nearly as this lady did. Paralysis means death of the member paralysed, and torpidity of the liver is the first stage of its dissolution. This is one of the most serious questions that can arise in the experience of any woman; for a torpid and diseased liver cannot be cured at once, and it carries with it the elements of disease to all the other parts of the system. With an imperfect liver, billousness, langour, a sense of bearing down, constipation, displacements, uterine troubles and the thousand ills which are coupled in their train come thick and fast. Then follow impure blood and all the cvils which an imperfect circulation cause. A derangement of the kidneys or liver causes disease in the organs which ad oin them just as certainly as a bad peach injures the other peaches in the basket. Not only this, but when these organs are in a healthy state, they restore and keep in order any irregularity which may occur in the lower portion of the body. No woman was ever seriously sick for any length of time when such was the case. No scrious inflammation can occur when the blood is pure, and no blood can be impure when the liver and kidneys are in perfect order.

I have seen very much of the troubles and ills to which women have been subjected, and I have learned to sympathise while I have sought to relieve. In endeavoring to carry relief I have tried to be free from prejudice, and have in view but one end, namely—to help those who are suffering; and I feel it is my privilege to-day to state that I believe there is a means whereby those women who are suffering can obtain complete relief; and those who are in healthy and wealthy gentlemen residing in Rochester, N. Y., was given up to die of Bright's disease of the kidneys. By means of a simple and purely vegetable remedy he was restored to perfect health, and has since been the means of saving the lives of many. See efficient did THOUSANDS OF WOMEN

Prove in the case of many well-known men, that it began also to be used by ladies, and to-day thousands of women, in all parts of the land, owe their restored health and continued happiness to the wonderful powers of Warner's Safe Kidney and Liver Cure. Mr. Warmer has the written testimony of hundreds of the best ladies in the land, enthusiastically praising the remedy, and thankfully expressing their gratitude for health. These letters are sacred, and cannot be given to the public, but they overwhelmingly verify all the facts above stated. Nature has given woman a delicate, watchful, alert, instinct, and she has found this remedy to be what her sex for years has needed, to restore and maintain the perfection of nature. She rescents the imputation that she is bound to suffer all the ills that attack her. She recognizes that suffering is hut an incident of her existence, and that this incident is wholly within her control, if she can find the necessary the recognitive that processors the control of she can find the necessary the can be desired to the control of she can find the necessary the can be desired to the control of she can find the necessary the can be desired to the can be controlled to the can be controlled to the can be called the can be called the can be called to the can be called the called HDS DISCOVERY She recognizes that suffering is but an incident of her existence, and that this incident is wholly within her control, if she can find the necessary helps which nature provides. The changeable character of our climate, the ofttimes exacting and enerosity, all conspire to impair the vitality of women. If we and to those the exhausting duties of motherhood, and the mental anxiety for the success of her husband in all his landable ambitious, which play upon her energies, is it surprising that thus hundrated she should break down under the physical strain? By no means—on the contrary, the wonder is that she has maintained her physical strain? By no means—on the contrary, the wonder is that she has maintained her physical strainer as she has.

I have not the time to elaborate this point. You sourcelves very well know what the chromatanees are which have rendered her life a burden. You also know that the PRINTARY CAUSE

Of phycical degeneration is impure blood. The per-formance of the natural functions of womanhood and motherhood is not a disease, nor should it be so treated. Disease is the result of the transgressions of physical laws by our ancestors or by ourselves, and

formance of the natural functions of womanicos and motherhoed is not a disease, nor should it be so treated. Disease is the result of the transgressions of physical laws by our ancestors or by ourselves, and the natural coursing of the blood should not be so considered. If, however, the blood be impure, it is certain to produce its poisonous effects in the parts with which it comes in contact, and thus cause inflammations and the immunerable ills that make the physical life of woman so hard to endure.

An enumeration of the troubles to which woman it is subjected, and the adaptability of the remody above named for their cure was then made by the speaker, who continued:

I am aware a prejudice exists against proprietary medicines, and that such prejudice is too often well founded, but we should discriminate in our judgments, and not condemn all because some are inefficient. The merits of Warner's Safe Kidney and Liver Cure have been proven beyond a doubt, because they deal directly with the causes of all female troubles; they effect and confired the body of the tree rather than its branches. Warner's Safe Kidney and Liver Cure has indeed been a blessing for the tich; a boon to the poor. It has lifted men from a bed of death and restored them to vigor and health. But groater and better than all this, it has come to woman, has raised het, restored her and kept her in constant hopefulness and health. It has kept back disease by fitting the system to resist us attacks; it has regulated the life, purified the sources of life, and brought innumerable blessings out of numberless woes.

The women of America, both young and old, have greater opportunities to day than those of any land in any age. Their rights are more fully recognized, their privileges greater and their possibilities milimited. They are permitted to enjoy life to its fullest extent, and to do this their bodies must be unfinpaired. I congratulate them that they, who have reased the greatest henefits from the scientifie researches of independent investigat
