while the authorities observe the subject silence. The New York Public, speaking of the the business outlook for the past week, says : The exchanges for the past week are affected by the suspensi n of business on the 26th of September, 1881, and by the general prostra-tion of luminess at the time of the death of the President. Ordinary comparisons are therefore of no service, and the best that can be said is the decrease in the volume of busi-ness has not been very large. That there has been some decrease is undeniable, for ex-changes outside of New York show a decrease for the month, and the increase for the last week is decidedly less than should appear, with six working days this year against five in 1881. To put it briefly, the month has not been one of astisfactory returns and yet the comparison is particularly difficult for the reason already mentioned. During nearly the whole of the month last year business was disordered and interrupted, and it is not pos-sible to make a comparison that will have

disordered and interrupted, and it is not pos-sible to make a comparison that will have more than suppositions or experimental value. Movements in produce markets during the past month have been generally in the direc-tion of liquidation, and yet corners in grain at Chicago and in cotton at New Orleans have had a powerful influence. So far as compari-son of exchanges warrants any opinion it tends to the belief that business neither is as healthy or as erive as it was a very race. tends to the belief that business meither is as healthy nor as active as it was a year sgo, and this not only because of the decline in the volume of payments, but because of their distribution at different cities. But the speculative operations this year have been unusually large and tend to blind the eye-tooth of ex-

Importance of the Cattle Trade. CHICAGO, Oct. 10.—A Tribune editorial says some idea of the importance to Chicago, and the consuming markets of the world at large, of the cattle trade, may be gained from the fact that since May lat, beginning of the season, there have been received at the Union stock yards in this city four hundred thousand head. Of this number two hundre is and seventy thousand were Texas through and seventy thousand were Texas through and seventy thousand were Texas through cattle; the remainder, northern range cattle. Protection vs. Free Trade. Sr. Louis, Oct. 10. -- Advices from Texas indicate that that a political revolution is go-ing on in the 7th, 8th and 10th congressional districts on the question of free trade. The entire wool growing interests in western Texas are in favor of protection, and a meet-ing of wool growers was held at San Anto-nio Friday last, where it was readiled to op-pose the election of Judge Hancack, the democratic condidate for congress in the 10th district, who is a free trader. A fund of \$4000 has been raised to put first-class pro-tection speakers in the field against Han-cock, and some opposition is suid likely to oc-cur in the 7th and 8th districts, with fair propects of their being carried by the re-publicans.
