THURSDAY, Oct. 19, 1882. We publish this week a complete and rewised list of shins on the way to San Francis co. The list is from the Commercial Reporter. and is accurate. We, last week, published a ist of vessels in port, and hereafter will make it a point to publish much such statistical matter.

LOCAL MARKETS.

Reviewed and corrected weekly by J. B. Knapp, produce commission dealer, 267 First supply. Grapes for the wine press arrive street, Portland, Oregon :

Wheat .- There is little or no change to note, except there is a little better feeling, and buyers are paying a little higher than last week; \$1 55 per cental is about the top of the market; farmers generally are not willing to accept so low a rate. Buyers seem to have no difficulty in obtaining, at current rates, all they want for present requirements. No change to note in the rate of charters.

Oats-Are active, and move freely at a little advance this week, rating 50 to 54c per bushel. Holders asking 55c.

Potatoes - Since the heavy rains commenced the supply has not been quite so free, and they have advanced a little. 50c per bushel to a fair quotation, and market pretty firm at that.

Onione are plenty at 1 to 14c.

Butter-The receipts of fresh dairy is about equal to the demand; no change in prices for several weeks, rating in first hands at 374 to 40c; packed butter rating 30 to 35c, though the latter is an extreme figure.

Cheese Good Oregon, 16 to 17c, California, 14e.

Eggs have been very scarce the past week selling readily at 40c.

Poultry-The supply has been light, and prices have advanced, chickens rating at 63 50 to \$5 per doz; ducks, \$5 to \$8; geese,

Fruits-Apples and pears coming in freely. Good apples, seasonable varieties, will rate about 40 to 75c per box. Pears are a drug. the very best colling at 50c per box. Inferior fruit selling for order and vinegar at je per th. Some considerable enquiry for dried fruit, more for future speculation than any immediate wants. Good machine apples, well bleached and nicely packed, will command readily 90. What will be the established rates for plums and prunes, no one seems able as yet to deter mine. There is a disposition on the part of a having nice dried plums and prunes to hold firmly for a good, fair figure, say 15 to

Wool-No changes to note; dull enough as neual.

Hay-Is very active. Good timothy selling readily on the wharf at \$200021 per ton,

lerten master, cleared vesterday for Queers-town with 61,050 bushels wheat,

California Crops and Markets. We take the following from the San Fran

isco Commercial Herald of October 12th: The rainy season appears to have come upon us in good carnest, some 27 inches of rain having already fallen, which is far more than usual at this date. The grass is now, coming forward rapidly, and it is fondly

hoped that it may continue to grow, so as to afford needed nourishment for the cattle and sheep upon a thousand hills. The damage in flicted by this heavy and unexpected rainfall throughout the State has been greater than at first supposed. Large quantities of wheat, barley, hay and beans have been injured seriously, and not a little past redemption. This damage to the crops has had more or less influence in strengthening the markets for both spot and futures, notably of barley, which has been largely dealt in at the Call Boards, and at advancing prices. Wheat continues in good request for export, and is likely so to continue for a long time to come, owing to the large tonnage supply and low rates of freight. Millers continue to find more or less difficulty in securing all the extra choice white wheat requisite for the manufacture of fancy brands of flour. The impression is growing that the barley crop of the State has been over estimated, dealers losing sight of the fact that large tracts of land across the bay and at Santa Cruz, heretofore producing largely of barley, are row cut up into small farms and devoted to fruit culture. Oats are in light supply and the market is firm. There is some speculative inquiry for beans. Hops are too high to be operated in with safety. Rye is coming here quite freely from Nebraska by rail. Corn is quiet and without movement. A few small lots of new crops have been offered on 'Change. Hay of choice quality is scarce, not a little injured by the rains. The ship Yorktown, for Liverpool, carries 1,018

roads have made a further reduction on all lefective wools under a value of 124 cent-14 cents per pound. This reduction will help some. Hides and tallow continue in good request. Poultry and game are in fair supply. Butter of choice quality is scarce. Eggs rule high for ranch. Cheese is plentiful and cheap. The market continues to be well supplied with all seasonable varieties of fruits and vegetables. Tomatoes have long been in excessive reely, and sell readily at \$30 to 32 50 pe

cases honey. Our dairymen are considerably

exercised at the efforts making here to intro-

duce at an early day oleomargarine, a com-

pany of capitalists having incorporated for its

manufacture in this city, and it will soon be

offered in market here to compete with infe-

rior butter. Wool is in fair request. The rail

ton for common, and \$40 for Zinfandel. During the month of September forty-one vessels cleared for Europe, carrying 1,538,866 centals of wheat, 31,507 barrels of flour and 49,743 centals of barley.

PRIEGITS AND CHARTERS Arrivals are free, causing a continued accumulation of tonnage. The quotation for ships to Europe is 42s 6d@45s for wood and iron respectively. A dozen or more vessels have been taken during this week within this range. The disengaged fleet here and at ports adjacent approximates 88,000 tons, as against 10,000 tons a year ago. The fleet to arrive within five months, 231,000 tons regis ter; one year ago, 392,000 tons; in 1880, 218,-

000 tors. Wheat-The market for both spot and future is strong, with a good export requirement. Speculators purchase futures more freely since the raips. The Queen of the Pacific, from Oregon, brought 4,485 sks. The receipts of wheat are not equal to those of last year by considerable. Exports are liberal with a large fleet on the berth. We quote No. 1 spot, at \$1 65; No. 2, \$1 624. Extra choice milling, \$1 674 If ctl. Exporters continue to surchase freely in the interior, and this intereres very materially with sample sales upon

than formerly. Arizona is drawing heavily upon the southern counties for feed grain. All these things add strength to the market. Quotations rule, \$1 29 to \$1 31 \$7 cental for November delivery.

Flour. - The spot market is firm. Sperry's Stockton City Mills has been rebuilt with all the improvements of the age, and is now running full time on export orders. The British bark Vallivia carries to England 16,326 bbis patent flour, shipped by M. C. Ellis & Son, valued at \$80,700, and the Celestial Empire, for Liverpool, with 9,006 bbls. F. D. Conro, one of the pioneer millers of the coast, recontly died at the age of 67 years. He was particulars until after the testimony is given CLEARED. The British ship Timare, Ful. long proprietor of the Golden Age Mills, but for many years paralyzed and confined to his

6,143 bbls. Oregon continues to send us supplies. The Queen of the Pacific brought 5,941 hf sks. The Paradox, for Sydney, carries 500 tons flour. The present price of shipping extras is \$5 25 to 5 50; extra superfine, \$4 70 to \$5; superfine, \$4 to 4 50 \$7 196 lbs, all in cloth.

Hides.—We quote as follows: Heavy saited steers, 10 to 11c # fb, light salted hides, cows and steers, 30 to 45 fbs, 9c; medi hides, cows and steers, 30 to 45 fbs, 9c; medi um do, 45 to 55 fbs, 10c; salted kips, 10½ to 11c; salted calf, good demand for plump skins, 14 to 15c; hair goat, sound skins, 65 to 70c; medium, 50c; small skins and kid, 5c to 25c each; deer skins, good summer, 35 to 37½c; medium, 10ng hair, 25 to 30c; poor and winter hides, cows and steers, 30 to 45 lbs, 9c; medi medium, long hair, 25 to 30c; poor and winter skins, 20c; sheep skins, shearlings, 25 to 30c; short wool, 30 to 50c; medium wool, 60c to \$1; long wool, \$1 to 1 50; dry hides, usual selection, 20c; dry kip, 18c; do calf, 21 to 22c. Hops—The profits of hop-growing in Cali-

fornia have been so large this year that many persons are likely to be drawn into the business. The price of hops is subject to great variations, owing to the frequent failure of Philadelphia. crops in hop-growing countries. This price has been unusually stiff this year, no one sel!ing his crop for less than fifty cents a pound in New York State, where hope are largely grown. Californians who may be preparing to embark in the business should remember that the price is likely to be much lower next year. The following table of prices for the last seventeen years is from a recent compilation in

Utica Hera	ia ;	and the same of

General average for seventeen years, 344¢ nearly. Early crop sales in California were in a few instances made at 25c or less, but the price rose rapidly to 35c, and now is up to 60 @624c for best brands. W. H. & H. Le May, under date of London, September 13, report that the opening prices of new hops had not been maintained. Inferior moldy samples selling at £8 to £10 per cwt; medium Wealds and Sussex, £12 to £14 per cwt; choice, £15 to £18 per cwt; choice Middle and East K nt ioldings, £18 to £25 per cwt. The parcels are exceedingly small in many cases, 2 to 5 pocket lots; and several growers have already finished picking their growth. Continental reports do not come favorable; wet cold weather prevails, and late descriptions do not develop. Imports of foreign hops into England last week were 2,903 bales. For the corresponding week last year, 54 bales. W. H. H. Le May further report, under date of lowest estimate. Worcester Fair very firm for new hops, 20s dearer for olds.
