THE OLD MAN'S STORY.

In every town and city in this country there are old men who have the same story to tell. They point out valuable pieces of property and say, "when I was a boy that property was away out of town. It was nothing but a farm. I could have bought it then for \$10 or \$20 an acre. Now it is worth \$10,000. But I never thought the town would grow out that far. If I had known as much then as I do now, I would be a rich man."

You have met these old men and wondered how they could have had such poor judgment, but did you ever stop to think that your judgment is no better? Who can tell how big Gold Hill will be by the time you are old and gray-headed? I am in the real estate business, in connection with the News. Prices are very low now. This very day is the best time to avoid the mistakes spoken of in the above old man's story.

I have a house and lot in one of the most desirable locations in town, and is constantly occupied at \$4.00 per month, which is ten per cent interest on four hundred and eighty dollars. This property can be had for a trifle more than half that amount. This is one of those bargains referred to in the old man's story so often related. For particulars call on or address
