

Kanes Creek

Elmer Higinbotham was a Hub city visitor on Tuesday.

Tom Norris came down from Medford Tuesday and left the same eve for his mine on Kanes creek, which is proving to be one of the best paying propositions in this section.

Mr. and Mrs. Lewis and Mr. and Mrs. Byerley motored to Medford on Wednesday and did some trading with the Medford merchants.

Mrs. Higinbotham spent a day recently on Galls creek as the guest of relatives and friends.

Rev. Mack Davis preached last Sunday at the Dardanelles school house and was ably assisted by Rev. Hallett of Eagle Point.

Business visitors to Gold Hill on Monday were Mr. and Mrs. Greenleaf, Mr. and Mrs. Lewis, Mrs. Swinden, Mrs. Higinbotham, George Mardon, Mrs. Taylor and daughter, David Avery and mother, Mr. Byerley, Al Rhoten and George Higinbotham.

Mr. and Mrs. George Higinbotham spent Sunday at Tolo with Mr. and Mrs. Nichols.

Mr. Householder returned home from Grants Pass on Monday, where he had been at the bedside of his son Eckell, who had the misfortune to get his leg broken while at work for Mr. Greenleaf. Mr. Householder reports him as getting along nicely.

Prof. Hazelton spent Sunday with home folks at Eagle Point.

"Uncle" Foster, the weather prophet, predicts warm weather for some time.

Mr. Hulbertson, who was hurt Sunday at "Rogue River" while playing ball, is almost fully recovered.

Mr. and Mrs. Mardon and Mr. and Mrs. Taylor attended "St. Elmo" in Gold Hill Sunday night.

Mr. Stickell is building a neat cellar house at his place near town.

Mrs. Householder spent Sunday in Blackwell with her friend, Mrs. Thompson.

Mr. and Mrs. Householder, accompanied by Mr. and Mrs. Greenleaf, left on Wednesday for Grants Pass to spend the day.

We are having a little shower of rain today which is greatly needed to moisten the ground for the early spring gardens.

Mrs. Cook and Mrs. Hyatt of Garden Rove were pleasant callers at Mrs. Lewis one day recently.

Others, Besides You,

are on the lookout for a REALLY GOOD, SAFE INVESTMENT that will bring large and quick profits. And you, perhaps like many others, have been disappointed because you neglected or failed to grasp or accept a good opportunity as it arose. Like you, too, a great many will be glad to get a real, live tip on a GOOD BUY.

I claim to HAVE that BUY, at the mouth of the Columbia, and in a size from a couple of hundred dollars up to as high as you like.

I have the handling of over half a million dollars' worth, and I am in touch with as much more. And it's GOING to be USED in the NEAR FUTURE.

If you haven't discovered before this that the PANAMA CANAL means a GREAT TERMINAL CITY on the level land west of Astoria, and that the WHOLE COUNTRY will soon realize it and be benefitted by it, it's time you begin to study a little for your PERSONAL BENEFIT. There are city lots, acreage and frontage to be had at reasonable prices, but you better get busy! There'll be something doing soon.

I am here to tell you about it if you want to know.

A. J. LUPTON,

Nash Hotel,

Medford, Ore.

Mr. Hulbertson was transacting business in Medford not long since.

Mrs. Ed Rhoten of Galls creek was the guest of Mrs. Higinbotham the forepart of the week.

Mr. and Mrs. Lewis motored to Medford Tuesday on business.

Mrs. Greenleaf was doing shopping in Gold Hill Tuesday.

Kanes creek business visitors to Gold Hill this week were Mr. Lewis, George Mardon, Mr. Byerley, Mr. Thompson, George Taylor, Mrs. Higinbotham, Mrs. Greenleaf, David Avery and mother, Al Rhoten, Mrs. Boggis, Mrs. Householder and your correspondent.

Mr. and Mrs. Marvin of Gold Hill spent Tuesday as the guests of Mr. and Mrs. Val Stickell.

Mr. and Mrs. Pearl Bean enjoyed Easter Sunday dinner with Mrs. Bean's parents, Mr. and Mrs. John Brown.

Miss Mary Boggis, who is staying with Mrs. Emmet Thompson near town, spent a day recently with home folks at the Braden mine.

Mr. Opp of Jacksonville made a business trip to the Braden mine on Tuesday. Mr. Opp reports that the mine is showing up some very rich ore.

Several from this place attended the dance last Saturday night on Galls creek and report a most delightful time.

Walter Dugry, the paper hanger of Gold Hill, is doing some work in that line this week for Mr. Lewis.

Ancient History

(Mail Tribune, Nov. 2, 1910.)

Everyone in favor of good roads should vote for Geo. L. Davis, republican nominee for county commissioner. Mr. Davis stands pledged to a square deal for all factions and sections, no neglecting of certain portions for years and over-attention to other sections, no favoritism to certain cliques and the frozen mitt for others. He stands for modern methods of construction and supervision of construction and supervision and business system. Himself a successful business man, a resident of the county for upwards of twenty years, he promises to devote the same care and attention to county business that he does to his own.

Arsenate of Lead for the codling moth and other pests. Sold by Jarvis, the druggist.

Better take The News.

GOLD HILL, JACKSON COUNTY, OREGON

The Mining Metropolis of Southern Oregon

SEWERS ... CEMENT WALKS ... FILTERED WATER ... ELECTRIC LIGHTS

GOLD HILL has a natural site for a city, built as it is on the banks of Rogue river, at the gateway to the wonderful valley of the same name. The setting for a city is here—picturesque and inspiring—and if the law of natural development works as it should, the setting will some day, and that not far distant, be filled by a city such as southern Oregon may not boast at present. The town takes its name from Gold Hill mountain, so called because nearly half a million dollars was taken from a ledge at a point near its summit in the early fifties. No town in southern Oregon has a greater list of actual, get-at-able natural resources awaiting development immediately contiguous to its corporate limits.

The rushing current of Rogue river—teeming with gamy salmon, trout and steelhead—offers at a comparatively slight cost per developed horsepower an abundance of power for any and all industrial development. And speaking of hunting—the neighboring hills are the happy hunting grounds of southern Oregon. No hunter returns without plenty of venison, and generally he brings in the legal limit. Cougar, bear, panther and coyotes may be had by those who care to hunt them, and several trappers in the vicinity make good money each winter on the finer furs.

The choicest fruit land in southern Oregon surrounds Gold Hill, the numerous creek valleys, with their deep, fertile, mineral-mixed soil and absolute immunity from frost providing almost ideal conditions for the horticulturalist.

Several extensive timber belts can be most easily put into the market with mills located at Gold Hill.

THE following is a list of mining properties in the region contiguous to Gold Hill, classified as to their respective districts:

Kanes Creek: Revenue, Alice, Mendenhall, Roaring Gilet, Braden, Millionaire, Centennial placer, and many others; also the Hughes and Householder lime quarries.

Galls Creek: Bill Nye, recently purchased by a powerful French syndicate, operating mines in all parts of the world; five stamps will soon be in operation. Gold, Standard, Red Oak, Rattlesnake, Kubli, Tin Pan, Burns & Duffield, H. D. Jones, Last Chance, and Big Foot.

Foots Creek: Champlin Dredging Co., Black Channel placer, Lance Bros. placer, Dixie Queen, Bertha, Horseshoe, Swaker, Hummingbird, and many others.

Sardine Creek: Little Giant, Black Hawk, Grey Eagle, Lucky Bart group, Corporal G, Garrison, Haff group, Hinckle, Smith placer, Dusenbury placer, and many others; this creek placers its entire length.

Rogue River Hills: Fairview, Blizzard, White Horse, Sylvanite, Trustbuster, Pactoan, Garfield (iron), Fleming-Ward (iron).

Gold Hill Mountain: Gold Hill ledge, Copper Queen, Whitney, Fisher, Dikeman and many others.

Blackwell Hills: Maybelle, Nellie Wright, Bowden, Yellow Jacket, Lone Pine, Frank Shaffer and many others.

Willow Springs: Murray, Nick Jerry, Herschberger, Houston and many others.

REX H. LAMPMAN
Secretary Business Men's Assn.
Gold Hill, Oregon

GOLD HILL is the center of a rich mineral district. Gold, copper, iron, cement rock, brick and potter's clay, shale, lime—the purest on the continent, according to government geological reports—all are here, and all undeveloped. The rich surface gold deposits, both placer and quartz, have been worked for fifty years, and have paid and are still paying handsomely. There is no deep mining. This will come later, and when it does it is freely predicted that Gold Hill will become one of the greatest camps the west has ever seen.

A mountain of high-grade cement rock lies just south of the town, and a mountain of high-grade hematite iron just north—both undeveloped. A bituminous coal belt many square miles in extent lies seven miles north of the town—undeveloped. This is in the Sams Valley and Meadows districts, comprising some of the finest land for fruit and general farming in southern Oregon. An eleven-foot vein of black lignite has been uncovered in the Meadows, and samples of coal taken from wells in Sams Valley have been proven by analysis and forge tests to be of high quality.

Capital is invited to investigate the Gold Hill district, either before or after investigating other districts, whether the object of the investigation is mines, timber, cement, lime, brick and tile clay, timber, coal, power, or a location for a sanitarium or tourists' hotel—Gold Hill has them all.

Add to all its other advantages as to location and resources an all-the-year climate that can't be beaten on the Pacific coast, and an idea is gained of the justice of the claim that Gold Hill has the best prospects for future development of any town in the world-famous Rogue River valley of southern Oregon.
