

30 MINUTES TO BUTTER
The proper temperature at which to churn cream varies with local and seasonal conditions.

School Problems

By Supt. Chas. G. Bluett of the Gold Hill Public Schools

Because of the Teacher's Institute at Ashland it was impossible to get to Jacksonville for the figures necessary to carry out our financial estimates.

Grades are a serious problem in the minds of most teachers and a difficult question to meet. Perhaps too much attention are paid to these symbols of the estimate of a student's work in class.

at least begun.

Interested parents should familiarize themselves with the foot note at the bottom of the grade card which says, "A", represents 90 to 100 %; "B", 80 to 90 %; "D", 60 to 70 % and "U", unsatisfactory.

The best that can be said is that a grade is an estimate of one person, the teacher who is the best situated to know, as to the relative quality of work put out by a student in comparison with the other pupils of the same class.

Yet the grade has its substantiation also for it has been found at the University of Oregon as it has in twenty or more institutions of higher learning that grades made in high school correlate as high as 60% with grades made at college.

Great intellect does not always mean success in the eyes of the world. Most often intellect will lead man into an unremunerative occupation so far as money is concerned.

Try cooking spinach 10 to 15 min. in just the water that clings to the leaves after the last rinsing.

BONDS! BONDS! BONDS!

Voters are urged to read Section 4 of the Housewives' Council Constitutional amendment authorizing the State of Oregon to go into irrigation schemes and into the business of manufacturing and selling light and power:

"Bonds of the State of Oregon, not to exceed five per centum of the assessed valuation of the state, may be issued and sold from time to time to carry out the purpose of this Article and the full faith and credit of the State of Oregon is hereby pledged for the payment of the principal of said bonds as the same mature, and the interest accruing thereon as the same falls due."

Every voter should know that the assessed valuation of Oregon is \$1,058,880,736, and that the Housewives' Council "Water and Power" board could issue and sell bonds for \$52,944,000. Your property would be a guarantee for the payment of this huge debt.

Oregon's total bonded debt, including that of all political subdivisions, is now more than \$166,000,000. Its State bonded indebtedness alone per capita \$47.08, is the highest in the Union.

As fast as this political board might retire bonds, it would have the power to issue more; and as the assessed valuations increased the amount of bonds could also increase.
