## A \$38,000,000,000

### Threat

By RAYMOND PITCAIRN

Many noted commentators on public affairs have observed in the outcome of the recent elections a significant fact.

They have seen in the attitude expressed at the polls impressive evidence that the American people are determined to halt the mounting toll of extravagance and public debt charged against the workers' earnings and savings during the past few years.

This is a natural and logical conclusion. So serious, in fact, has the threat become that today the federal debt alone amounts to \$38,000,000,000—an average of \$300 charged against every man, woman and child in the country; \$1200 against every family.

Nor is that all. In addition to the federal debt, the politicians have piled up state and local debts amounting to \$19,000,000,000 more—making a total public debt of about \$57,000,000,000, an average of approximately \$1800 per family.

And that doesn't include the interest! Who is going to pay those bills? The answer is obvious.

Not the politicians who ran them up, but the people—from the fruits of whose labor, all public money is collected! Taxes, as everyone knows, constitute the source of government funds—and all taxes, whether paid directly or indirectly, must come out of the earnings and savings of the people.

Today the people have shown that they realize this fact. They have demonstrated that they want the politicians to realize it too.

And if their demands are heeded—if the new Congress accepts its responsibility to put the interests of constituents and nation above those of party and faction—America can look forward with revived hope to the progress and recovery which her rich natural resources, and the intelligence and energy of her people, can and should assure.

eldest daughter Etta Mae, of Medford, was also home for the Christmas holidays.

Mr. and Mrs. Frank Elliott of Redding, California, visited at the home of Mr. Elliott's mother, Mrs.
