Many Volunteer for Training in Naval Reserve

The program for the voluntary training of candidates for line officer commissions in the Naval Reserve is progressing satisfactorily. On July 10, 850 young men between the ages of 19 and 26 inclusive, with a minimum of two years' college education, had been enlisted in the Naval Reserve for this training. Of this number, 600 embarked in the USS Wyoming at New York on July 15 for a training cruise which will end at New York, August 10. During this cruise, stops will be made at Hampton Roads, Virginia and at Guantanamo Bay, Cuba.

On disembarking on August 10, 300 of the young men who have qualified for the three months' training as reserve midshipmen, and who have volunteered for such

training immediately, will join the first class to be conducted by the Navy in the USS Illinois at New York City. Captain J. J. London has been assigned as commanding officer of the Illinois Reserve Midshipman School and is now making preparations for the first class. Captain London has performed duty as professor of naval science and tactics of the Naval R.O.T.C. unit at Georgia School of Technology.

On satisfactory completion of this three month's training, reserve midshipmen will be given commissions as ensigns in the Naval Reserve and may be given an opportunity, if desired, to serve on active duty in the fleet with full pay and allowances.

The second training cruise in connection with this program will be made in three battleships during the period tentatively scheduled for August 19 to September 14. Approximately 1,200 men will be cruised during this period.

Training cruises will continue to be made in three battleships. Young men interested in making the second or subsequent cruises should apply for enlistment at the nearest Recruiting Station or Recruiting Sub-Station.

Fresh Water Game Fish Get Thorough Study

A thorough study of fresh water game fish problems in Oregon is being conducted by Dr. H. S. Davis of Washington, D. C., who is in charge of Aquicultural Investigations for the U. S. Fish and Wildlife Service.

Dr. Davis, one of the world's most noted fish biologists and pathologists, is being assisted by Dr. P. R. Needham of Stanford University, who is in charge of similar work on the Pacific Coast.

The present study, according to Dr. Davis, will include fish hatcheries, artificial cultivation of fish, fish management and planting of fish, together with stream surveys. It is probable that Dr. Davis will

JUNIOR MUSICIANS DAY PLANNED ON TREASURE ISLAND. Five-year-old Albert Roman of Redwood City, California, signals Junior Musicians Day on Treasure Island, August 11, with a blast on his big bass horn. Five thousand pupils of the National Institute of Music and Arts will form the world's largest orchestra on their special day at the Golden Gate International Exposition when youngsters between the ages of six and sixteen from all sections of the west present a full one hour concert.

be in Oregon for two or three weeks after which he will go to the State of Washington for a 10-day period.

Upon the conclusion of his Oregon investigation, including visits and studies of all hatcheries operated by the Oregon State Game Commission, Dr. Davis will advise the commission as to any changes or improvements he deems necessary in the interest of improved fish culture.

Dr. Davis announced that a biological station has been established at the old Clackamas fish hatchery with Reed Nielson, biologist, in charge for work in this region. The work of this station will be carried on in co-operation with the Oregon State Game Commission and the U. S. Forest Service.

BATTERY WATER LEVEL

The water level in the car's battery should be kept about a quarter of an inch above the plates at all times, according to the Emergency Road Service of the Oregon State Motor association. If the battery is located under the hood near the motor and thus subjected to considerable heat particular care should be taken to watch the water supply. A good plan is to check the battery at intervals of not more than ten days.

SUMMONS

In the Circuit Court of the State of Oregon, Jackson County
RUTH DAHLSTROM Plaintiff
vs.
ARVID L. DAHLSTROM, Defendant
To the above named defendant:

CHRISTIAN SCIENCE CHURCHES

"TRUTH" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, July 28.

The Golden Text was, "O God, my heart is fixed; I will sing and give praise, even with my glory . . . For thy mercy is great above the heavens; and thy truth reacheth unto the clouds" (Ps. 108:1,4).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "For as the rain cometh down, and the snow from heaven, and returneth not thither, but watereth the earth, and maketh it bring forth and bud, that it may give seed to the sower, and bread to the eater; So shall my word be that goeth forth out of my mouth: it shall not return unto me void, but it shall accomplish that which I please, and it shall prosper in the thing whereto I sent it" (Isa. 55:10,11).

The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "The understanding, even in a degree, of the divine All-power destroys fear, and plants the feet in the true path,—the path which leads to the house built without hands, 'eternal in the heavens.' That evil or matter has neither intelligence nor power, is the doctrine of absolute Christian Science, and this is the great truth which strips all disguise from error" (p. 454).

For a decree of the court dissolving the bonds of matrimony existing between plaintiff and defendant, and divorcing plaintiff from defendant absolutely.

This summons is served upon you by publication once each week for four consecutive weeks in the Gold Hill News, a newspaper of general circulation, published in Jackson County, Oregon, by order of Hon. H. D. Norton, judge of the above named court, which order is dated July 15, 1940.
