

## STRAIGHT FROM NEW YORK

**DAISIES WON'T TELL**  
Brown-eyed pussans embroidered nonchalantly around a bright green yoke and skirt hem of this New York creation add a touch of summer whimsy. Straight, slender and devoid of unnecessary details this pretty frock of beige spun rayon comes well within the government's fabric conservation requirements.

and returned home with his wife at the close of the party.

### SEWING MACHINES--GUNS

Home sewing needs are expected to be amply taken care of for some time despite the WPB order shutting down production of domestic sewing machines after June 15. Of course, there has been an increase in the amount of sewing done at home, but there are about 20,000,000 women who own machines. And there's a good supply from the stock of 800,000 in 1942 as well as this year's production of 250,000. Statistics ordinarily are dry but not when you translate the 29 pounds of pig iron used in one electric sewing machine into enough steel for 30 caliber machine gun.

### SLICED BREAD MAY GO

Get that knife and breadboard out again because the chances are that they will be called into service. It looks as if ready sliced loaves of bread may be another civilian casualty. Unsliced loaves save both labor and paper.

### BROKEN CUPS

It won't be a great catastrophe if you break a cup or if the cream pitcher falls to the floor during dish washing. A recent OPA regulation set a ceiling on the price of pottery articles. The regulation runs the gamut of Mrs. America's cupboard—dinnerware sets, cooking and baking dishes and even refrigerator jars.

### SUGAR SUBSTITUTES

The kitchen brigade is shifting attention from refined white sugar to other sweeteners for cakes now that sugar rationing is in effect. If you use honey as a replacement, experts advise that the measurements be matched cup for cup. However, use one half the quantity of any liquid required. For example, revise the original recipe listing one cup of milk to one cup of honey and a half cup of milk. Other ingredients remain the same. This tip is contained in "Victory Begins At Home" a make's sugar quota. It is distributed pamphlet of recipes to match home by the Consumer Division of the OPA.

### WANTED

We want wool, mohair, hides and pelts. Also scrap iron and all kinds of metal, junk batteries and radiators.

GRANTS PASS BARGAIN HOUSE  
626 S. 6th St. Grants Pass, Ore.

New Line of

Successor to Dr. Jud Rickert  
Specialist in all problems of  
eye comfort and vision  
308 Fluhrer Bldg.—Phone 4001  
Medford, Oregon

## Further Restrictions on Telephone Installations Are Necessary to Save Materials Vital to the War

The latest War Production Board Order further restricts the use by telephone companies of materials essential to the war effort. It restricts the building of cable or wire lines for the installation of new telephones, both business and residence, if more than a minimum of construction is involved—except for service necessary in the war effort or for public health, welfare and safety. It requires much wider use of party-line service.

The reason for these restrictions is to save additional quantities of critical materials used in providing telephone service—such as copper, aluminum, tin, steel, magnesium, zinc, nickel. These materials are urgently needed for the Nation's planes, tanks, guns, ships, munitions. They are VITAL TO VICTORY.

To install one extension telephone may require no more than 30 or 40 feet of copper wire, but to install thousands of them takes enough copper to wire a fleet of bombers.

The immediate effect of these restrictions upon the public will vary in different localities, depending upon what, if any, facilities are available. If you should be unable to secure the service you want, we know you will understand why. The temporary sacrifice of your personal convenience will make a worth while contribution to VICTORY—it is a real part of the price of protecting LIBERTY.

THE PACIFIC TELEPHONE AND TELEGRAPH COMPANY  
PUBLIC ENEMIES

Mrs. Rena Palmerton of Rogue River was a Gold Hill Visitor last Wednesday. While here she attended home-coming night at lodge.

We still have Vaneer Wallboard for sale, also a plentiful supply of most lumber and building materials. Lumber as low as \$25 M, surfaced. Copeland Yards, Grants Pass. 1-4c

Leona Holderness and Evelyn Christensen were guests of Mr. and Mrs. Steve Whipple last Thursday in Medford after playing in the band

at Eagle Point that evening for the graduation exercises.

Mrs. Claud Scott of Medford was a visitor in Gold Hill Sunday afternoon

Mr. Oren Palmer of Portland, visited over the week-end with his wife.

Eugene Burton who is employed in San Francisco, is home with his family until after the graduation of his daughter Mary Lou.

## What You Buy With WAR BONDS

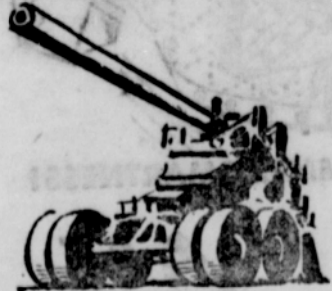

The giant four-motored Navy Patrol Bombers are the world's most powerful planes. They cost approximately \$700,000 each. The Navy also has a lighter Bomber called the Scout Bomber which costs about \$143,000 apiece.

The battle for Britain was almost lost because England had none of these giant four-motored planes with which to fight back. We need thousands of them and they are coming off the assembly lines in our production plants at a high rate of speed today. You can help buy these for your Navy by purchasing War Bonds and Stamps every pay day. Put at least ten percent into Bonds or Stamps and help your county go over its Quota.

U. S. Treasury Department

The 155-millimeter gun is the modern version of the old "GPF" of World War I days. It has a range fifty percent greater than the old gun, heaving a 95-pound projectile approximately 15 miles. It is capable of high road speed and each one costs \$50,000.

Arsenals of America are working at terrific speed turning out this long range, effective weapon for our armed forces. You and your neighbor working hand-in-hand in unity can make possible the purchase of an adequate number of these guns by buying War Bonds. Put 10 percent of your income in War Bonds to help reach your county quota, every pay day.

The Garand semi-automatic rifle, which is the standard issue today for the U. S. army, is superior to the old Springfield rifle in many respects. We literally need millions of these fast shooting powerful rifles to equip our army. They cost \$85 each and are being manufactured at the rate of one a minute. They fire sixty 30-calibre shells a minute.

Every one of the 40,000,000 employed persons in America could easily buy one of these rifles for the army. Not that we need that many, but the reserve could go into shells and other much needed supplies. Buy more and more War Bonds and top the quota in your county by investing at least ten percent of your income every pay day.
