WHAT WILL THEY DO

What will the boys and girls do this summer is a problem question for every parent to solve or try to solve now that school is out and leisure time is on the hands of many of these young Americans.

The older boys and girls will probably have little trouble keeping busy at work or play and in most cases care for themselves. The smaller boys and girls are the ones that will need a lot of supervised work and play to keep them contented and incidentally off streets and alleys. Some definite planning for the children of the community in the matter of recreation would not be amiss and no doubt this has or will be done by various organized groups interested in the boys and girls.

Business men and others should remember when a lonesome looking boy comes around with nothing in particular to do, to at least give him a kindly smile and help him overcome the sudden change from school and the crowd to the more quiet living with no school duties on his mind.

Nothing is quite so important as the welfare of the youth of the community or the nation as to that.

MUST HAVE LIPSTICK

Think twice before tossing away that used lipstick container, empty cold cream jar, or last years vanity case. They're all precious items because the metal and plastic shortages especially since many containers will no longer be made of these materials. Each year that fancy row of toiletries and cosmetics on your dressing table takes its toll of critical goods to the tune of five million pounds of plastics, 250,000 ton of steel, 2,250 ton of copper and 550 tons of zinc. That's the explanation for the contemplated packaging of cosmetics in paper, cellophane or other less permanent containers. However, the WPB toiletries and cosmetics branch doesn't expect to ration glamour yet. Perhaps women will not use more than they need.

Pick up and deliver twice a week.

Then the supply of lipsticks and other cosmetics will not use more than they need, adequately.

PONY EXPRESS TO RIDE AGAIN THE OLD OREGON TRAIL 28TH DAY OF JUNE SAYS SHERIFF'S

The Pony Express will ride again over the Old Oregon trail from Portland to Timberline Lodge on June 28, according to Herman Blaesing Jr. race chairman of the Clackamas county sheriff's posse.

This 70-mile relay event reviving the epic mail runs of a century ago was inaugurated last June when the Klickitat county sheriff's posse of Goldendale, Washington, delivered the mail bags to Timberline in five hours, 45 minutes 21 and 2-5 sec's. to nose out teams from McMinville, Oregon City, Portland and Oswego. It is sponsored jointly by the posse members of Lake Oswego Hunt Club and Timberline Lodge.

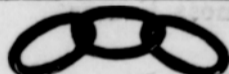

Sheriff Russell Woodward of Goldendale has already said that his deputies will defend their champion ship, and the sponsors expect at least five teams to run this year. The competition is limited to sheriff posse organizations and cavalry units of the United States Army, Blaesing said.

The race backtracks the Barlow Road Section of the Old Oregon trail, starting at Oswego Hunt Club crossing the Willamette river at Oregon City and then following the Clackamas, Sandy and Zig Zag rivers to the base of Mount Hood.

At Government Camp the route turns north on the Oregon Skyline trail to Timberline Lodge. Back Mount Hood national Forest Service officials last year built several new sections of trail to provide better footing for the ponies.

Seven horses and riders make up a team and each team is given a sack of mail to be relayed to the lodge. Special caches that are stamped on pony express letters by the postmaster at Timberline Lodge have covers among stamp collectors, according to Fred Van Dyke, Timberline manager.

Miss Dorothy Burket was a Medford visitor Saturday night returning to Gold Hill late Sunday.

GOLD HILL LODGE NO. 130
Meets Every Tuesday Night

YOU ARE WELCOME

Harry Newnham, Noble Grand
Walter McLean, Vice Grand
Wm. Autenreith, Secretary
Norman Gall, Treasurer

AMETHYST REBEKAH LODGE 97
Meets the first and third Wednesdays of each month at the I. O. O. F.

Hall, Gold Hill, Oregon

Irene Johnson, Fin. Sec'y
Della Kell — Treasurer

GOLD HILL GRANGE NO. 594
Meets first and third Thursdays

at 8 p. m., at their hall just above the Methodist church on Sams Valley road. H. E. club meets second and fourth Tuesdays at 1:30 p. m.

What You Buy With WAR BONDS

The 75-millimeter gun is a divisional weapon used by the Artillery as an anti-tank gun. It has been replaced to some extent by the more modern "105", known as the heaviest of divisional weapons. The 75-mm gun costs \$12,000 and has been converted by our Ordnance into a "blaster" twice as efficient as in the first World War.

This gun gets maximum power for minimum weight and cost, and the American people are providing the finance through the purchase of War Bonds. If you do your share and invest 10 per cent of your income in War Bonds, adequate supply of this efficient gun can be assured our fighting forces. Buy War Bonds every pay day.

The power of the greatest Navy in the world, our own two-ocean fleet, rests in large measure on its backbone—the Battleships of the Line. They displace approximately 35,000 tons and cost up to \$70,000,000. We have something like a score of these huge ships in the Atlantic and Pacific.

Eight huge battleships are under construction and more are contemplated. To finance these modern giants of the sea it is necessary for every American everywhere to buy more and more War Bonds. We can do it if everybody does his share. Invest at least ten percent of your income every pay day to help your country go over its Bond Quota.

Aside from the sixty-mile an hour Mosquito Torpedo Boats, the Sub Chasers are the speedsters of our Navy. Light and fast, they are the eyes of the Fleet on the water. They displace approximately 1,500 tons and cost about \$2,400,000 each.

We need many of these powerful, fast little boats to cope with the treacherous submarine type of naval warfare fostered by our enemies. Everybody can help pay for more Sub Chasers by putting at least ten percent of his income into War Bonds. Buy Bonds or Stamps every pay day. Buy them from your bank, your post office, or from your office or factory through the Payroll Savings Plan.

What You Buy With WAR BONDS

The Aerial Camera for use on Scout and Observation and Reconnaissance planes is essential to both the Army and Navy air forces in planning battle formations and in obtaining information on enemy fortifications and movements. They look something like a cannon, and cost about \$3,400 apiece.

The aerial cameraman can plot wide territories in bold relief so that Army or Navy Intelligence can make accurate measurements of enemy territory. We need many of these cameras so necessary to the air arms of the Army and Navy. You can help buy them with your purchases of War Bonds. Invest at least ten percent of your income every pay day, and help your country go over its War Bond Quota.

CHRISTIAN SCIENCE CHURCHES

"SOUL and Body" was the subject of the Lesson-Sermon in all churches of Christ, Scientist, on Sunday, May 24.

The Golden Text was, "Why art thou cast down, O my soul? and why art thou disquieted within me? hope thou in God: for I shall yet praise him, who is the health of my countenance, and my God" (Ps. 42:11).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "There is one body, and one Spirit, even as ye are called in one hope of your calling; One Lord, one faith, one baptism, One God and Father of all, who is above all, and through all, and in you all" (Eph. 4:4-6).

The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Soul is the substance, Life, and intelligence of man, which is individualized, but not in matter. Soul can never reflect anything inferior to Spirit. Man is the expression of Soul" (p. 477).

ject only to the limitations of strength and physical requirements, and they should be paid equally for the work. That's the opinion of William P. Witherow, President of the National Association of Manufacturers who says that as many as four million women may be employed by the end of 1943.

Manufacturers and industrial relations experts have been conducting a series of clinics throughout the county in order that they can adopt a 'sound approach' to the employment of women in war jobs.

Describing the survey, Mr. Witherow reported 'These unique on-line key war proucing centers stretch the spot 'women clinics' were being from New York as far west as Oklahoma City, for the purpose of exploring personnel and employment relations problems involved in the employment of a million and more women in war industries within the near future.'

The survey yielded some interesting facts on the feminine invasion of a hitherto largely masculine

field. For one thing, their presence in factories is stepping up the war efforts of the men.

At first the men resented the invasion of what was formerly strictly a male domain, but soon they began to slick down their hair, wear ties and even coats occasionally. In many factories the women began by doing more work than the men. The men couldn't stand that and they stepped up their own efforts.

If the fair sex does have the effect of accelerating the war production, women should be a welcome addition to our industrial battlefield. And certainly they should be paid the same wages forth sam work.
