SHALL WE CONTINUE THE DAILY?

On or before the first of January the MAST OREGONIAN will be issued as a morning paper, with complete telegraphic dispatches furnished by the Associated Press, if the people will guarantee it a circulation of 300 copies in the town. This will give its readers the news of the furnished by the Oregonian or any other journal. The people of Pendleton need a paper, and to have one they are obliged to give it their most liberal support. Unless the three hundred subscribers can space of a year or two. be obtained the publication of the morning daily will not be commenced, and lish, will be discontinued. Those who do not wish the daily discontinued will please take enough interest in the matter to assist in obtaining the required number of subscribers. Our excuse for putting the matter so plainly is because we are well aware that publishing a daily paper in a town with Pendleton's population is premature and unprofitable, but if the citisens will meet us half way they can have a daily paper which they will be proud of, and which would be a credit to a town as large again as Pendleton. Now the question is, do the people of Pendleton want a daily paper or not? It is for them to decide.

TWO QUOTATIONS.

The campaign is over, but it will do no harm for either Democrats or Republicans to reconsider and reflect further on the issues discussed during the past few weeks, and for that purpose we because reproduce extracts from two letters, both written by men whose views were in their day entitled to consideration.

The first is a letter written by Henry Clay, who is often quoted as a protectionist. But this is what he wrote on the sub-

"The sum and substance of what I conceive to be the true policy of the United States in respect to a tariff may be briefly stated. In conformity with the principle announced in the compromise act, I think announced in the compromise act, I think that whatever revenue is necessary to an economical and honest administration of the general government ought to be derived from duties imposed upon foreign imports. And I believe that in establishing a tariff of those duties such a discrimination ought to be made as will incidentally afford reasonable protection to our national interests. I think there is no danger of a high tariff being ever established; that of 1828 [was eminently deserving of that denomination. I was not in Congress when it passed, and did not in Congress when it passed, and did not vote for it; but with its history and not vote for it; but with its history and with the circumstances which gave it birth I am well acquainted. They were nighly discreditable to American legislation, and I hope, for its honor, will never be repeated.

"My opinion that there is no danger hereafter of a high tariff is founded on the

gratifying fact that our manufactures have now taken a deep root. In their inhave now taken a deep root. In their in-lancy they needed a greater measure of protection; but as they grow and advance they acquire strength and stability, and consequently will require less protection. Even now some branches of them are able to maintain in distant markets successful competition with rival foreign

The other is a more recent declaration, made not many months ago by that eminent Republican, Mr. Hugh McCullough. He used this language :

He used this language:

"I have not only been a Republican, but I was, as long as the party existed, a Whig of the Henry Clay school. I am very sorry that now, when near the end of a long life, I must discontinue my party connections—but when the party under had leaders, disregards its pledges, and determines to perpetuate a system of taxation which was adopted as a war measure only, and which now sustains, or is intended to sustain, one great interest at the expense of many other and

is for me no alternative. Upon the ques-tion now at issue, I stand where I have stood for years. I can remain with the Republican party no longer, without a sacrifice of principle and disregard of im-perative duty.

A MAN named Jordan, who arrived in Boston a few days ago from Durham, N. C., told a big yarn about naving been run out of Durham on peril of being murdered if he remained, because he ran for constable on the Republican ticket. The whole story was incredible on the face of it, and now reliable gentlemen of Durham tell the truth of the case, which is that he was invited to leave that place because he incited negroes to break open a construction car of the Northern & Durham Railroad Company, and possess themselves with 100 dynamite cartridges. and also to burn the residence of Caleb Green, which was actually destroyed, with other buildings in the town.

ONE of the Oregonian's chief delights, and its most congenial occupation, is to villify dead men. With ghoulish glee it loves to pour the gall of its hatred of humanity upon the graves of men who did not always in their life-time vote the Republican ticket. It thought it had a new victim the other day, when it was reported that W. H. Barnum was dead, but was a little premature, as Barnum, at last advices, was still alive. No prominent Democrat has died for years but has been followed to the grave by the inhuman curses of this Mr. Hyde of Port-

Two Emperors of Germany, father and son, have gone the way of all the earth within a few months, and now the third, the grandson of the old Kaiser who ruled so long, and son of the humane and progressive monarch whose time upon the day fully twenty-four hours ahead of that throne was so short, is reported ill. Though young, and a king, he is lut mortal. It would be a strange bit of history, if three Emperors of Germany, and lineal descendants one of the other, should give up the ghost in the short

Trace Mormon elders who had been in Marion county, Georgia, about ten the evening daily, which we now pub- days, were tarred and feathered, and warned to leave within twenty-four hours. It is said the tarring and feathering was done by about fifty of the best citizens of the county. The Mormons begged for their lives, and promised to leave, never to return. That's about the right way to treat those fellows.

> AT LEAST a few men, each with a few acres of ground on the river bottom land near Pendleton, could make more money by raising poultry, eggs, and vegetables, than most farmers make raising wheat on a quarter-section or a half-section of land. It is strange that this fact has not been taken advantage of before this by other people than Chinamen.

> THE Salem Statesman, itself a Republican paper of the straitest sort, thus pays its compliments to the Oregonian:

> "The 'malignant little scrubs of Oregon journalism,' as termed by the l'ortland Buzzard, are the newspapers that have brains enough to see through the arrant

DAKOTA must be a fine place to live. Two or three days ago they were having a nice lively blizzard, with snow not over SIGN two or three feet deep, and now it is reported that great prairie fires are raging. The fellows who didn't freeze to death will now have a chance to get warm.

The twelfth general assembly of the Knights of Labor is in session in Indianapolis. Barry, the Michigan Knight who was expelled, was present and tried to speak, but was not permitted to do so. Powderly will probably retain his ascen-

THERE are twenty-five or thirty cases of small-pox in Portland, and quite a number of cases in the Willamette valley and Southern Oregon. Portland had several cases of the disease when the Mechanics' Fair commenced, but this was kept secret.

CARLISLE's majority is 6,051, but the Republicans are preparing to count him out because the edges of some of the ballots cast for him were not perfectly The smooth. Of course they believe in a free ballot and a fair count.

VIRGINIA and West Virginia are still 'doubtful," though from the latest re- Manuf. ports it seems probable that the Democrats have carried both of them by small
