Senator Hoar made a great speech in the senate against imperialism, empire and militarism, but destroyed the force, as well as the effect of it by declaring at the close of his loyalty to the only political organization responsible for the evils he so eloquently condemned. To condemn a party and at the same time resolve to support it would appear to be a waste of breath.

Recently there was organized under the laws of New Jersey a corporation to be known as the Cuba company, with a paper capital of \$8,000,000. William C. Whitney, Levi P. Morton, J. W. Mackay, James J. Hill and others of like calibre are behind the company. Here we have an evidence that our word given to the Cuban people, that they should have independence, is not going to be fulfilled and that the island is to be annexed for the benefit of those who control large capital as well as have great influence upon national legislation.

Governor Pingree, of Michigan, has declared for Bryan and the democratic party in the presidential election this year. He says the trusts own the republican party and the only hope at present lies in the democratic organization under Bryan's leadership. Hazen S. Pingree is a progressive, forceful, enterprising man, and his declaration will have great influence, particularly in Michigan. It may even put the "gender" state in the Bryan column and "Billie" Bryan in the White House. Pingree has made a great record all over the country for clean government and popular rights.

When John W. Gates, the head of the American steel and wire trust, closed twelve mills and threw 5000 men out of employment, so that he might go down in Wall street and make a few more millions by dabbling in stocks, he supplied the democrats with a considerable quantity of campaign material. W. J. Bryan has already referred to the act of the "steel magnate," as follows: "The shutting down of the mills at the instance of an individual illustrates three things about trusts: First, how trusts can lessen demand for articles by raising the price; second, how helpless employees are in the hands of trusts; third, how consumers are plundered by private monopoly. I do not know much about Mr. Gates's speculation, but if what I hear is true it illustrates a new phase, that stockholders in trusts can be duped as well as the general public plundered."

Every republican state convention so far held has adopted resolutions "declaring" against trusts and monopolies, with the hope probably of tempering the wrath of the people against these combinations. But it is doubtful if these declarations will be accepted in power as making no effort at all to remedy the trust evil, although there is every opportunity for it to do so. It is evident that the trusts are indebted to the republicans for many of the privileges that they enjoy and that the promoters of the trusts are without exception strong supporters of that party. Promises made in platform amount to nothing unless performance is to follow, and it is plain to be seen that the opportunities to do more than to make declarations have not been taken advantage of to any extent. In short, in this regard the republican party has been weighed in the balance and found wanting.

A clash between European interests and the Monroe doctrine may come sooner than most people have expected it. Even the administration is threatening the American people in this connection by saying to them

through its newspaper organs that if they persist in their present determination to have the Nicaragua canal an all-American waterway, "a part of our east line" as the late James G. Blaine expressed it, and with fortifications and the right and the power to close it any time, we may have to confront a united Europe. Attention is drawn to the fact that as yet no European government, not even Great Britain, has in terms acknowledged the validity of the Monroe doctrine. The American people are told that "England's adherence to that doctrine in such a way as to make her morally a defender of it, with immense advantage to the United States, could have been secured if the senate had ratified the arbitration treaty three years ago, and to make England our ally so far as establishment and defense of the Monroe doctrine were concerned was the real purpose which Mr. Olney had in view when he negotiated that treaty, but the professional anglophobes of the senate would not have it."

A very determined effort is being made to defeat William Blakely's reelection as sheriff. The friends of George Peringer, the republican candidate for the office, are working with much enthusiasm, but in spite of it Mr. Blakely appears to have the best of the fight. William Blakely is widely known throughout the Pacific Northwest. He is a clean, earnest, honest man; sincere and straightforward, and, because of it, exceedingly popular with all classes. He is one of the successful, substantial citizens of the county, and prior to serving as sheriff was one of the sturdy tillers of the soil, his home being near Eastland, on the Wild Horse. He is a pioneer democrat, faithful in all things and in sympathy with his fellow men. The common remark that "Bill" Blakely is a good man is literally true. He is without guile, simple in his taste and a democrat by instinct, as well as by birth and training. As sheriff he is fully alive to his duty and as conscientious in the discharge of it as any man who has ever filled that office. The support which he is receiving for reelection is deserved, and a victory over Mr. Peringer, supported as he is in the campaign now on, will simply give testimony of the confidence and esteem with which Mr. Blakely is held by the people of the county in which he has lived for more than a quarter of a century.

SCRIBNER'S FOR MAY.  
Scribner's Magazine for May contains four illustrations, articles that are usually informing in regard to events and questions of contemporary importance.

The leading article on "Some Picturesque Sides of the Exposition" is both written and illustrated by the artist E. C. Heister. He has spent a number of months in Paris recently, and these drawings give an artist's impressions of the very picturesque group of buildings which will be soon crowded with visitors from all portions of the world. Mr. Folzotto's skill as a draftsman, shown in the Grosvenor and the Revolutionary series, in this magazine, has enabled him to make the best possible pictorial presentation of the great French exposition.

A great deal of information about "Rapid Transit in New York" has appeared in the daily press, but the first presentation of exactly what it means and how it will be carried out, and how the tunnel and its stations will actually appear, is contributed to this number by William Barclay Parsons, chief engineer of the Rapid Transit commission. The illustrations, drawn under Mr. Parsons's supervision, show precisely what this great engineering work will be like. The paper is an authoritative account of the whole project.

Nothing has been more remarkable in the history of the West than the entire change in Colorado in a few years from a silver-producing to a gold-producing state. Just a little while ago the gold output of Colorado was \$3,000,000 a year. It is now more than \$30,000,000, the greater part of it coming from Cripple Creek. Francis Lynde, the well known writer, describes this tremendous industrial development in an article on "Cripple Creek" prepared after a special investigation undertaken for Scribner's magazine. It is an astounding and dramatic story and it is fully illustrated by drawings made from photographs.

The narrative of the Boer war is continued with another brilliant article from H. J. Whigham, who reviews the alleged mistakes of the British generals in strategy and tactics, and discusses many much-disputed points in the campaign.

EVERYBODY'S MAGAZINE FOR MAY.  
The May number of Everybody's magazine is full of that sugar-coated information of which its conductors are making a specialty. There is not a dull page in the book, nor one which

sounds "educational," but no one can read this number without adding materially to his store of knowledge.

The "Simple Explanation" for the month describes in plain language the working of the telephone—"one of the simplest but most sensitive contrivances known to the electrical mechanician." The series of articles on the "biggest thing" in American industries is continued in this number by a description of "The Greatest Shipyard in the World."

A very interesting article is a collection of the experiences of eight or ten prominent stage people, telling of that moment when Opportunity first reached a hand to them. The article is entitled "The Turning Point in My Career."

"Helping the Cubans to Help Themselves" is a plain statement of a great charity, whose workings are not widely known to the public at large. It treats of the foundation and operation of the Cuban Orphan Society, which has undertaken the task of feeding and educating as many as it can of the little orphans in Cuba, whom the merciless depredations of "Butcher Weyler" left homeless, orphaned and destitute.

The short stories in this number are bright, original and good.

A CASE IN POINT.  
When interested parties, says Louis Post in his paper, "The Public," want an act of congress facilitating the "bank notes" that assure the public that there is really no profit in the issue feature of banking and that their sole purpose is to serve the people by furnishing them abundantly with currency. But when banks have got the act about as they want it, indiscreet financiers sometimes "give the snap away." Here, for instance, is the firm of Price, McCormick & Co., of 71 Broadway, New York, which sends out a business circular full of enthusiastic praise of the national bank money bill which has recently been enacted. A peculiarly interesting feature of this circular is a table which shows the profit a bank can make out of the issue privilege. It is not the work of some moon-eyed greenbacker, but has been put together in simple, though suggestive form by a firm of financiers, in order to stimulate two per cent bond purchases at a premium of 6 per cent, for the purpose of organizing national banks:

"TWO'S AT 100.  
Table showing the best advantage of income realized on the actual cash investment.  
\$100,000 2% would cost at 100 2000.00  
Less circulation issued against same 10000.00  
Actual cash investment 18000.00  
On which income would be received as follows:  
Interest on \$100,000 2% per annum 2000.00  
Less tax on net profit 500.00  
Less sinking fund to retire premium to be improved at 4 per cent 100.00  
Less expenses, cost of printing, etc. 100.00  
Net income 1350.00  
Equivalent to 2.5% per cent on investment of \$6000.

This table clearly shows, it will be observed, that under the new gold standard banking law, a national bank can exchange \$100,000 of its capital for \$100,000 of its own notes, made universally current by government endorsement, doing so at a cost of only \$6000, and not \$1200 a year by the transaction. In what legitimate business could \$6000 be put to such safe and profitable use?

# CATARRH: FORERUNNER OF Democratic Ticket.

CATARRH IS A CONSTITUTIONAL OR BLOOD DISEASE, and far beyond the reach of mere local remedies. Those who rely upon them for a cure lose valuable time, meet with disappointment and allow the disease to take firmer hold. Only a real blood remedy can reach this troublesome and dangerous disease.

S. S. S. cures Catarrh because it first cleanses and builds up the blood, purifies it, makes it rich and healthy, stimulates and puts new life into the sluggish worn-out organs, and thus relieves the system of all poisonous accumulations.

Mrs. Josephine Follis, of New West, S. C., writes: "I had Catarrh, which became so deep-seated that I was entirely deaf in one ear and all inside of my nose, including part of the face, stopped off. When the disease had gone this far the physician gave me up as incurable. I determined to try S. S. S. as a last resort, and began to improve at once. It seemed to get at the seat of the disease, and after a few weeks' treatment, I was entirely cured, and for more than seven years have had no sign of the disease."

S. S. S. is made of roots, herbs and barks of wonderful tonic and purifying properties. It is the only vegetable blood purifier known, and a certain and safe cure for all blood troubles. Send for our book on Blood and Skin Diseases, and at the same time write our physicians about your case. They will cheerfully give you any information or advice wanted. We make no charge for this.
