JUSTICE JUDGE RELEASED A BOY.

The Official Assumes Pre-emptive Control by Law Has Not Been the Custom Heretofore.

County Judge G. A. Hartman, in releasing a 17-year-old boy arrested on the complaint of his father, who charged him with horse stealing, has taken action in agreement with the provisions of the law and against the law. It has not heretofore been the practice for the county judge to handle any cases brought into the criminal courts, all such cases having been left for the justice courts and circuit court. The law places the power of the justice of the peace, or committing magistrate, and, too, provides for no fees being paid the county judge for such acts. This saves the county any costs in the premises, and involves having judicial authority always at hand in any case calling for prompt action.

In this case, it was stated by the father that the boy that the latter was a hard working lad, and that the boy had understood that he owned certain horses as pay for the labor he had performed on the home ranch. In taking away the horses from the pasture on McKay creek of the home place, Bertie did only what he supposed he had a right under the law to do, and unwittingly came in conflict with the statute which gives a parent the custody of all property earned or secured by a minor child.

Bertie was released upon his own recognizance, and the trouble, which was in the family, has been satisfactorily adjusted.

The action of the county judge in this matter, and the intention to pursue a similar course in other cases wherein he may act adversely, is commended generally, indeed, universally, by the taxpayers. It will add to the services performed by the county judge's office, and thus make it of the more value to the people.

NEW SCIENTIFIC PROCESS.

A Preparation Discovered That Will Destroy the Dandruff Germ.

For some time it has been known that dandruff is caused by a germ that lives on the scalp into little white scales, and by sapping the vitality of the hair at the root, causes falling hair, and, of course, finally baldness. For years there have been all kinds of hair stimulants and scalp tonics on the market, but there has been no permanent cure for dandruff until the discovery of a preparation called New's Herpicide, which destroys the dandruff germ. Destroy the cause and the effect will cease to exist. Kill the dandruff germ and you'll have no dandruff, no itching scalp, no falling hair.

WATCHES.

Of all kinds and our prices are the lowest.

We have but One Price and that is the same to everybody.

VIM VIGOR VITALITY FOR MEN

WORMS BILIOUSNESS... 50 CENTS

ATHENA, ADAMS AND WESTON NEWS.

The Demand for Harvest Hands has Raised Wages—Harvest Notes.

Athena, Or., July 15.—The scarcity of harvest hands and the urgent necessity for help have caused a horizontal raise in wages to the extent of about 50 cents per day for each situation. The change in the schedule of wages is most pronounced in the case of header-box drivers, who demand and are quite generally receiving \$2 per day. Heretofore, with very few exceptions, when \$1.25 per day only was paid, this class of harvest hands has received \$1.50 per day. Sack-sewers, stackers and hew-down men all come in for a raise. Sack-sewers receive not less than \$2.50, while \$3 is generally being paid, and \$3.50 is even being paid in isolated cases. Stackers are getting from \$2 to \$3 per day, and hew-down men \$2.50 to \$3. The reason for the variance in the wages is on account of the work varying with the different kinds of machines, and the difference in the number of men employed to do the work.

The above are the prices for Athena and Weston, generally, though, cases may be cited where the wages are not as yet had to advance their wage scale noticeably. Men are scarce, however, and wages there are also liable to raise. There is a scarcity of men L. Marleary, Spokane, and teams for hauling wheat from the fields to the warehouses, and good rates are paid.

Adams News.

Adams, Ore., July 14.—J. T. Lienallen commenced harvesting on his 160-acre field of wheat adjoining this town this afternoon. The wheat is of fine quality and will yield heavily. It will go up to 40 bushels to the acre, as yet, but is fairly estimated. He will be able to give the figures by Monday evening.

S. H. Christensen, representative at Helix for Platzeoer & Minger, of Pendleton, was in Adams today to have his team of horses shod. He states that Helix blacksmiths are overran with work.

Weston News.

Weston, Or., July 15.—G. A. R. McGrew returned today from a trip to Pendleton.

William Blair states that he will shortly commence building a warehouse near the mill, to give him better facilities for handling grain. The warehouse will be a size to hold about 2000 sacks of grain.

PLANS FOR PENDLETON STREET FAIR.

Traveling Men Will Assist—Gun Club May Have a Tournament—Other Features.

Several representative commercial travelers were interviewed on Sunday and today regarding a traveling man's day at the street fair proposed for Pendleton during the fall. Everyone who was consulted promised to lend his assistance, and advocate and agitate the scheme enthusiastically. Pendleton is situated so as to give easy access for the commercial travelers from all directions, and unless opposition which is now unexpected should develop they will come here and assist for a day in entertaining the crowds that will attend. It goes without the saying that, if the commercial travelers take hold of the enterprise, they will make it a success. For, they have never been known to do anything else with anything they have attempted.

The Pendleton Gun Club is working for a tournament during the fair. They will purchase one of the new mangatraps, which will attract many of the North Coast marksmen, and, indeed, at the Walla Walla shoot a number of them stated they would attend a shoot at Pendleton in case the home club would make arrangements for it. This would be a fine feature, and prove a valuable addition to the list of features.

The Pendleton Camera Club members have been consulted, and are thinking up some original feature whereby they could assist in entertaining the crowds. The club has some of the most expert amateurs on the coast, and will doubtless provide something unique and interesting. Their part in the program will attract many camera fiends from other towns.

Some of the local amateur athletes are working on the idea of a meet on one of the tracks here, probably on the quarter-mile bicycle course in the city. It would provide a whole day's sport of the most interesting character, and would be not less valuable than any other feature of the street fair.

The Pendleton horsemen are anxious to have a day's racing during the fair, and will do so if the dates do not conflict with the North Coast racing meets for which already the local horses have been entered. This will be a meet, if secured, that will not be second to any held on the coast this year, and will bring here horsemen and other people from all over the interior.

One idea has been proposed that would be a good one if worked out. It is to have an open air platform and seats, where each day a free entertainment would be given of various kinds, either all local talent, or part local and part professional. This will be done, if possible.

And the plans are only as yet in prospect. There will be other features thought of, and arranged for, and the fair will be made a success in every particular. A meeting will be called soon to consider the matter, and decide whether the fair shall or shall not be held.

PROGRESS OF TUTULLA'S HARVEST.

Everywhere the Combine, the Header, the Thresher, the Grain Hauler.

Tutulla, July 15.—Harvesting is in full progress. Thrashers, loaders and combined harvesters are running in all directions. On the ridge between McKay and Birch creeks, a small tract of country, five threshing outfits are at work, so reports Bert Blair, whose outfit is in that locality. On the reservation around Tutulla, very little grain has yet been harvested, except some work done by combines. There does not seem to be as many headers as threshers at work, hardly enough to keep out of the thrasher's way.

John Muir has just finished threshing Chris Nelson's grain, which yielded about 28 bushels to the acre, and which he has already disposed of for 50 cents a bushel.

M. H. Gillett's steam combine has just finished threshing G. O. Miller's crop, which yielded about 30 bushels to the acre and which he has sold to W. S. Byers for 50 cents a bushel.

San Binner has finished heading his Tutulla crop and taken his header to the reservation.

Messrs. Turner & Bell started up their new J. I. Case thresher on Mr. Bell's crop last Wednesday.

John Crow and O. F. Bowman started their steam thresher and three headers last week and will turn their 2500 acres of standing grain into straw-stacks and sacked grain as quickly as possible.

Mention of Tutulla People.

Gas Schraeder is down from Oakesdale, Wash., running M. H. Gillett's steam combine.

Wm. Yohanka, a former resident of Tutulla who has lately been farming in the Palouse country, has gone to Case Name. Mrs. Yohanka is spending the summer with her parents, Mr. and Mrs. Poase, on upper McKay.

Messrs. Friedley & Perkins were over from Stage gulch last week hunting a steam thresher for work in that neighborhood.

L. J. Kirk is down from Athena, looking after his Tutulla crop, which is being threshed by Messrs. Turner & Bell.

A. B. McCarty was up from Stage gulch last week for a combined harvester which he has purchased from the Holt company.

Tony Larsen and Peter Hansen took a trip to Helix last week where they formerly resided.

G. O. Miller, who is hauling grain to Pendleton was held up recently in broad daylight right on the street by a tall individual armed with a lead pencil and sheet of paper who fired a volley of questions which he was compelled to answer before pursuing his journey.

North Tutulla is said to be the happy possessor of a city council with a well developed artistic temperament. Now if there is anything more necessary for the proper performance of the arduous duties which devolve on a council, than a good voice for sampling whisky and kindred flavors, it is perhaps an artistic temperament. Recently an ordinance was passed with the object of making an artistic looking town out of North Tutulla; but, unfortunately, the artistic temperament of the business men of that suburb does not seem to have been properly developed. The ordinance lacks enforcement and North Tutulla will have to worry along as unartistic as ever.

How's This?

We offer one Hundred Dollars Reward for any case of catarrh that cannot be cured by Hall's Catarrh Cure.

J. C. CHENEY & CO., Props., Toledo, O.

We, the undersigned, have known E. J. Cheney for many years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.

The Peoples Warehouse. The Leaders.

Back From Manila.

Alex Manning, one of the company D. Second Oregon, members, arrived this morning from Manila. He received his discharge when the company left Manila, and remained to work for the commissary department. He left Manila on May first, on the Transport Meade, on which General Otis came home, and was detained fifteen days in quarantine at San Francisco. He will go to Pilot Rock to visit his relatives in his home. Mr. Manning was in Manila one year and ten months.
