Causes Surprise in London. London, July 21.—The announcement of the British cruiser Bonaventure's departure from Woo Sung alleged in pursuit of Li Hung Chang, comes somewhat as a surprise, but the confirmation of the news will meet the approval of large majorities, as Li Hung Chang's present attitude is regarded as being characteristically dubious.

The Chinese invasion of Siberia seems to have been checked so promptly that probably it will not be continued.

SHOWAWAY HAS TROUBLE IN MONTANA. Cayuse Chief and Telegraphs Col. Parsons to Come to His Assistance.

Paul Showaway, of the Umatilla reservation, is up in Montana attending to the sale of his horses, of which he owns a large number on the ranges of that state. It is said here by the other Indians that Showaway contracted to sell some horses to a buyer there, and that, when the time came to deliver, a disagreement arose as to the number of animals to be turned over. Horses being in good demand, the buyer wanted more horses than Showaway desired to sell, and it became necessary to secure legal assistance. He therefore telegraphed for Col. William Parsons, of this city, to go at once, and Col. Parsons went.

Showaway has been in Montana for sometime. He has quite considerable interests in horseflesh there. The present difficulty is on the Flathead reservation, so it is understood from the Indians who were in town today.

Says That Country Should Be Told We Are Not Seeking.

Lincoln, Neb., July 21.—Mr. Bryan today gave out the following in regard to the situation in China: "Everyone deplores the destruction of life in China and is horrified at the barbarities practiced. Everyone believes that it is the duty of our government to protect the lives and property of American citizens residing in China and I have no doubt that the administration will do so. For several years the European nations have been threatening to dismember China and it is not strange that their ambitious designs should arouse in China a feeling of hostility toward foreigners."

"That feeling, however, ought not to be directed against American citizens, and will not be if our nation makes it known that it has no desire to grab land or to trespass upon the rights of China."

GOVERNOR GAVE REQUISITION PAPERS.

But the Defence Brings Habeas Corpus Proceedings Here Today.

George C. Moore, the lawyer who came out with Sheriff Lon Kendall, from Whitley county, Kentucky, to get J. B. Bowlin, for alleged uttering of a forged check, returned this morning from Salem, Col. J. H. Raley also coming home, he being Bowlin's counsel.

Mr. Moore secured the renewal of the requisition papers from Governor Geer, and brought them to Pendleton, intending with Officer Kendall to leave this evening with their prisoner for Kentucky.

The defense instituted habeas corpus proceedings, and they were first heard by County Judge G. A. Hartman this afternoon. The defense were not willing to allow the prisoner to go back in the custody of the officers for the prosecution, and determined to resist by the means of habeas corpus proceedings.

The petition for a writ of habeas corpus sets forth that Bowlin is held under a warrant which is unlawfully issued, and that no court or authority of competent jurisdiction has passed upon the case. The argument of the case began at shortly after two o'clock this afternoon. Messrs. Carter & Raley appear for the petitioner, Bowlin, and District Attorney Hailey for the Kentucky officers, Moore and Kendall.

MAZAMAS GO TO MT. JEFFERSON.

This Year a Visit to be Made to the Hoary Sentinel of the Pacific.

Mark O'Neill, secretary of the Society of the Mazamas, sent out from Portland announcement of the annual trip of the members, which is this year to be to Mount Jefferson, on August 6 to 11, the annual meeting to be held on the latter date at the summit of the mountain, 10,667 feet above sea level.

The trip is destined to be one of interest, not only to scientists, but also to those who love the stern wilderness, the song and echo of mountain stream, the awful canyon, the ice crested glacier, and the genesis of geology.

The permanent "Cantonnment" of the society during its fourteen days' sojourn will be at Lake Parmelia, a visitable "glimmerglass" in whose waters, at early morn, is mirrored a true counterpart of Mt. Jefferson; thousands of trout jumping and splashing and hurrying its placid surface at sunset, and from a rocky shore where some undulating mountains and rugged peaks girding the horizon as in fancy. The society is at this time in a healthy condition, financially, with a membership of 230.

BEITING ON THE WEATHER.

Some Thermometers Show Rather Torrid Temperature the Past Two Days.

Pendleton feels ashamed that The Dalles heat her out in the matter of "hotness" on Friday. In The Dalles, it was 112 in the shade, while in the sun it was nearly as high. It was slightly more than 100 in the shade, while in the sun, it must be admitted, it was more. The mathematical editor has been too busy to compute the sun temperature, for the reason that his table of logarithms is out of order, and hence it wouldn't work.

All along the line, from every place from which reports came, the temperature has been such as to preclude the necessity of wearing overcoats in the middle of the day. Even at eight o'clock in the evening, it was necessary to wear nothing warmer than a light summer overcoat, and a few extra heavy men actually went through the entire evening without any overcoats at all.

Bets on the temperature were made, and the official report of the observer is awaited to settle them. The bettor has found a goodly number somewhere and has not put in an appearance since the expression, "Not a cent!" began to have application 48 hours ago.

The charms of this fine climate, however, are proven by the fact that, even with so high temperature, no cases of sunstroke occur, and men and teams work right along through the entire day.

Bingham Springs and return, including stage fare, three meals at hotel and a swim in the pool, \$2.75.
