FIGHT AT PEKIN'S GATES

Chinese Resisted the Entrance of the Allies Into the City.

Allyes into the City.

JAPANESE WERE FIRST TO ENTER

Americans and British Entered on the South and Japanese and Russians on the North—Legations Were Safe.

Shanghai, Aug. 18.—The general attack on Pekin began August 15, in the morning. The enemy obstinately resisted. The same evening the Japanese demolished the Cham Chang Lang and Tong Chi gates and entered the capital. The other armies entered by the Tong Quin gate. They sent detachments at once to the legations, where the ministers were found safe.

Brigadier General Berry Reports. Washington, Aug. 18.—The following dispatch was received from Brigadier General Barry, of General Chaffee's staff: "Taku, August 17.—The transport Indiana arrived on the 16th. All well. Will go to the front. Pekin was taken on the 15th. Legations safe."

The Fight at the Gates. Tokyo, Aug. 18.—General Yamaguchi wires from Pekin, under date of August 16: "The allies attacked Pekin early yesterday, opening with artillery on the eastern side. The wall was obstinately held by the enemy. The Japanese and Russians were to the northward of Tung Chow canal. The Americans and British on the south side. At night fall, the Japanese took up the two eastern gates of the tartar city and entered. In the meantime the Americans and British entered the Chinese city by the Tung Pict gates. Detachments of each force were sent towards the legations. The parties met near the legations and opened communications. All the ministers and staffs are safe. The Japanese lost over one hundred killed, including three officers; the losses of the allies was not ascertained. Four hundred Chinese were killed."

Captured Hai Cheng. Port Arthur, Aug. 18.—General Fleischer captured Hai Cheng, August 12, after three days fighting. The Chinese loss was 400 men and four guns.

Awaiting Details Pekin Capture. Washington, Aug. 18.—Official confirmation continued to pour in today that the allied armies had taken Pekin and that the legations were safe. But there is still an eagerness among the officials for details of the momentous event. The Barry dispatch spoke of Pekin as being "taken," which to a man of military training, clearly means that it was not without a struggle. This tallied with the Japanese admiral's statement of fierce resistance and a considerable number of casualties among the Japanese attacking party. Admiral Revo also used the expression that Pekin was "captured."

An Engagement Occurred. It is therefore accepted among officials here that the engagement occurred in the shadow of the great walls of Pekin. The war department is expecting almost momentarily details of the engagement. With the allied armies at Pekin and the legations rescued, it can be stated that the American administration considers one of its essential purposes accomplished, and that it now remains only to carry out its withdrawing policy. The purposes already clearly defined by this government. Although these purposes were made known some weeks ago in Secretary Hay's note of July 3, they now assume a special importance in the light of the work to be taken up. Four distinct purposes were laid down in this declaration, viz: The purpose of the president is, as it has been heretofore, to act concurrently with the other powers.

First, in opening up communication with Pekin and resuming the American officials, missionaries and other Americans who are in danger.

Secondly, in affording all possible protection everywhere in China to American property.

Thirdly, in guarding and protecting all legitimate American interests, and

Fourthly, in aiding to prevent the spread of disorders to other provinces of the empire and recurrence of such disasters.

The government at Washington considers that the first purpose enumerated is now achieved.

Regarding Troops in China. The intention of this government as to the withdrawal of troops from China cannot be stated at this time. Until information is received from Minister Conger and General Chaffee, no definite steps can be taken in negotiations for carrying out the purposes of this government in China.

EX-SECRETARY OF STATE SENTENCED TO LIFE IMPRISONMENT.

The Convicted Man Almost Fainted When the Verdict Was Rendered—Jury Took Only One Ballot.

Georgetown, Ky., Aug. 18.—Powers, charged with an accessory to the murder of Governor Goebel, was found guilty and sentenced to life imprisonment here today.

INVESTIGATION OF FOREST FIRES.

The Department of Agriculture Has Taken the Matter up.

Washington, D. C., Aug. 18.—An investigation of forest fires and reforestation on burnt areas is now being pursued by the division of forestry of the department of agriculture through Prof. C. S. Crankall, lately of the Colorado experiment station at Fort Collins. This work, which Professor Crankall began some years ago as a collaborator of the division, will be carried on chiefly in the northern part of the state, where the prevalence of Lodgepole pine makes the conditions very different from those in the Long-leaf pine region of which there is no record, the date of burning can usually be determined by the age of the trees which came up after the fire, and the necessary surveys and measurements can then be made. Special attention will be paid to the causes which make the cones of the Lodgepole pine open and distribute their seed. These are not yet understood and in view of the tree's habit of storing in seeds in the cone, often for many years, and getting them free when killed by fire, are very important.

Professor Crankall will have four assistants and will begin his examination in the Medicine Bow range.

The Division of Forestry. The great number of applications for the position of student assistant under the division of forestry which have this year been made shows how rapidly the interest in practical forestry is increasing. The pay, \$25 a month and expenses in the field, is not enough to be alluring to those who are not interested in the subject, and no attempt to advertise the opportunity has been made. Yet, although it was announced early in March that more candidates had already applied than there were places for, the number of applications kept steadily increasing, until finally 252 were received. This number is more than seven times as great as that of last year's, the first year's applications—35. In these applications it is noticeable that the majority come from in or near the large universities, where information regarding the opportunity, which had to spread chiefly by word of mouth, could circulate extensively. From Harvard and Yale alone 100 were received, while 77 more were scattered over different parts of the Atlantic states. Sixteen came from California, where several students from Berkeley and Stanford had appointments last summer. If this information could have been spread throughout the Middle states as easily as it was in the neighborhood of these larger universities, the number of applications would probably have been still greater.

The Sierra Forest Reserve. George B. Sudworth, the dendrologist of the division of forestry of the department of agriculture, recently left Washington to examine as much of the Sierra forest reserve of California, beginning in the north, as the season will permit, in order to determine the feasibility and cost of making a forest working plan for that section of the reserve. Such a working plan would be a detailed and scientific program for managing the reserve and harvesting its timber crop in such a way that the forests and their productive power would be maintained. This would imply the careful regulation of cutting and grazing, the adaptation of a system of protection from fire and trespass to the needs of each locality, and provision for the maintenance of the water supply in the regions dependent on the reserve for irrigation.

Adventists Camp Meeting. The Adventist denomination will hold a big camp meeting in Baker City commencing September 14. The big tent—7500 feet—will be pitched either on the ball grounds or on the vacant block west of the Weatherly property. Two noted physicians—Dr. Abbie M. Winegar, of Battle Creek, Michigan, and J. H. Ludsworth, of Spokane, will deliver lectures on health, during the meetings. Prominent ministers from different parts of the coast will take part and a large number of that faith from the outside will camp on the grounds during the meetings.

TO ASSASSINATE M'KINLEY

Fourteen Men of an Anarchist Circle Arrested.

THEY ALL CAME ACROSS THE WATER

Drew Lots to Determine Who Should Be the Assassins, and Eleven Italians and Three Austrians Were Selected.

New York, Aug. 18.—The Evening World says: "A high government official informed the Evening World that there are fourteen anarchists under arrest at the detention prison of the bureau of immigration. They are all charged with being in a conspiracy to assassinate President McKinley and have been taken singly and in pairs from incoming ocean liners within the last ten days.

The United States secret service agents learned that an anarchist circle in Naples had cast lots to determine who should be the assassins. Eleven Italians and three Austrians were selected. Their object was to strike individual blows at the president at the same time. That would have made success sure.

"As fast as the men arrived the secret service agents, disguised as emigrants, went among them and they were arrested. Meresca and Weida, caught yesterday, were two of the fourteen."

Guarding President McKinley. New York, Aug. 18.—Safe-guarding of the life of President McKinley from anarchists, or the more fearful class of cranks is divided equally between the United States secret service and the local police department, says a special to the World from Washington. To reach the president while in Washington, one must be known, or have trustworthy credentials, and every visitor is under constant surveillance and a menacing move would cause instant arrest.

George E. Postgr, one of the most trustworthy men in the secret service, is charged with guarding the life of President McKinley when he is traveling.

GUARDING PRINCE OF WALES. New System Inaugurated for Protection of His Royal Majesty. New York, Aug. 18.—Preliminary to the safety of the Prince of Wales during his stay in Hamburg include the inauguration of a new system for protection of royalty from the attacks of anarchists, says a London cable to the World. Under this system every member of a royal family traveling out of his own country has the services of a detective from each European bureau, whose special qualification is his intimate acquaintance with the dangerous anarchists.

New York's Population. Washington, Aug. 18.—The population of Greater New York, as given out by the census office, is 3,437,202.

The German-American Vote. McKinley received in 1896 not less than 80 per cent of the German-American vote, perhaps 85. Of the more than 400 democratic German-American newspapers, perhaps less than twenty supported Bryan. All the rest, republican, democratic and independent, advocated the election of McKinley. Today the more than 400 democratic papers, with the exception of less than about fifteen, support Bryan, and of these fifteen, not more than five, support McKinley, while the other ten will almost certainly be found in the democratic camp before the campaign closes. Of the republican and independent papers more than twenty already support Bryan on account of the administration and at least an equal number are decidedly antagonistic to the administration policies, but not yet supporting Bryan.

Is your Hair worth One Dollar? If so, buy a bottle of Newbro's Herpicide and stop the hair from falling out at work on the hair root, thus destroying the cause and consequently removing the effect.
