WHY MRS. PINKHAM

Is Able to Help Sick Women When Doctors Fail.

How gladly would men fly to women's aid did they but understand a woman's feelings, trials, sensibilities, and peculiar organic disturbances.

These things are known only to women, and the aid a man would give is not at his command.

To treat a case properly it is necessary to know all about it, and full information, many times, cannot be given by a woman to her family physician.

Mrs. G. H. Chappell.

alian. She cannot bring herself to tell everything, and the physician is at a constant disadvantage. This is why, for the past twenty-five years, thousands of women have been confiding their troubles to Mrs. Pinkham, and whose advice has brought happiness and health to countless women in the United States.

Mrs. Chappell, of Grant Park, Ill., whose portrait we publish, advises all suffering women to seek Mrs. Pinkham's advice and use Lydia E. Pinkham's Vegetable Compound, as they cured her of inflammation of the ovaries and womb; she, therefore, speaks from knowledge, and her experience ought to give others confidence. Mrs. Pinkham's address is Lynn, Mass., and her advice is absolutely free.

A CLEAN RAILROAD.

The Delaware and Lackawanna Carries Off the Prize in This Respect.

The Lackawanna railroad is the cleanest railroad in America. Even though it carried little for the comfort of its passengers, which it does, it probably would burn hard coal, for the reason that it owns the most extensive anthracite coal mines in Pennsylvania, and it is cheaper for it to burn hard coal, which makes no smoke, than soft. At any rate, there is no smoke from its locomotives. It is built for the most part through the mountains where rock is the material easiest of access, and its roadbed for that reason is rock-ballasted. There is, therefore, no dust. These two things are of unusual interest to the traveler by this line, for the reason that on no other road in the United States is there stronger incentive to keep one's eyes upon the passing scene. It is said of this line truthfully, that every mile is picturesque. It traverses the agricultural region of western New York, the valley region of central New York, the mountain region of Pennsylvania and New Jersey, and every mile offers a view that is beautiful, interesting and enraptured. In point of comfort its passengers are particularly fortunate, for, in addition to there being no smoke or dust, the cars are roomy, comfortable and scrupulously clean. Sleeping cars, parlor cars and dining cars offer all the conveniences and comforts of modern travel.

A STORY OF LORD RUSSELL.

He Confessed to Having Possession of a Stolen Property.

The late Lord Chief Justice Russell, of England, had an experience in his younger years which he told with much glee. He was at a theater one night, and the house being crowded he went to the pit, which makes one, you know, are of a mixed character, whose home in an American theater is well up under the roof. There was standing room only and the pit was packed.

All of a sudden a man at his side cried out that his watch was stolen. Mr. Russell and two other men were huddled in. "It is one of you three," cried the man minus the watch. "Well, we had better go out and be searched," said Mr. Russell, with the air of a man who did not fail him at a trying moment and an excited crowd. A detective was at hand and the suggestion was accepted.

As Mr. Russell walked out the idea flashed through his mind that if the man behind him had the stolen property he would probably try to surreptitiously slip it into his front rank man's pocket as though he drew his coat tails about him—only to feel, to his horror something large and smooth and round already in his pocket. While he was still wondering what this might mean for him, the detective energetically seized the hindmost man, exclaiming: "What you rascal! It is again!" To Mr. Russell and the other man he apologized and bade them go free. But Mr. Russell, before he had taken many steps, reflected that he could not keep the watch. He went back to the box office and explained, with a courage on which he afterwards said that though he did not take the watch he had it. So saying, he put his hand into his pocket and pulled out—a forgotten snuffbox.

GEN. MACARTHUR REPORTS

Sheer Force of Arms Required to Conquer the Filipinos.

MUST HAVE TWICE AS MANY MEN

Report Made in September, But Not Made Public Until After Election, for Obvious Reasons.

Washington, Nov. 10.—General MacArthur's annual report, written September 1, was made public here today. Every question of the Philippines is treated and the inference is drawn by many of those at headquarters that if the United States wishes to conquer the Philippines it must be done by sheer force of arms.

Must Have More Soldiers.

General MacArthur gives the war department to understand that more soldiers, double the number there now, are required to make any headway against the insurrectionists.

MacArthur's report has been in Washington for several weeks, but was not made public before the election for study and obvious reasons. Salisbury Congratulates McKinley. London, Nov. 10.—Lord Salisbury's speech, at the Lord Mayor's banquet last night, in which he expressed extreme satisfaction over the re-election of McKinley is subject of much comment today, some of which is unfavorable.

The Star says: "It was indiscreet in Lord Salisbury to congratulate Mr. Choate so effusively on the victory of McKinley."

Northern Pacific Earnings.

September earnings of the Northern Pacific were considerably lighter than during the corresponding month last year. This is largely due to crop failures in the middle west. September earnings are \$2,065,894.95, a decrease of \$100,772.15; operating expenses, \$1,427,154.73, an increase of \$140,193.05; net earnings, \$1,538,740.15, in increase of \$336,495.21; taxes, rentals, betterments, etc., \$299,619.07, decrease of \$245.07; net operating income, \$1,239,121.11, decrease of \$324,031.14; miscellaneous items, net 27c including land sales, \$63,717.33, an increase of \$35,145.67; net income of main system, \$1,302,838.04, a decrease of \$288,844.47; from proprietary lines, \$50,003.88, an increase of \$764.07; total, \$1,352,841.92, a decrease of \$283,119.80.

Birmingham is England's Top Shop.

Perry made the first steel pens at Birmingham in 1824, selling them at 90 cents apiece, says the New York Press. The weekly output of that city just now is 20,000,000, and some are sold for five cents a gross. After pens come pins, iron and steel wire, metalic strings for pianos. One house alone makes eight tons of these a week. Fifty thousand wedding rings are made there every year. All the canaries in England live in cages made in Birmingham, and all the bronze money is turned out there, the coinage amounting to 82,000 penny pieces every 24 hours. Twelve tons of pins are manufactured every week. Screw-making is one of the important industries, and that which made Mr. Chamberlain a millionaire.

The Prohibition Vote.

At the national prohibition headquarters in Chicago the estimate is made that the total vote in the nation would exceed 400,000. This estimate was based on the receipt of about 400 telegrams received from 26 states. This is more than three times the vote cast for Leveing in 1896. John G. Woodley anticipates a vote approximating 500,000, basing his claim upon the country prospects which are yet to report. Indiana, Ohio, Michigan, New York and Pennsylvania are thought to have polled a vote fully four times as large as in 1896. Illinois is estimated at nearly three times the vote of 1890, or 27,000.
