A FEW SMALLPOX CASES

They Are Very Mild, But Nevertheless Cause a Discussion.

Several cases of smallpox have recently come to the knowledge of the health officer, in addition to the two referred to in the East Oregonian two weeks ago. These new victims are members of Miss McIntosh's grade of the public schools, and her room is closed and will remain closed for two weeks, or until danger from the contagion has passed. Carelessness of parents in reporting cases of smallpox and scarlet fever to the board of health, and in some instances neglect in calling a physician, have given these diseases more headway than necessary.

"While these cases are trivial as far as the patients are individually concerned," said a member of the board, "they cause unnecessary trouble in the public schools and to the board of health, so that it has been determined where cases of this kind are unreportedly withheld from the knowledge of the proper officials to make an example of those offending."

The particular brand of smallpox prevalent is of a very mild type, so that those afflicted are not even required to remain in their rooms, so far as their health is concerned, and have gone to school right along until compelled to stay away by the principal.

A Good Thing. Our great-grand mothers' garrets contained the sum of all healing found in Karl's Clover Root Tea. They gave our ancestors strength, kept the blood pure, and will do the same for you if you say so. Price 25 cts. and 50 cts. Tallman & Co., leading druggists.

Many people worry because they believe they have heart disease. The chances are that their hearts are all right but their stomachs are unable to digest food. Kodol Dyspepsia Cure digests what you eat and prevents the formation of gas which makes the stomach press against the heart. It will cure every form of indigestion. Tallman & Co., leading druggists.
