THURSDAY, DECEMBER 13, 1900.

DAILY, WEEKLY AND SEMI-WEEKLY

East Oregonian Publishing Company, PENDLETON, OREGON.

Subscription rates table with columns for Daily, Weekly, and Semi-weekly rates for various durations.

The flag is not to be hauled down, nor are the appropriations, judging how congress is spending money. The people are informed that it will require \$700,000,000 annually for the needs of this government for the future, which is quite close to \$2,000,000 a day which the people who labor have to supply indirectly from their earnings.

During the year that ended June 30, 1900, 448,572 immigrants arrived in the United States, a gain of 43 per cent over the preceding year. The people of foreign countries are beginning to hear of the prosperity on this side of the water and the tide of immigration is simply increasing in response to it.

Congressman Boutelle, of Maine, who lost his mind some months since and is now a hopeless invalid, is to be pensioned as a naval officer with the pay of captain on the retired list. Congress, out of sympathy for him, will do this on the strength of the rather slim excuse that he was for many years chairman of the house naval committee and is a man of no fortune. No wonder the pension burden is growing when every afflicted politician is to be comfortably taken care of by those having charge of the spending of the people's money.

The Lawton Standard, a weekly paper published at Lawton, Grant county, by Frank G. Hull, who is also publisher of the Milton Eagle, makes the following unfeeling remarks: "Pendleton papers view with remarkable satisfaction the evidences of improvement in and around Milton and naively inform the people of that burg that the long-talked-of division of Umatilla county will not now be necessary. Pendleton is fooling herself. Every new citizen and every accumulated dollar in and around Milton makes the partition of that county all the more certain; and some day, and that not far distant, the goose that lays the golden egg will have foregone from the land that has profited by it for so long many years. The garden spot of Umatilla county is in the vicinity of Milton, and this means it is the taxing spot also. Ere long Pendleton must depend upon her own resources for support and unhand the long suffering people of the east end." The Standard may be sincere in this matter but the East Oregonian doubts it. That paper must know that the "garden spot of Umatilla" absorbs even more tax money than it contributes and has done so for several years past. Particularly this year the burden of crime in the "East End" has been larger, while its contribution of taxes has been smaller. Further other county expenditures on behalf of the "East End" have been quite "liberal," until it has become more of a burden than a benefit. Now as to Pendleton and the business interests of the town nothing is expected from the "East End" and little is received. Milton and Milton people give their trade to Walla Walla. The goose that lays the golden egg, if there is any of that species in Milton, does his laying in the Garden City, but Pendleton has no regrets and neither does it have any fear of the bugaboo of division. Pendleton is able to take care of herself.

The people of Pendleton have passed that point of living in expectation of receiving something from nothing, as does our friend Hull and his two lean sheets.

James J. Hill, president of the Great Northern railroad, and a man who builds ships himself, says the ship-subsidy law is not needed; that it will accomplish no good; that the millions it proposes to take annually, out of the people's pockets would go to those who have millions already. He states that he has investigated the merits of the subsidy bill now before congress and he cannot find any ground on which to approve it. He states that if we could pay a tonnage subsidy on a certain kind of commodities, based on the distance carried, there would be some justice to a subsidy law. Mr. Hill investigated the first bill and found out of the \$9,000,000 which were to be taken from the people about \$7,500,000 went to what is known as the "American Line." Mr. Hill inquires: "Why should we as a nation, pay \$9,000,000 a year for thirty years and have seven-eighths of it go to 10 or 12 ships? The bill as now drawn proposes to distribute pro rata among all the shipments under the American flag and sets apart 30 per cent for the Pacific ocean. This concession to the Pacific Mr. Hill thinks, was a sop to him, but he says he would rather have the duty taken off the plates that go into the ships when they are built, and that would do more for the ship industry than a subsidy such as the bill proposes to distribute. Mr. Hill concludes his statement: "If congress will appropriate \$180,000,000 for a class of ships that will reduce the cost of carrying our commerce we will have a right to feel that they have done well, but we don't think that they should give the bulk of it to 20 or 21 ships that are only compelled to run 21 knots once to the satisfaction of the governmental officer detailed for that purpose."

At the tenth annual meeting of the New York Vegetarian Society Prof. D. Berkeley talked on "Eating," from which the following paragraph is taken: "When I quit eating beef about eight years ago I began to receive that normal condition which a man should enjoy before he can become a successful business man. I have not eaten beef since then. About nine years ago I read a newspaper paragraph about the rapid increase of cancer in England. It was then discovered that cancer was most prevalent among well-to-do men and women, the beef eaters, whereas it was scarcely known among the common people, who get little beef to eat."

He compared the human being to the backsaw, which worked badly and not properly sharpened and set or was rusty. "The country is full of drunksards," he said, "the jails full of criminals, and the asylums full of insane, all because they are not being properly educated in the way they should live or care for their stomachs. Their heads are filled with book knowledge, but they have very little intelligence."

Dr. Albert H. Hoy, who has published a book on "Eating and Drinking" discussed the most mooted subject of exercise and its effects on the health, to a newspaper man. "I am speaking," he said, "about exercising for the business man, not about exercise for the young or for laborers. Every action, whether of the brain or of the muscles, destroys cells, uses up tissue and creates so much waste matter to be taken up by the blood and to be eliminated from the system. "Now, unless such waste is eliminated it becomes so much poison in the system. The great eliminating machine of the human body is the kidneys. Unless the kidneys do their work the system is saturated with poisons. "For instance, there is the sad case of Senator Davis. His toe was poisoned by his stocking and refused to heal. Kidney complaint developed, or rather the kidneys for a long time had not done their full work, and the system was so poisoned that the toe became gangrened."

"The kidneys work easily during youth—up, say, to 35 years of age. But after 30 they become slightly atrophied; they shrink a little. This is not disease, but a simple effect of age. Consequently, as a man advances in years he should ask his kidneys to perform a little less work, instead of a little more. "But suppose a man of business not only uses his brain during business hours, but also puts a strain on his muscles afterward. There is waste then to be carried off, mental waste and physical waste, the broken down brain cells and those of the muscles likewise. Thus the kidneys are forced to do double duty to eliminate poisons resulting from two sets of action. "A business man should get all the exercise he needs from the requirements his business. A long walk only further calls upon his reserve. Violent golf or tennis only puts a greater strain upon his system. If he says he needs fresh air, oxygen, he can get it in his office, if the latter be properly ventilated. Or he doesn't need to ex-

ercise to breathe fresh air. John D. Rockefeller drives a fast horse. That gives him air, but it doesn't give him exercise except what he gets from stepping from his office to his carriage. He is never sick. Senator William M. Everts is a very old man. He never exercised. That is his boast. "But business men say 'I need exercise. I do not feel well unless I have it.' That means generally that they eat too much. You can poison your system by eating too much, putting into yourself more than the kidneys can eliminate. Now Chamberlain, who takes no exercise, I have no doubt is a light eater. "The thing to be attained is a proper balance, a norm, so to speak. One should eat sufficiently, but no more. He should not put into himself what cannot be easily eliminated, nor should he indulge in both mental and physical exercise, thereby causing an excess of waste, which the kidneys are unable to deal with. "When a business man takes a vacation he can afford much more physical exercise. I went recently to Michigan last summer and cut the connecting links behind me. I didn't think at all and played golf five hours a day. Even then I was careful to rest afterward. Where there was little brain waste I could afford more physical. "The athlete is not the best prepared man to resist disease. I have known a blacksmith to oppose no resistance to pneumonia and the strongest athlete to die quickly of typhoid. "I have not been speaking of exercise for the young, but the grown man. Youth needs exercise to build up muscles and growing tissues. But while you see puppies and colts scampering around, the old dog knows better and so does the horse. They rest when they can. Athletes who come out of college and go to desk work often have great difficulty. Excessive exercise enlarges the heart, so that it may do its work. The heart is a muscle, and you can't lessen a muscle. When the football player becomes a desk worker he has no need for his great heart. It is too big and it becomes clumsy."

Itch! Itch! Itch!

Awful Itching of Eczema Dreadful Scaling of Psoriasis CURED BY CUTICURA

CUTICURA SOAP, to cleanse the skin of crusts and scales, CUTICURA OINTMENT, to allay itching, and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood, make the most complete and sure cure treatment for torturing, disfiguring humors, rashes, and irritations, with loss of hair, which have defied the skill of the best physicians and all other remedies, a single set being often sufficient to cure the most obstinate case.

SO NERVOUS I COULD NOT SLEEP.

When there is disease of the delicate female organism, it is only a question of time until the general health becomes undermined. Nervousness, sleeplessness, loss of appetite and "sinking spells" produce suffering almost indescribable. There can be no restoration of the general health until the local health of the womanly organism is re-established.

Dr. Pierce's Favorite Prescription establishes regularity, dries offensive drains, heals inflammation and siccation and cures female weakness. It encourages the appetite, tranquilizes the nerves and induces refreshing sleep.

"You would be surprised if you could have seen me when I commenced taking Dr. Pierce's Favorite Prescription," writes Mrs. Isaac S. Harris, of Gayville, Yankton Co., S. Dak. "I had had stomach trouble for years and was so nervous I could not sleep. We have spent a lot of money doctoring, but there was not one thing that I took that did me any good except for a short time; till I commenced taking Dr. Pierce's Favorite Prescription and Golden Medical Discovery. In three days after I commenced taking his medicine I could see a change for the better, and from that time I have steadily been getting better. Can walk or ride to any place I want to, and I feel like a new person. I can sleep at night and never get up tired in the morning; can eat anything and I don't have any."

Dr. Pierce's Pleasant Pellets cure biliousness and sick headache.

ercise to breathe fresh air. John D. Rockefeller drives a fast horse. That gives him air, but it doesn't give him exercise except what he gets from stepping from his office to his carriage. Christmas Present

Nothing would please them more than a

PENDLETON BLANKET OR AN INDIAN ROBE

The mill is now running an extra fine grade for the Christmas trade and merchants will shortly have a fine assortment from which to make selections

Pacific Fraternal Relief Society, PORTLAND, ORE. Charter Perpetual

The object of this Society is to furnish to its members a weekly indemnity for loss of time by reason of sickness or accidents, also to those who may desire, a funeral benefit may be added for a small additional cost. Men and women between the ages of 15 and 60 are eligible, provided they be of good moral character, and their application show them to be in good health. Benefits are payable not to exceed twelve weeks in any one sickness nor to exceed (a) twenty-four weeks during any one year. Members are entitled to weekly benefits three months after date of certificate and funeral benefit one year after.

Why you should become a member of the Pacific Fraternal Relief Society—Because sickness and accident are afflictions common to all. Because it indemnifies you against loss of time in case of sickness or accident, which always comes when least expected, because where it is possible that you should never be disabled by sickness or accident, it is worth more than it costs to know that you are protected. Because it is not large sums of money or great fortunes that produce the greatest amount of happiness, but it is the little ready cash that is on hand at the right time. Because by making a small monthly payment into the Pacific Fraternal Relief Society, you can secure for yourself and those dependent upon you, a financial benefit that will take the place of your weekly savings, at the time of your adversity and thereby protect yourself, your family, your estate, your reputation and your peace of mind. Because no person, whose time is his capital, can afford to let this capital go uninvested. Therefore, accept today this grand and important protection—tomorrow may be too late.

Persons engaged in extra hazardous occupations will not be admitted to membership.

Table of Benefits and Monthly Payments—Class A, for weekly benefit, \$1 per month; Class B, for weekly benefit, \$2 per month; Class C, for weekly benefit, \$3 per month; Class D, for weekly benefit, \$4 per month. Certificates for weekly benefit for more than \$4 will not be issued to women, nor to anyone under 18 years of age.

Funeral Benefit—Members desiring the Funeral Benefit of \$50 may obtain the same by paying in addition to their monthly dues as follows: Age 15 to 30 inclusive, \$1 per year; Age 31 to 40 inclusive, \$1.50 per year; Age 41 to 50 inclusive, \$2 per year; Age 51 to 60 inclusive, \$2.50 per year.

Head Officers—President and general manager, W. E. M. Martin, Portland, Ore.; Big Yank Mining & Milling Co., vice-president and general manager, J. E. Shumway, Portland, Ore.; secretary and treasurer, Charles Kemp, Portland, Ore.; room 215, Alamy Bldg.; committee, Henry S. Kayser, Portland, Ore.; room 714 Chamber of Commerce. Financial officers bonded.

If you are interested in this plan, either call on or send your name and address, and we will call on you. Address all communications to
