Sense about Shoes

More shoes are worn too wide and too short than any other fault, causing bunions and misshapen feet. Think of this when you want shoes and go where they carry large lines of different styles and widths and where they make a study fitting feet. We keep the styles and widths and we have made the fitting of feet a study for years. Come and see us. We will give you satisfaction.

WIRE FENCES BLOWN DOWN.

Tumble Weeds Banked Against Them and Wind Did the Rest.

To state that a wire fence can be blown down by wind seems incredulous, but can readily be believed after an explanation. J. M. Hinson, who lives a few miles southwest of Helix states that he will have to reset about 400 posts in the fences on the east side of his fields. Other farmers in his vicinity will have to do likewise. Tumble weeds are the primary cause of the damage. In the fall, after having been cut off or pulled up with weed destroyers, they are blown across the fields until they come against the fence on the east side of the fields, the winds being of the west variety. The weeds bank up against the fences clear to the top, and make such a resistance to the wind that the posts give away, and down goes the fence. The farmers from the Helix country report that the wheat fields are remarkably free from weeds at this season of the year.
