Blank Books and Stationery.

All the latest Magazines and Periodicals.

TOILET ARTICLES.

Tallman Co., LEADING DRUGGISTS.

Last of this week...

Will have on display a complete line of spring and summer styles of shoes which includes the newest shapes and shades. Would like to have you call and inspect the entire stock.

WM. FITZGERALD,
Main Street, next door to Hansford & Co.

N. Berkeley has some very desirable town and country property for sale on easy terms.

Residence property for sale. Inquire at law office of Bean & Lowell, Association building.

A purse has been found and awaits the owner. Call at the East Oregonian office and prove property.

R. W. King, evangelist, will commence holding a series of revival meetings at the Baptist church on Sunday evening, March 17.

Mrs. A. M. Waggoner will have her beautiful pattern hats and up to date street hats on exhibition, Monday, Tuesday and Wednesday, Hotel Pendleton, rooms 3 and 4.

Philip Johnson and Florence Lamb took out a marriage license at the county clerk's office this afternoon, then hid themselves to Justice Fitz Gerald and had him perform the ceremony which made them husband and wife.

The business at the county clerk's office has been decreased by recent legislation and the county court Monday afternoon decided that it would be best for County Clerk Chamberlain to be allowed but one deputy instead of two. H. W. Fowler, who has been deputy clerk, has resigned his resignation with the clerk for some time, as he wished to engage in business, so his resignation was accepted. Mr. Fowler may decide to remove from Pendleton in order to carry out his business plans.

ATHENA NEWS.

Rosecoe King and Miss Cora Waddingham Married.

Athena, March 12.—On Sunday, March 10, at the residence of the bride's parents, nine miles east of Athena, Miss Cora Waddingham was married to Rosecoe King. The ceremony was performed by Rev. Payne, of the United Brethren church, of Weston. Only immediate friends and relatives were present.

Mrs. J. W. Smith and children and Miss Lupton, are visiting this week with Mr. and Mrs. Waddingham, at the Wild Horse home.

W. J. Wilkinson, the Athena grain buyer, is transacting business at Lapwai, Idaho, this week.

S. H. Pinkerton yesterday sold to Jesse Hales, of this place, a fine team of matched black drivers. The price paid was \$250.

A. O. Carlen, of Pendleton, spent Sunday in Athena, visiting with his father.

J. W. Smith was transacting business at Pendleton yesterday.

Revival meetings are being held at the Methodist and Christian churches. Considerable interest are being taken in these meetings.

The Whitman College Glee club will give an entertainment here this evening. They are assured a full attendance as all seats are sold.

Charles Bells, manager for the Athena Mercantile company, of Athena, of their Helix branch store is transacting business in Athena today.

Alfonso Roy, was taken seriously ill with pleurisy Monday evening, but is somewhat better today. Mr. Roy was unable to be up after being confined to his room with a broken leg.

WHITMAN COLLEGE STUDENTS.

Give a Jolly Program Tomorrow Evening at the Frazer.

Anyone who has heard a crowd of jolly college students singing their jolly college songs, in their jolly, rollicking manner, will enjoy the entertainment tomorrow, Wednesday, evening at Frazer opera house. The Glee club of Whitman college will be here and render a program which is sure to please you, unless you are like a wooden man, in which case this announcement will not interest you.

Anyone who likes the singing of a company of well selected male voices, the owners being well trained and performing their work conscientiously, will want to hear this entertainment. It will be one of the most pleasing programs of the season in the opera house repertoire.

Prof. O. A. Hauerbach, heard here frequently as a reader; Prof. Edgar S. Fischer, teacher of the violin in Whitman college conservatory; and Miss Laura James, pianists and accompanists, will assist the Glee club.

Prices will be 75c for parquet and box seats; 50c for the circle; and 25c for the gallery.

The time is tomorrow, Wednesday, evening, and the occasion one that should bring out all who love a good thing in the line of music.

ADJOURNED TERM OF COURT.

The Case of W. M. Pierce vs. Louis and Felix Audette is on Trial.

Judge W. E. Ellis is presiding at an adjourned session of the January term of circuit court. The case of W. M. Pierce vs. Louis and Felix Audette is on trial. William M. Pierce is the plaintiff, and James A. Fee for the defendants.

The case of Smith vs. Smith & Nicely, set for March 14, was dismissed this afternoon. It was settled out of court. Carter & Haley were attorneys for the plaintiff and it was dismissed on their motion.

The case of the Bell City Manufacturing company vs. Searcy, set for March 15, was dismissed this afternoon without prejudice, on motion of Carter & Haley, attorneys for plaintiff.

The following named, summoned as jurors, are in attendance: J. K. Davidson, T. Tucker, Henry Moulton, S. R. Caplinger, Iven O'Hara, Ed Simpson, A. J. Shaw, L. M. Watrus, H. M. Woods, William McBride, W. P. Leach, John Harvey, Gibson Morrison, G. T. Elgin and Hank Fanning.

S. McLeod and T. B. Wells, who were jurors at the regular term of court in January, held over and are jurors at the adjourned term now being held.

E. E. Davis was found dead in bed at Albany. His death was due to heart disease. He was 50 years of age. He came to Oregon in 1852 with his father, Dr. H. A. Davis, who afterwards located at Harrisburg.

PROGRESSIVE PENDLETON.

That is the title Robert Burns Says Applies.

Robert Burns, agent for the Oregon Railway & Navigation company at this place, says the Walla Walla people have returned from Pendleton where he attended the convention of woolmen and was present at the degree work of the Knights Templar for this city. Mr. Burns praises the people of Pendleton and the way they have everyone had a good time and that the meeting was productive of much good.

"Pendleton is a progressive city," he said, "and one that will serve as a good example to many cities which are much older and much larger. The people stand together and work for the benefit of the city. That is something to be commended and something that the citizens of every place that wishes to grow and to advance with the times should cultivate."

"There are thousands of homeseekers going through our main line daily. They are seeking homes but they have the coast fever and will go through to tide water or burst. There are very few of them that could be induced to stop off short of the ocean. But that is all right. Later on they will come back where they can do the best."

"Among those who come through there are many who would be undesirable as citizens of Walla Walla. They are men who are depending upon day labor for their living. These men came west hoping to take up land. There is no land to be taken up in this valley. The land is so valuable to stand idle. Almost every foot of it has been farmed for many years. These men have no money to purchase an valuable land as that we find about here. They are going to a wholly new country or to one of the big cities where they can secure employment."

"But there is another class and they have money to spend and desire farms that are improved and ready for them. They do not want carve a garden spot from the wilds of nature, they want to settle down and make money while they also enjoy the beautiful scenery and the best climate of the garden spot of the west. These people will look about for the best and will come to Walla Walla. I believe we will get our share of the homeseekers."

A FIREMAN'S TOURNAMENT.

It Will Be Held at Heppner, June 11, 12 and 13.

At Walla Walla Monday by a unanimous vote of the directors of the Eastern Washington and Oregon Firemen's association, Heppner, Oregon, was selected as the place of holding the new tournament, and the date fixed at June 11, 12 and 13.

The meeting of the directors was well attended and the statesman, secretary, H. L. Lincoln, of La Grande, was not present, and when the meeting was called to order in the city hall by President McDonald, of Dayton, Frank Kniss was elected secretary pro tem.

There was no contest on for the next tournament, as the Vice-President, McAttee, of Heppner, made the bill. He said that he would not, at this time, make a guarantee of an exact sum for prizes, but would guarantee that Heppner would do as well in cash prizes as Dayton did last year, which means between \$1000 and \$1500.

An invitation, extended to the visiting members by Albert Niebergall, to be the guests of the local boys at a dinner to be given at the State hotel, was accepted heartily, and then and there a resolution thanking the local boys for the entertainment, as well as for their courteous attention to the visitors while in the city, was quickly adopted.

Those present at the meeting were A. McDonald, of Dayton, president; A. F. McAttee, of Heppner, vice-president; John Smith, of Walla Walla, secretary; J. H. Kelly, of Walla Walla; Lars Nilsson, of Dayton; and J. W. Morgan, of Waukegan; Capt. Tuttle, of Waukegan, assistant chief; F. M. Hanger, of Dayton, and Frank Kniss, of Walla Walla.

PEOPLE HERE FOR A DAY.

R. S. Clements, the county attorney of Freeborn county, Minnesota, who left Monday evening for a continuance of his tour of the Coast, tells how the introduction of diversified farming and dairying in that state has created a solid and permanent prosperity among the farmers. Freeborn county is composed of 20 townships, a small county, comparatively equal in area to only that portion of Emmet county lying west of a line drawn east and west through the town of New York. Yet in that extent of country are 32 creameries, all doing a thriving business, distributing many thousands of dollars every month to the farming classes. From their creamery returns, the majority of farmers pay all living expenses, leaving a surplus for sale of grain, hay, vegetables, small fruits and livestock, as clear profit on the year's operations. The creamery business has advanced in Minnesota so that that state is now the first in the industry in the United States, and the farmers are proportionally sharing in the prosperity.

Personal Mention.

G. W. Hunt is a guest of the Hotel Pendleton.

The little daughter of Mr. and Mrs. H. F. Johnson is ill.

Mrs. John W. Bryant, who came up from Echo Monday, returned this morning.

W. McBride, the druggist at Athena, was a guest of the Hotel Pendleton this evening.

L. M. Watrus, of Adams, is a juror in attendance at this session of the circuit court.

Miss Blanche Horne, of McKay creek, a guest of Miss Deana Hendley, and will remain in Pendleton for several weeks.

George P. Van Dran, of the Hotel Pendleton, returned this morning from a trip to Albany, to which place he was called on account of the death of his mother.

Mr. and Mrs. W. W. Cotton, of Portland, are guests of the Hotel Pendleton. Mr. Cotton is attorney of the O. R. & N. company in a suit pending in circuit court.

A. L. Maxwell, formerly of the Arlington Record, recently running a daily paper at North Yakima, Wash., was in Pendleton today on his way to Union, where he will take charge of the Scout.

Louis A. Hertel, of Colfax, formerly of Caldwell, Idaho, a friend of John Zahner and Jim Bailey, was in Pendleton Monday evening. He left for his old home at Caldwell this morning to look after his cattle interests.

John Taylor, a nephew of the late James Taylor, is expected to be in Pendleton this evening, and will be notified of his uncle's death. He will go down to Echo, with the others from Pendleton to attend the funeral. Frank Wilson, who was taken to the

county hospital last Friday night, is getting along well. An operation was performed upon him on Saturday by Drs. Vincent and Cole, and he recovered from the effects in a very satisfactory manner.

Tom Scott came forth from his sequestration Monday evening and shows no signs of having had the smallpox, but he had it. For two days and nights his life hung on a slender thread. Tom's staying qualities won out and he won the fight temporarily. He will leave for Dillon, Mont., for a visit shortly. Roxy Horn remains in the pesthouse waiting on a Mr. Kelly, who was taken there a short while ago.

R. Alexander, member of the Oregon Pan-American commission, returned this morning from Portland. He met there on Monday the other members of the commission. Matters pertaining to the exhibit Oregon is to have at Buffalo were discussed. Employees were selected, from a list approximately 100 applicants. A question of some importance, the transportation of the 15 cars containing the Oregon exhibit, was taken up and left unsettled, the commission adjourning until today to meet at 11 o'clock. Mr. Alexander was unable to remain there for the meeting today, business engagements calling him home.

THERE MAY BE TOO MUCH GOLD.

The Supply of the Precious Metal is Increasing Rapidly.

"If the price of gold goes down another metal must be looked for as a token of international value. I think this metal will be silver, because silver is not found in alluvial plains and because owing to the difficulty of mining, it will never change in value."

This statement was made by Prof. Shaler, Harvard's geologist in a lecture to 600 students in Cambridge, Mass. He predicted that within the next 20 years there would be an influx of gold such as the world has never known. Prof. Shaler bases his statement upon geological conditions, combined with recent improvements in mining apparatus. He said in part:

"Within the past few years men have come to realize that a large portion of the earth's surface is charged with gold. Gold is indissoluble and when gravel banks are cut out of the way it is not easily carried off by streams to the sea as is the case with other metals. Instead it is carried along, broken up into finer fragments and gradually deposited over alluvial plains. The new system of mining which have recently been discovered will have produced about the middle of the present century almost an intolerable supply of gold. I should say the supply at the least will be quadrupled. On the continent of America alone I have estimated the amount of gold to be won from the gravel within the next 100 years will be worth \$30,000,000,000. Up to the present time men have been greatly handicapped in searching for gold by the fact that it was scattered so thinly through the earth. They have been able to find only an amount of gravel paying 10 to 20 cents to the cubic yard but the expenses of dredging has always been so great that they have been unable to extract it with profit. Now, however, the machinery of the dredgers has been greatly improved. Within the past three years dredgers have operated in Russia and in the United States, especially in Leadville, Colo., which have proved beyond question that alluvial soil can be profitably worked for gold."

ANOTHER PIONEER IS DEAD.

Uncle Jimmy Taylor Died at His Home Near Echo Monday.

James Taylor, known far and wide in this region as "Uncle Jimmy," died at his farm home two miles west of Echo on Monday morning, March 11, at 6 o'clock, a victim of Bright's disease, from which he had been long ill. The funeral will take place at Echo on Wednesday afternoon at 1 o'clock under the auspices of Echo lodge, No. 94, of which deceased was a member. W. D. Hansford, Col. E. Boyd and other Masons of this city will leave for Echo on Wednesday morning's train to attend the funeral.

James Taylor was born on January 4, 1820, being a native of Kentucky. It is believed, but an investigation resulted in failure to ascertain the state of birth, positively, as it might have been Virginia. He removed to Missouri in boyhood and came to Oregon in 1840, going to the Willamette valley and from there to his recent home near Echo 37 years ago, where he has since resided. He joined Umavilla lodge, No. 40, A. F. & A. M., the first Masonic lodge in this county and he was one of the oldest representatives of the order in this section.

Mr. Taylor was a man of considerable means and generous impulses. Having no children of his own he reared 13 boys and girls to manhood and womanhood, who have many reasons to remember his philanthropy and regret his decease. Mr. Taylor's widow survives him.

Mr. Taylor for years was engaged in the general merchandising business at Echo, the firm name being Hesse & Taylor. They were burned out along about 1889, and did not resume. He had always devoted considerable of his time to stock raising and had many sheep up to a few years ago, when he directed his attention more particularly to raising cattle. He made his will several years ago and had his business well settled up. He was aware of the fact that death was near several days before the estate and was prepared. He left an estate roughly estimated at \$30,000.

This statement was made by Prof. Shaler, Harvard's geologist in a lecture to 600 students in Cambridge, Mass. He predicted that within the next 20 years there would be an influx of gold such as the world has never known. Prof. Shaler bases his statement upon geological conditions, combined with recent improvements in mining apparatus. He said in part:

"Within the past few years men have come to realize that a large portion of the earth's surface is charged with gold. Gold is indissoluble and when gravel banks are cut out of the way it is not easily carried off by streams to the sea as is the case with other metals. Instead it is carried along, broken up into finer fragments and gradually deposited over alluvial plains. The new system of mining which have recently been discovered will have produced about the middle of the present century almost an intolerable supply of gold. I should say the supply at the least will be quadrupled. On the continent of America alone I have estimated the amount of gold to be won from the gravel within the next 100 years will be worth \$30,000,000,000. Up to the present time men have been greatly handicapped in searching for gold by the fact that it was scattered so thinly through the earth. They have been able to find only an amount of gravel paying 10 to 20 cents to the cubic yard but the expenses of dredging has always been so great that they have been unable to extract it with profit. Now, however, the machinery of the dredgers has been greatly improved. Within the past three years dredgers have operated in Russia and in the United States, especially in Leadville, Colo., which have proved beyond question that alluvial soil can be profitably worked for gold."

ANOTHER PIONEER IS DEAD.

Uncle Jimmy Taylor Died at His Home Near Echo Monday.

James Taylor, known far and wide in this region as "Uncle Jimmy," died at his farm home two miles west of Echo on Monday morning, March 11, at 6 o'clock, a victim of Bright's disease, from which he had been long ill. The funeral will take place at Echo on Wednesday afternoon at 1 o'clock under the auspices of Echo lodge, No. 94, of which deceased was a member. W. D. Hansford, Col. E. Boyd and other Masons of this city will leave for Echo on Wednesday morning's train to attend the funeral.

James Taylor was born on January 4, 1820, being a native of Kentucky. It is believed, but an investigation resulted in failure to ascertain the state of birth, positively, as it might have been Virginia. He removed to Missouri in boyhood and came to Oregon in 1840, going to the Willamette valley and from there to his recent home near Echo 37 years ago, where he has since resided. He joined Umavilla lodge, No. 40, A. F. & A. M., the first Masonic lodge in this county and he was one of the oldest representatives of the order in this section.

Mr. Taylor was a man of considerable means and generous impulses. Having no children of his own he reared 13 boys and girls to manhood and womanhood, who have many reasons to remember his philanthropy and regret his decease. Mr. Taylor's widow survives him.

Mr. Taylor for years was engaged in the general merchandising business at Echo, the firm name being Hesse & Taylor. They were burned out along about 1889, and did not resume. He had always devoted considerable of his time to stock raising and had many sheep up to a few years ago, when he directed his attention more particularly to raising cattle. He made his will several years ago and had his business well settled up. He was aware of the fact that death was near several days before the estate and was prepared. He left an estate roughly estimated at \$30,000.

THERE MAY BE TOO MUCH GOLD.

The Supply of the Precious Metal is Increasing Rapidly.

"If the price of gold goes down another metal must be looked for as a token of international value. I think this metal will be silver, because silver is not found in alluvial plains and because owing to the difficulty of mining, it will never change in value."
