## Leaver Bros. Dry Goods Co.

FRIDAY, MARCH 26, 1901.

### FRIDAY IN APRIL.

Day Will Be Observed at the Public Schools.

By all of the states of the Union designated a day to be known as Arbor Day.

In Oregon that day comes annually on the third February in the month of April.

The object of Arbor day is to encourage to and promote an interest in the planting of trees of all fruit, shade, timber and ornamental varieties.

The public schools, normal academies and universities will give considerable attention, and all schools will hold exercises appropriate to the occasion.

There is not room for planting trees on the hill north of the public school building, but one at least will be planted and watered by the school.

The waterworks system, its growth will be carefully watched by the public.

This tree will be planted under the auspices of the lower grades.

Arbor day exercises will be held in a number of the rooms on the afternoon of the date, Friday, April 20.

The program for the tree-planting at the Pendleton academy, and some of the programs to be rendered in the rooms of the public schools, will be given later. They will be in character, with singing included.

\$100 Dollars Reward, \$100.

Readers of this paper will be pleased to know that there is an all-around cure for all diseases that has been able to cure in all its forms, and that is called, Hall's Catarrh Cure.

Hall's Catarrh Cure is a constitutional treatment, and it is taken internally.

It acts directly on the blood and mucous surfaces, and it is the only medicine that cures the disease, and gives the patient strength by building up the constitution.

Persons who have so much faith in its curative powers that they offer the Hundred Dollars reward for it, will be pleased to find that it cures.

Send for list of testimonials. Address, F. J. CHENEY & CO., Toledo, Ohio.

Druggists, 72c.

Family Pills are the best.

SHOOTERS ARE CARELESS.

They Aimed at Squirrels and Nearly Struck Mrs. Frank Downey.

The pastime of going out on the hills adjacent to Pendleton on Sunday afternoon and shooting gophers has become quite popular since the arrival of the spring weather.

The weapon almost invariably used is a 22-caliber rifle, although once in a while a .38 Smith & Wesson pistol wastes a few cartridges in its laudable efforts to improve its marksmanship.

Last Sunday afternoon Mr. and Mrs. Frank Downey were out on the hill north of Pendleton for a stroll.

Numerous persons were in the vicinity hunting gophers. In the course of time, Mr. and Mrs. Downey were surprised and shocked when a bullet from a "22" struck the ground but a few feet from where the couple was standing.

It is needless to say that the particular scene of the country hurriedly and their departure for the afternoon was delayed.

Mr. West, who has a ranch south of the hill reports that he, too, had a close call from a bullet started on its way by some one who presumably

was aiming at a squirrel.

## W. H. JONES IS CHAIRMAN.

WATER COMMISSION ELECTS ALSO F. B. CLOPTON AS CLERK.

Present Rules Will Govern. Pending Notice of Changes—Rate Charged 25 Cents a 1000 Gallons.

The first meeting of the Pendleton water commission was held in the council rooms on Monday afternoon, March 25, at 5 o'clock. Frank B. Clopton, W. J. Furnish, Charles H. Carter and Leon Cohen, members of the commission, were present. W. H. Jones was absent, having gone to Portland Saturday night. W. J. Furnish was chosen as temporary chairman. An informal talk ensued as to the election of a permanent chairman and clerk. The idea was advanced that it would be well to have the commissioner permanent chairman who would first retire from office. W. H. Jones was nominated for that position and unanimously elected. Frank B. Clopton was elected unanimously to the position of clerk. After the commission has been in running operation for ten years, under the method of procedure adopted, a member of the commission will not become chairman until after he has been a member for eight years. This is on the same plan as that governing the school board of a district of making the oldest in point of service chairman of the body.

Brown to Be Superintendent Pro Tem.

Frank B. Clopton read the portion of the city charter governing the commission and many matters of interest were discussed in connection therewith. Mr. Clopton, being a member of the city council, as well as of the commission, was in a position to explain the desires of the council in many particulars regarding the operation of the waterworks. J. T. Brown, who has been filling the two positions of water superintendent and street commissioner, will for a time at least devote all his attention to the waterworks, and be in the pay and employment of the water commission solely.

Present Rules Continue in Force.

It was resolved that the present rules of the city waterworks regarding the use of water and the pay therefor would remain in force and affect until changed by the commission, after which it would be given to the consumers of such change.

City Treasurer Gives Additional Bond.

The city treasurer was instructed to have his bond in the sum of \$5000 ready for filing on next Monday, when the waterworks will be formally turned over to the commission by the city. This bond is to be made to the water commission and not to the city, and, of course, an additional bond to that he has now on file for the safekeeping of the money of the city. This is in accordance with the provision of the new charter requiring the city treasurer to be the custodian of the funds of the water commission and to give such bond as may be required for the faithful discharge of his duties.

New Meters Have Been Ordered.

Mr. Clopton stated that 100 meters had been ordered by the council by telegraph in addition to the 235 heretofore received and that that number would be enough to supply the needs of the city temporarily although it is believed that the number of meters in use will reach 400 within four months. Several of those who consume the most water have had meters in for some time. The actual expense to the city of furnishing water will be less than seven cents per 1000 gallons. The rate charged consumers will be 25 cents per 1000 gallons for the first 25,000 gallons, above which amount it will be less for each 25,000 gallons.

Financing the System.

The city will make the transfer of the water system and everything pertaining thereto, including wood enough at the pumping station to last until next September. The city will also turn over to the water commission the receipts of the waterworks system for the months of January, February and March, less the actual operating expenses. This will be the nucleus of the waterworks fund. Five per cent of the gross receipts of the waterworks system must be set aside annually as a sinking fund for the payment of outstanding bonded indebtedness.

Visited the Pumping Station.

This morning the commissioners visited the pumping station at 8:30 o'clock, and inspected the plant. The new pump was placed in operation and shown to them by Engineer T. J. Millon. The commissioners will take under consideration the building of a new pumping station and the purchase of a new boiler. It was previously expressed by city officials as to the cost of these improvements indicated that their ideas were for a \$2000 building and a \$2000 boiler. What the commission will do in the premises has not been indicated.

Worse Than War.

Hundreds of thousands are killed by consumption. There would be no deaths at all caused by this terrible disease, if people could be made to understand that Shiloh's cough and consumption cure is a safe remedy if taken in the early stages. 25 cts 50 cts and \$1 a bottle. Druggists will refund the money if a cure is not effected. Tallman & Co., leading druggists.

THEATRE MANAGER DREW PRIZE.

Barton Hill Employed Modjesko Who Surprised a San Francisco Audience. Occasioned by Madame Modjeska's visit to this region, the newspapers are printing a story of her experience in seeking an engagement in a San Francisco theatre. It appears that Countess Rosetta, with his wife Modjeska, and their only child, went to Southern California many years ago, and embarked in the career of ranchers, desiring rest from political excitement as experienced in Poland, their native land. They soon found that diluted capital and total lack of experience were not conducive to success in farming or horticultural pursuits; and Modjeska journeyed to San Francisco to try to secure an engagement at one of the theatres.

She applied to Barton Hill, who was then manager of the old California theatre. He supposed she was some stage-struck woman whose conceit would not be satisfied until she had strutted her one evening on the stage. He had no idea that he was opening the door to a great star when he gave her one of the "off nights." Her name on the play bill meant nothing, as no one had ever heard of her. She spoke English with a very thick accent. The audience was small and indifferent. But as her portrayal of Adrienne Le Couvreur progressed, her auditors and Barton Hill realized that no novice,

but a queen of the histrionic art, was before them. They rose to enthusiasm and called her before the curtain many times.

Soon after she retired to the seclusion of her ranch to master the English language, not appearing on the stage for six months, when she began touring the country as a star.

Madame Modjeska first appeared on the stage in 1861, being then 17 years old. She has therefore been in theatrical life for the greater part of 40 years, and is now 57 years old.

To Found a Motel Town.

A gigantic scheme is afoot to found a great model industrial town in the eastern part of the country, where shall be gathered a variety of manufacturers and an army of employees, under social conditions; the town and manufacturers to be organized according to the most approved business methods, with the highest regard to the physical and intellectual welfare of its residents. Fifty years ago, a medicine was founded which also had in view the welfare of humanity.

This was Rosetta's stomach Bitters, which remedied the world over for its cure of dyspepsia, constipation, indigestion, belching, insomnia, biliousness, nervousness and malaria, fever and ague. As a spring tonic and blood purifier, it is unequalled. Our private revenue stamp covers the neck of the bottle.

LEECH KILLING SHEEP.

Willamette Valley Flockmasters Lose One-Third of Their Bands. The sheep industry of the Willamette valley is experiencing severe reverses this spring by reason of the leech, which has already killed fully one-third of the sheep in those parts. This is considered a conservative estimate of the loss, some farmers placing the percentage of the herds that have been killed on this account as high as 50 per cent.

This is the first appearance of the destructive leech in the valley for a number of years. They are found to attack herds of the bottom lands only, the hill lands not being possessed of the pest. The leech appears in the grass and water places on the bottom lands where the sheep graze, and in this way they are taken into the system of the sheep, whose liver they attack. The ducts of this organ soon become congested and the sheep live but a short time. No effective remedy has been discovered for those who do not desire to be bumped and jostled. Boys' and girls' Crescent wheels \$22. The 1900 models to be had at very low prices as long as there are any in stock. Wheels of this model from \$15 to \$22.50. Call and get a Crescent catalogue free and discover the excellencies of the Crescent wheel in detail. The famous Dunlap tire is furnished on Crescents. They are the best tire on the market. They can be taken off, repaired and put on by the novice as well as by the experienced bicycle rider. They save money. Wheels sold on easy terms to suit purchasers. No interest. Call at the Crescent agency in the East Oregonian building.

DO YOU WANT A BICYCLE?

A Wheel on Your Own Terms at the Crescent Agency.

The Crescent bicycle for 1901 is superb. It is sky-high in quality. The road wheel at \$55 is a beauty; the road racer at \$50 is the handsomest wheel on the market today. Morrow coaster brakes are supplied on the Crescents when wanted. The spring frame Crescent sells at \$50. The spring frame is for those who do not desire to be bumped and jostled. Boys' and girls' Crescent wheels \$22. The 1900 models to be had at very low prices as long as there are any in stock. Wheels of this model from \$15 to \$22.50. Call and get a Crescent catalogue free and discover the excellencies of the Crescent wheel in detail. The famous Dunlap tire is furnished on Crescents. They are the best tire on the market. They can be taken off, repaired and put on by the novice as well as by the experienced bicycle rider. They save money. Wheels sold on easy terms to suit purchasers. No interest. Call at the Crescent agency in the East Oregonian building.

Word received from W. F. Matlock

word indicating that his return to Pendleton might be expected by April 1. He took it head of horses up on the last trip. He sold six span within four days at good figures. The sale of the other five could be closed up at a moment's time. He says business is good and prospects for the season's mining development, especially excellent. There is still some snow on the ground at Skagway. Mr. Matlock owns the property on lower Alta street which has been used for the past two years as a baseball and football ground, and his return would undoubtedly stimulate the baseball boys in their work of getting a good team of players together and having it backed up by a solid organization of business men.

Young Buys a Paper.

Edward Everett Young has bought from B. F. Alley the Evening Republican at Bend City, purchasing the mechanical plant, the subscription list and the paper's "good will." Mr. Young, who now owns the Sumpter Blue Mountain American, will continue to publish the latter paper. He has already taken possession of the Republican. Mr. Young has had eight years experience in the newspaper business.

Food Changed to Poison.

Fatiguing food in the intestine produces effects like those of arsenic, but Dr. King's New Life Pills expel the poisons from clogged bowels, gently, easily but surely, curing constipation, biliousness, sick headache, fevers, all liver, kidney and bowel troubles. Only 25c at Tallman & Co.'s.

CUT OUT THIS AD

ENCLOSE IT TO ME WITH TEN DOLLARS.

And I will furnish you all complete, ready to use, my 1901 Model No. 7 SANDEN ELECTRIC BELT. It is superior in make, quality and power to any belt offered by other dealers for which they charge \$40.00. Established 30 years. Write today for my latest books, "Health in Nature" and "Strength; Its Use and Abuse by Men."

## DEMAND FOR A FLORIST.

PENDLETON WOULD SUPPORT A GREEN HOUSE PROPERLY RUN.

People Are Compelled to Send to Portland, Walla Walla, La Grande or Spokane.

"I wish someone would come to Pendleton and establish a greenhouse," remarked a lady, who, this morning, mailed an order to a Portland florist for some flowers wanted on Easter Day. "I am sure a properly managed greenhouse would pay."

This is but an echo from the remarks of countless other persons, who, wanting flowers, are compelled to send away, and, in addition to the price charged at the greenhouses, pay express charges to Pendleton. The matter was presented to a number of persons during the day, as a business problem. "Would a greenhouse in Pendleton pay?" And it appears to be the general view that it would.

La Grande has one now. It was opened on Sunday when visitors were received, and henceforth La Grande people may purchase flowers without sending the purchase price away from home and incidentally buying an interest in the express company. C. L. Kaler is the proprietor. In mentioning this event, the Chronicle says that "in addition to the wonderful display of beautiful flowers, there are growths of trees and plants, of course small and somewhat undeveloped, from almost every quarter of the globe. The beautiful condition of the stock, rare or otherwise, is remarkable to a high degree. Besides the better known products of another earth, in this climate the following are some of the rare growths: Coffee and tea plants, pineapples, India rubber tree, cacti of various kinds, banana, lemon, orange, pampas grass, bamboo plants, various palms, including date fruit palm; tree fern, from Morton's bay, Australian and other trees and growths; various forms from widely separate parts of the earth."

Walla Walla has for years supported a greenhouse, partly from Pendleton patronage, and the owner recently sold out, returned to his former home in Germany, and took with him drafts for \$40,000, the major portion of which he made in the flower business. The present owner, says a gentleman who was in Walla Walla last winter, cannot supply the demand. He has this spring built a number of new houses, increasing his capacity several times what it has been heretofore.

If La Grande can support a greenhouse, Pendleton can. Someone would better come here and establish one. It is suggested that this question would afford opportunity for R. C. Judson, industrial agent of the O. R. & N. Co., to send someone here who has money enough to start such an enterprise. The greenery man could also raise early vegetables, and thus augment the receipts from the sale of flowers.

Ranchers Trade Ranches.

Ridge, March 23.—James Rice has sold his farm of 240 acres and 23 head of horses to James Davis, of McKay creek, for \$2800. Mr. Davis has already taken possession.

James Rice has purchased 80 acres of land from James Davis, of McKay creek, for \$1950 and taken possession. The Ogilvie family are slowly improving from la grippe after two months seige.

Farming is steadily progressing, and squires are showing well, as is the grass.

It's a Short Road
