#### METERS IN WALLA WALLA Talk of Putting Them in to Save Waste of Water.

Walla Walla, April 12.—The water works system of this city is steadily being improved and enlarged. The construction of a new main in Park street, between Whitman and Birch streets, a distance of about five blocks, has just been completed. A shipment of 33½ tons of pipe and fittings is now en route and it is expected by fall that the larger portion of the same will have been placed in position. Water for the purpose of interest of the purpose of the p for the purpose of irrigation will be supplied residents of Walla Walla on and after May 1 and it is thought, from the present outlook, that there will be sufficient during the coming summer for all purposes if consumers do not allow an undue waste of the precious fluid.

"The water committee has been considering the advisability of attaching meters to the pipes of those who allow their fixtures to waste," said Water Registrar H. H. Turner, yesterday, "and if such is found advisable, which is not unlikely, the cost of the meter will be taxed to the consumer. The new water rules recently enacted at Pendleton, require meters to be placed on all service pipes at the consumer's cost. This was found necessary to prevent waste and I believe such a ruling would prove beneficial if carried into effect in this city."

CATHOLICS ARE OPPRESSED.
