Will Be Held at Portland on

Friday, April 26. All lands in Umatilia county against which there are delinquent taxes are about to be sold. The list is almost ready and will be in shape for publi-cation in the East Oregonian by next week. The law is plain enough on this matter, but there is a terrible jumble in regard to redemption of lands heretofore sold for taxes. That is a matter that will be the subject of action at a meeting of the county judges of the state to be held at Portland on Friday, April 26. County Judge Hart-man expects to leave on the train Thursday evening to attend the meet-

Redeming Tax Sales. According to the a law of 1893, county judges and clerks of school districts were authorized to bid in property sold for taxes. If the owner of the property failed to redeem it within the property failed to redeem it within one year a penalty of 20 per cent was added; a penalty of 10 per cent was added for the second year, and, if not redeemed within the two years, the county judge, school district clerk or other person who had bid it in was en-tilted to receive a deed therefor from the sheriff

POSTAL DELIVERY Subject Will So Brought Up at at the Council Meeting.

A. P. Smithers, agent of the postoffice department whose duty it is to
visit scities where the tree postal delivery system is about to be naugurated, after riding around with Councilman Frank B. Clopton on Tuesday
afternoon, had a good idea of Pendieton's size and other matters upon

Councilman Clopton is a statistician of great versatility. He figured up for Mr. Smithers that the land within the city limits of Pendleton consisted of only about 1200 acres. Mr. Smithers said that Pendleton must be a very compact city. The usual size of a city in acres is one section of land or 640 acres to each 1000 of population. The sidewalks of the city are also in good repair, so that the inspector will be able to report favorably on that feature, as well as upon the fact that the city is well lighted.

Numbering Houses, Etc.

Dr. E. N. Hutchinson, of the Bureau of Animal Industry, department of agriculture, arrived in Pendleton this morning, escorted by Col. R. C. Judson coming via the O. R. & N. early morning train. Dr. O. B. Melvin, of the same department arrived on the same department arrived on the westigate the mange that has affected so many horses in this county. It is their intention to inquire closely into the conditions existing here, with a Pendleton Is Compact.

Numbering Houses, Ste. The city council has long been readiness to pass an ordinance requiring the owners ot houses to number the same, and have been willing to put signs at the intersections of streets, signs at the intersections of streets, but have not known exactly what was desired in that line by the department. Mr. Smithers will explain tihngs at the council meeting tonight and the free postal delivery proposition will be given a boost by that honorable body.

Parasites Cause All Hair Troubles. Nine-tenths of the diseases of the scalp and hair are caused by parasitic germs. The importance of this dis-covery by Professor Unna of the Charity Hospital, Hamburg, Germany, cannot be overestimated. It explains why ordinary hair preparations, even of the most expensive character, fail to cure dandruff; because they do not, and can not, kill the dandruff germ. The only hair preparation in the world that positively destroys the dandruff para-sites that burrow up the scalp into scales called scurf or dandruff, Newbro's Herpicide. In addition its destroying the dandruff germ Her-picide is also a delightful hair dress-ing, making the hair glossy and soft

the church, and a committee to draft a set of resolutions protesting against the saloon was appointed. There will be another meeting tonight. "The party, whom it is reported will open the "gallon house," was in town the early part of ithe week and talked of circulating a petition for a county license, but did not do so. "It is a well known fact that at least three-fifths of the voters in this precinct are against a saloon, and to have one started in the face of so much opposition is galling to them indeed. Drs. Melvin and Hutchinson Come to

They went out on the reservation to investigate the mange that has affected so many horses in this county. It is their intention to inquire closely into the conditions existing here, with a view to correcting the abuse.

Conflict of authority between the state and the federal authorities has prevented the employment of effective means for the eradication of the mange. The federal officials refused to permit the state veterinarian or his permit the state veterinarian or his deputies from handling to disease on the reservation, where it has prevailed quite generally for many years.

Prevous Efforts Inaffectual. The deputy state veterinarian, Thomas Thompson, of Pendleton, has put forth strenuous exertions to accomplish the much desired curing of the disease, and once secured the assistance of Governor Geer. The governor took up the matter with the Washington officials and urged that the department there take it in hand and see to it that compathing be done. No result it that something be done. No result came from it, for some time, until now, when Drs. Melvin and Hutchinson have come to make an investigation.

Mr. Thompson has been in consulta-tion with the two gentlemen, and was able to furnish much information of a valuable nature.

It is hoped here that their visit will result in -something definite and that at last intelligent action will be taken to remedy conditions that have threatened the entire borse industry of this and other Eastern Oregon and Washington countries. ington counties.
