WOULD APPOINT INDIAN AGENTS.

Under Civil Service Rules to Prevent Athlete ... Occasional Irregularities.

A report by the investigating com-mittee of the National Civil Service Reform League on conditions of the Indian service, with particular reference to the appointment of agents under the present administration, has been presented to the council of the league. The facts and recommendations con tained in the report have also been submitted to President McKinley. The report says in part:

"Under the system of patronage appointments, these wards of the nation have in many cases been despoiled by fraudulent contracts, whereby the agents have obtained large sums of money to violation of law, while the morals of the Indians have been corrupted by the example of caretakers, who are often drunken, brutal, licentions and dishonest. Recently the secretary of the interior required that the bids for the leasing of the Indian lands should be opened and the leases awarded in Washington under the firect supervision of the Indian bureau, and not as formerly upon the reservations. The result of this sys-tem, and of the exposure of the fraudulent use of Indian lands, siready shows a net gain to the Indians of about \$150,000, the greater part of which was upon the Osage reservation

"Nothing could better illustrate the enormous waste and presumptive specuin respect to this one feature of Indfan administration."

System Must Be Changed.

A number of instances are cited showing how agents have abused their power for their own pecuniary benefit and with demoralizing consequences to the Indians. The report says it seems evident that whatever temporary improvement may be made by changer in the personnel of the Indian service no lasting reform can be inaugurated without a change in the system itself. It is submitted that under section 1753, of the revised statutes, the chief exe-cutive has the right to promulgate regulations declaring that all appoint-ments of Indian agents bereafter shall be made by promotion from the super-intendents of Indian schools, and from the other higher grades on the classified Indian service and by details from the army. In pursuance of this statute, an inspector might be selected by the president from the classified service to ascertain and report the relative qualifications of the different per-sons in this service eligible for appointment.

Uses Hot Water-Has Eight Wagons Takes 140,000 Gallons a Day.

Boise is another town that sprinkles its streets, using S wagons and keeping down the dust thoroughly. When one thinks about it, why should not a town keep down the dust just as much as a housewife should try to keep that dust out from her house, a thing very bard to do on a day like Tuesday, when great clouds went whirling and swirling and filled all the air. Regarding the sprinkling, the Boise Statesman

Boise is the only city in the world sprinkled with hot water. in the city invariably express great surprise at the cloud of "dust" following in the wake of the sprinklers, and it is most often a hard matter to induce them to believe it is only the steam arising from the hot water. Many, indeed, are not satisfied of this fact till after they have had a practical demonstration

"There are eight wagons employed in laying the dust of Boise City, Each wagon has a capacity of 600 gallons. They make on an average 30 trips day, so the total amount of water used is in the neighborhood of 144,000 gallons per day. All this is not hot wa-ter, though a large percentage is.
