Notwithstanding their working in conjunction, no final data was attained, for, whereas the French gendists calculated the difference to be 9 misutes 21 seconds and some few hundredths of a second, the Greenwich observation was a fifth of a second less. In 1892 another attempt was made on precisely similar lines. was made on precisely similar lines, and again the English calculation was about one fifth of a second less than the French result. It is anticipated that the progress of geodesy within the past nine years will enable the results of the two observations to coincide this time. It is imperative that their calculations should be the same, since nations often divide their territorties, when no natural boundaries are possiwhen no natural boundaries are possi-ble, by tongitude and latitude. For instance, the boundary line between South Australia and New South Wales South Australia and New South Wales is nominally by longitude 141 degrees east of Greenwich. Telegraphic calculations, however, prove this delimitation to be erroneous by several hundred feet, a result probably due to uncertainties in the determination of the longitude. Such inaccuracies, trifling though they may appear from an though they may appear from an evanescent point of view, are of vital importance in discussions over the boundaries between different countries, and may possibly lead to serious re-sults. The red flag flies over Lincoln, a The red flag flies over Lincoln, a pretty town in a growing section of Middlesex county, New Jersey. The entire town will be sold under the hammer, without reservation, by Fred C. Wolbert of Jersey City on July 10. Too much woman suffrage was Lincoln's undoing. The town was founded by a real estate syndicate, and it responded nobly to booming methods. It was sewered and paved and laid out in streets, that were given the names of distinguished statesmen and warriors. Houses sprang up along warriors. Houses sprang up along Grant avenue, Sherman avenue, Lin-coln avenue and McKinley boulevard.
