## Cleaver Bros. Dry Goods Co.

East Oregonian  
SATURDAY, JULY 27, 1901.  
THE BAKER CITY PAPERS

Remodeling buildings is about the only improvements going on at present. A new natatorium at the hot springs, a mile east of town, will be completed about the latter part of next week, and promises to become famous as a swimming resort. The waters at these springs have a temperature of eighty degrees and some medicinal properties. Baker City has one novelty found in no other city. It is the "Baker City Railway and Motor company." It runs one car every time a train arrives. Its motor is one horse. Fare free to a certain hotel; otherwise, five cents.

**REMEDIATION IN THE BUD.**  
First Appearance of Dandruff a Forerunner of Future Baldness.  
That such is the case has been conclusively proven by scientific research. Prof. Unna, the noted European skin specialist, declares that dandruff is the narrowed-up edge of the scalp caused by parasites destroying the vitality in the hair bulb. The hair becomes lifeless, and in time falls out. This can be prevented. Newbro's Herculite kills the dandruff germ and restores the hair to its natural softness and abundance. Herculite is now used by thousands of people—all satisfied that it is the most wonderful hair preparation on the market today.

**BEAR CREEK WAS DEVASTATED.**  
Two Men Used Dynamite and Got 300 Pounds of Trout  
An indignant sportsman has his say as follows regarding the dynamiting of fishing streams hereabouts. He made these remarks to an East Oregonian representative: "Among the many stories told by Mark Patton is one that should be given wide publicity. That is, in regard to the use of dynamite. In the summer of 1900, two men, unknown by name and without a plume of habitude, came to the city and, after a few days of every sportsmanlike instinct, went to Bear creek with two pack horses. Bear creek is celebrated throughout Eastern Oregon as being one of the best fishing streams in the state. They commenced operations, and without regard to the Oregon state game laws, and every other law except that which dominates a bog when making a footrace for a trough, exploded dynamite in the stream and within three days killed 300 pounds of trout and packed it away on their horse.

**HARVEST**  
Colored Glasses  
Eye Protectors  
ALARM CLOCKS. Just the thing for the cook wagon. 75c, \$1.25, \$1.50.  
Write or send and we will fill your order to your satisfaction.

## NEWS FROM THE RESORTS

**BINGHAM SPRINGS HAS ABOUT FIFTY GUESTS.**  
Attendance Will Show Improvement From This Time On, Says C. W. Avery, the Manager.  
C. W. Avery, manager of Bingham Springs, the popular resort in the Blue mountains twenty-seven miles from Pendleton, was in town on Friday, accompanied by Fay LeGrow, the manager, having come down to purchase supplies for the LeGrow sheep camp on Black Mountain. Mr. Avery stated that the attendance at the springs has not been up to the usual number so far this season, but that he was confident that hereafter throughout the season many more will be there. He had a number of rooms reserved for Pendletonians on Friday while he was here, and was informed by a large number of others that they intended to go up in the near future. Fishing is good in that part of the mountains, said he, and the weather is delightfully cool and the atmosphere invigorating. Quite a number of Portland people will be up in the coming weeks, and the resort will take on the customary lively appearance.  
Mr. Avery is making special efforts this year to cater to the comfort of his guests, and has everything in shape to succeed. He has had sufficient experience to enable him to do so, and there is no doubt that the springs will remain the chief place of resort in Eastern Oregon. Mr. Avery and Mr. LeGrow returned to the mountains on the evening train.

**AN EASTERN PAD AT LEHMAN.**  
The New York Fashion of Riding Astride is Popular.  
Lehman Springs, July 27.—A custom that caused the social world of New York and other eastern cities to stand agape two years ago has been introduced here and has become popular. It is no uncommon thing to see a lady riding astride as taught in the most fashionable riding schools of the blue-blood aristocracy in those cities where society is supposed to do the exceedingly proper thing. It is a fad in the east, but is destined to have a run soon in the west, if the present start made should increase as rapidly as predicted. When the stagers arrive it is a nice sight to see the cavalcade move out to meet them. It surprises the passengers at first, but soon becomes so commonplace as to attract little attention.

**A Stopped-up Stovepipe.**  
The evening meal of Ed Barr and "Big" Roesch on Thursday evening was a few minutes ago a rather unpalatable affair. The unpalatable part was the unpalatable proclivity of Colie Fraker to play practical jokes. A small party of ladies had called to do a little extra cooking for the young men, having taken compassion on them. The fire was started in the stove and the preliminaries were gone through with toward getting dinner. The ice cream had been set to cool; the ham, sliced thin, had been placed in a Sevre china dish, ready to be placed in the aluminum frying pan; the eggs had been skinned and lay, rich in gold and whites, like a \$20 gold-piece on a flat snowflake. The Burbancks were ready to be scooped, and other good things were scalding. When the strangulation and coughing of the entire party called attention to the fact that the stove wasn't "drawing." After 10 or 15 minutes of sputtering, choking and gentle cursing, it was discovered that the stovepipe had something the matter with its lower end. A further investigation by Mr. Barr disclosed the fact that a gunny sack had been stuffed into the pipe so tightly that it had to be gotten out by an explosion of giant powder. It had one good effect—the pipe received a thorough cleaning. While this had been going on numerous campers who had been notified of the state of affairs, were "rubbering" to beat the band, and when the gunny sack was successfully dislodged, a shout of "Hooray!" awoke the echoes. At this time, Mr. Roesch returned and told his partner that he ought to be ashamed of himself for not having sooner discovered the cause of the trouble and fixed it.

**The Height of a Tree.**  
A discussion arose this morning as to the height of a certain tree about 100 feet south of the hotel. A small party gathered and each took a guess. The estimates ranged all the way from 75 to 170. One guessed 120, one 135 and one 137½ feet. They were then nearest to the mark. One of the party, ably assisted by Ed Strahan, by calling to his aid several propositions in arithmetic, algebra and geometry, finally solved the problem. He made a square of two pieces of board each two feet long, and placed them on the ground at such a distance from the tree that the board farther away pointed directly at the top of the tree. Having the necessary angle the distance from that point to the tree was measured and the height of it was found to be 127 feet. Figures are great things with which to juggle.

**Notes of the Camp.**  
Arthur Gibson, although he has been here but two days, has a firm claim to the chair of champion bowler on the bowling camp as far as the bowling alley is concerned. Several minor championships remain to be settled. Fred Hartman and Mosco Froome, while out hunting this morning, saw a wild bob-tailed cat, and took a shot at it. As the feline saw them about the same time, all three made about their escape. Ed Strahan has been adjudged the belle of the dancing hall.

**WALLOWA SHEEP RANGES**  
Mark Patton interviewed After He Returned From His Trip.  
Mark Patton, Jim Beck and Frank Pratt started out two weeks ago with a well-equipped camping outfit for a trip through Union and Wallowa counties, and the southern portion of Umatilla county. Among the many other affairs, the parties carried was a graphophone, which furnished great enjoyment to visitors at many places where they camped. At a point on the eastern slope of the mountains 15 miles east of Weston, shortly after they began their journey, they camped near a church. When the graphophone was set in motion, people commenced to ride and walk in for miles around, thinking that religious services were being held. When one certain song of particular excellence was produced, many insisted that the musical instrument was only a bluff, and that some one in the wagon was really singing. Mr. Beck returned on Wednesday on horseback from La Grande, while Messrs. Patton and Pratt went on to Fly valley, thence to Lehman springs, where they arrived on Thursday afternoon, July 25.

**The Sheep Ranges.**  
Mr. Patton talked interestingly of the trip, and having passed right through the Wallowa stock country and having conversed with many who are engaged in the stock industry there, was able to speak ex-cathedra. He stated the ranges of Wallowa county are simply magnificent, with a wealth of rich nutritious grass. A small cloud of trouble between cattlemen and horsemen on one side and sheepmen on the other has appeared in the stock sky. There are already 35,000 head of Umatilla county sheep on the Fly Meadows. There are 30,000 head of sheep browsing in the western Bear creek valley. One cattlemen stated that not much objection had been made this year, but that the sheepmen would not be allowed to bring in their stock next year. One horseman said that he had told the sheepmen he would like to have just a little range left for his horses. The horseman was apparently not joking about it.

## A FOUR TOWN BALL LEAGUE

**EFFORTS ARE BEING MADE TO FORM ONE.**  
Would include Pendleton, Walla Walls, Baker City and La Grande—it is up to Walla Walls to get it started.  
The Pendleton baseball association is ready to join a league to consist of Pendleton, Walla Walls, Baker City and La Grande; to put a team in the field that will play good ball; to maintain it for two months with two games each week, making sixteen games for the series. This was decided upon at a meeting held Friday afternoon at M. A. Rader's office. The plan thought best was to secure subscriptions to stock, this stock to be held in a company to be formed, and to be paid for only in the event there is a deficit in the operations of the local branch of the league, and assessments to be only for what is actually needed. Walla Walls finest.  
Baker City and La Grande are also ready to enter the league. Jack O'Neill, of the passenger department of the O. R. & N., has been in both towns, and finds them in a situation to maintain their positions.  
It is therefore up to Walla Walls. Manager Sharpstein, of that place, when seen at the station Friday evening, en route to Baker City, said: "I am anxious to have our town in such a league, but cannot say at this time whether or not I can effect the desired result. We have a Sunday closing movement on over there, and the probability is that it will be attempted to apply it to baseball. In that event, it would consume some time taking it to the supreme court, and might prevent getting matters in shape soon enough for the purposes of the league. We cannot maintain baseball without Sunday games. It would be a losing proposition, and there is no use in talking of any such thing. Sunday games prevented, means no more baseball for Walla Walls this season."  
Mr. O'Neill, the O. R. & N. man, was with the Pendleton association members on Friday, and went to Baker City on the evening train.  
Think about it. If you will only think it over you will go to see Martin when you want to buy groceries. His motto is "best goods at lowest prices." His stock is very large and well selected. Mar in has the best bakery department in the city.

**ATHERNA'S EXPERIMENT.**  
J. W. Smith Says Street Work is About Completed.  
J. W. Smith of Athena returned Friday in Pendleton, and spent home in the evening. Speaking of the work that has been done on the streets of Athena during the present summer, Mr. Smith said: "This work is now about finished, and we only wait to see what sort of a surface will be made by the crushed rock dressing that has been placed upon the main thoroughfare of the town. Crushed rock has been put upon the street from the railroad tracks to Mr. Kirk's residence, and there have been other improvements. In joint action with the county, the city officials have secured the erection of a new bridge over the Wild Horse just beyond the limits of the corporation, the county and city each bearing one-half of the expense. This enables the changing of the roadway to a place where the deep mud holes will be avoided in the future, that were encountered as one drove from Pendleton to Athena." Other towns hereabouts are watching the Athena experiment with considerable interest, to see if the crushed rock will prove to be the best manner of working streets in this region.

**Strikes a Rich Find.**  
"I was troubled for several years with chronic indigestion and nervous debility," writes F. J. Green, of Lancaster, N. H., "No remedy helped me until I began using Electric Bitters, which did me more good than all the medicines I ever used. They have also kept my wife in excellent health for years. She says Electric Bitters are just splendid for female troubles; that they are a grand tonic and invigorating medicine can take its place in our family." Try them. Only 50c. Satisfaction guaranteed by Tallman & Co.

**N. BERKELEY**  
Has the following bargains:  
480 acres A1 wheat land.  
320 acres A1 wheat land.  
2 lots well located \$250.  
1 lot lower Webb street \$90.  
Also a big list of town and county property cheap.  
"Nerve Waste."  
One of the most helpful books of nerve weakness ever issued is that entitled "Nerve Waste," by Dr. Sawyer of San Francisco, now in its fifth thousand. This work of an experienced and reputable physician is in agreeable contrast to the vast mass of false selling abundance in this interesting subject. It abounds in carefully considered and practical advice, and has the two great merits of wisdom and sincerity. It is endorsed by both the religious and secular press. The Chicago Advance says: "A perusal of the book and the application of its principles will put health, hope and heart into thousands of lives that are now suffering through nervous impairment."  
The book is \$1.00 by mail postpaid.  
One of the most interesting chapters—chapter xx, on Nerves and Nerve Tonics—has been printed separately as a sample chapter, and will be sent to any address for stamp by the publishers, THE PACIFIC PUBLISHING CO., Box 266, San Francisco.  
Daily East Oregonian, delivered by carrier, only 15 cents a week.
