THE EAGLE MILLS ABSORBED

The Peacock Company Takes Them In at Milton.

Walls, Aug. 3.—The Union mill at Milton was yesterday received in this city from Milton that the Eagle Milling mills of that place had been acquired by the Peacock mill company. The consideration of the transaction was not announced. The Eagle mill has formerly been the property of a stock company. Both properties are now under the control of J. L. & A. M. Elam.

This transaction is viewed by many as meaning that the Elams are prepared to fight it out with the syndicate which has during the past four years been attempting to absorb the milling interests of the northwest. It is a well known fact that these capitalists have long been figuring to secure control of both the Milton properties and that round sums have been offered. The capacity of the Peacock mill is 40 barrels daily, and that of the Eagle mill 200 barrels. This places in the control of the Elams a daily output of 600 barrels of flour.

In Girdles the Globe.

The famous Bucklen's Arnica Salve, the best in the world, extends round the earth. It's the one perfect healer of cuts, corns, burns, bruises, sores, boils, ulcers, tumors, aches, and all skin eruptions. Only 25c box at Tallman & Co.

SOMETHING IN A LOCATION.

J. F. McManus Finds Business in a New Office.

J. F. McManus, manager of the Northwest Livestock Journal, has removed his office from the building occupied by the Tribune, and now has quarters in the postoffice building, moved Friday afternoon.

Blown to Atoms.

The old idea that the body sometimes needs a powerful, drastic, purgative pill has been exploded; for Dr. King's New Life Pills, which are perfectly harmless, gently stimulate liver and bowels to expel poisons, matter, cleanse the system and absolutely cure constipation and sick headache. Only 25c at Tallman & Co.'s drug store.

For Sale.

On account of departure I offer for sale my private house, corner Johnson and Webb street, containing eight rooms, also a four room cottage and two lots near school house.

J. SHEUERMAN.

Yield Turns Out Good.

Weston Leader: Some reports are coming from the harvesters in various places. At Helix the wheat is turning out much better and is of a higher grade than was expected. Billy Kilgore, we are told, who lives near Athena, has threshed from one field 1100 bushels when only 700 was expected. It looks as if the estimates of some experts as to the yield of Unatilla county's wheat fields, will have to be revised.

P. T. Thomas, Sumterville, Ala. "I was suffering from dyspepsia when I commenced taking Kodol Dyspepsia Cure. I took several bottles and can digest anything." Kodol Dyspepsia Cure is the only preparation containing all the natural digestive fluids. It gives weak stomachs entire rest, restoring their natural condition. Tallman & Co.

150 PLEDGED ARTICLES

Including gentlemen's and ladies' gold and silver watches, rings of all kinds, earrings, chains and great variety of jewelry to be sold at extremely low prices during the month of August. Come early for the bargains. I keep a most complete stock of furniture, linoleum, stoves, lamps, crockery and carpets. Orders for plumbing and tinning given prompt attention.

BIDDING FOR FIRST PLACE

PENDLETON'S RANKING AS A WOOL DEPOT.

Likely to Class This Year as the Greatest Primary Market in the World.

Several weeks ago, the East Oregonian printed the assertion that Pendleton would this year rank next to the Dalles as the second largest primary wheat market in the world. The Dalles has been conceded the first place for many years. The figures now available to this paper seem to promise securely that Pendleton will not be second, but will jump forward to first place, and that the Dalles must hereafter rank second.

It is already assured that Pendleton will handle as a primary market more than six million pounds of wool during the season of 1901. All of the local clip has been housed, and the figures are now well up to the top. But, all the time wool is coming from Idaho, Washington, and points in Oregon not strictly local to this town, so that the prospect is good that this place will stand at the head of the list.

Reasons assigned for this change in status are several, but this is the chief one: The Dalles has lost an enormous amount of wool that now goes to Shanako, from country all ways heretofore tributary to the Dalles. The Columbia Southern carries this wool from Shanako, past the Dalles to the coast, or east to the Boston, St. Louis or Chicago markets.

Much of the light shipping wools formerly going to the Dalles from other points is being taken to Portland for packing. Arlington has cut off considerable from the Dalles' yearly handling.

While all these things are true, Pendleton has succeeded in increasing the amount handled here. The scouring mills, the Farnish warehouses and the Independent Warehouses company have been compelled to put on double forces of men in order to get away with the wools sent here, and at this time, after large amounts have been shipped, the wheat growers are standing waiting for room in the houses in which to store their grain. A little later in the season, the exact figures will be available, when it is confidently expected that they will demonstrate that Pendleton heads the list as primary wool market, consumption devoutly to be wished.

Accidentally Shot.

Chester Hamilton, who clerks in the grocery store of T. J. Ormund at La Grande accidentally shot himself in the right leg Wednesday, says the Chronicle. He had the pistol which is kept in the store in his hip pocket tucked to remove it when he went home. Later in the evening he went for a drive and finding the pistol uncomfortable started to transfer it to a side pocket. In so doing he accidentally discharged it. The ball entered the fleshy part of the thigh and came out above the knee. The wound is not serious and did not prevent his walking about.

GAMBLING ROW AT WESTON

W. E. Rose Badly Beaten by Herman Hessel.

A row over a gambling game occurred in the White House saloon Tuesday afternoon about 2 o'clock, in which W. E. Rose of Pendleton was badly beaten by the proprietor, H. Hessel, says the Weston Leader.

As near as can be learned from witnesses of the fray, Mr. Rose was engaged in "backing" at Mr. Hessel's roulette wheel—a device similar to those in use at the famous Monte Carlo resort. "Billy," as he is familiarly known, had won about a hundred dollars, when Hessel noticed that something was wrong with the wheel. Certain numbers had been passed over other numbers in such a manner that the player was given the best of it, the work supposedly being done by Rose or some confederate. Hessel advanced from behind the wheel, seized his customer around the neck and demanded that he disgorge, which "Billy" declined to do. The latter, who is physically unable to offer much resistance, was then choked and beaten, and thrown upon the floor, so that the money rolled out of his pockets. This was picked up by Hessel and turned over to his bartender. Rose left the saloon minus his winnings and with a sadly disfigured countenance, and afterward took the afternoon train for Pendleton.

The assault has created much caustic comment. It is presumed that now that attention has been called to open gambling at Weston in this sensational manner, public sentiment will demand its discontinuance.

In an editorial the Leader says: As to the merits of the "row" in the White House saloon, reported in our news columns, the Leader refrains from sharing in the numerous opinions that are being expressed. It is not sufficiently familiar with the gamblers' code of ethics. But there can be no question that the trouble was disgraceful, and militates against the reputation for peace, dignity and morality which a school town should sustain.

Wheat Field Burned.

We learn from Wildly Turner that 75 acres of standing wheat, belonging to Andy McEwan, who lives near Geer's spring, went up in smoke Friday. It is supposed that the fire originated from matches carelessly dropped from a brewer's wagon that passed along the road shortly before the fire was discovered. We cannot learn that the grain was insured and the loss will, in all probability, be total to the owner.—Weston Leader

Lost—Between Pendleton and Pilot Rock.

AVERAGE WHEAT YIELDS.

Idaho Leads on the North Coast Over Oregon and Washington.

The agricultural department at Washington, D. C., issued the following concerning the wheat growing conditions of the Pacific coast:

There are on an average, 4,343,801 acres of wheat harvested in the Pacific coast region each year. The average for the past 10 years show that this section ordinarily will yield about 15 bushels per acre and produce a total annual crop of 65,017,582 bushels. The average yield per acre in Oregon during this 10-year period has been 17.7 bushels.

In Washington the average yield is 20.8 bushels.

The Idaho yield is 22.8 bushels per acre.

Speaking of the effect of irrigation, the report says: The chief factors in curtailing the area of wheat has been the introduction of fruit, particularly in the Sacramento valley, and the attention recently given to dairying, which is rapidly gaining a strong hold in several sections of this city, notably in the Willamette valley of Oregon, where wheat is being abandoned more rapidly than in any other portion of this region.

DR. W. R. CAMPBELL'S WHEAT.

He Will Commence Threshing on Monday, August 6.

Dr. W. R. Campbell, who lives 16 miles northwest of Pendleton, in the region that three weeks ago was supposed to have had its wheat crop badly damaged, was a visitor in this city yesterday, and talked again regarding the wheat situation. Why a doctor who here a few weeks ago, he was of the opinion that wheat north of Pendleton, including that of his own, had been greatly damaged, and on yesterday stated that he had not changed his opinion, but desired to call attention to a peculiarity of the wheat that had been shivered in this spring, and that was its regard to his wheat. Heretofore when wheat has been blighted from any cause, either from being nipped by frost, bumped against by cold winds or struck with a heat-

WHEAT YIELDS HEREABOUTS

CROPS ARE SHOWING UP BETTER THAN EXPECTED.

One Man Says He Has Known of Nothing Less Than 30 Bushels Per Acre.

As the returns come in from the ranches, the fact is more and more firmly established that the 1901 crop is beyond the expectations that were created earlier in the season. At about the time the cold winds came, there was genuine fear that the yield would be much short of that of former years. While it may not be safe just now to state that the yield will exceed those of other years, it is almost sure that this will be a bumper crop.

Thomas Thompson, who has many acres in crop and has carefully observed the yields of other farms, stated today that he had learned of no ranch that had returned less than 35 bushels to the acre, his observations extending mostly throughout the district embracing the reservation and lands to the northeast.

E. R. Shaffer had a field that he thought ruined, but now that he has threshed, he finds in the warehouse from that 140 acres 2700 sacks, which at two and one-sixth bushels to the sack makes an average of more than forty bushels to the acre.

A. Ruppe, while not giving actual figures stated to the East Oregonian that he was sure the yield is far better than anyone had expected.

Numerous other farmers have made similar assertions.

LAYING CORNERSTONE AT WESTON.

Ceremony to Be on August 15 by the Masons.

The ceremony of laying the corner stone of the new normal school building will take place August 15 next, says the Weston Leader. By request of the regents the work will be done by the grand lodge of Masons of Oregon, participated in by Weston and other neighboring subordinate lodges. We hope, before the event comes off, to publish a full program of what is expected to transpire in this connection.

CONSPICUOUS IN A BALLROOM.

Flakes of Dandruff on the Collar and Shoulders of a Gentleman in Full Dress.

This is the thing you quite frequently see in the ball room—a man's black dress coat literally covered with dandruff.

It must be annoying to the wearer, and certainly no pleasant thing to observe. But dandruff can be eradicated. It is a germ disease that will some day cause baldness.

Newbro's Herpicide kills the hair-destroying germ, and stimulates the hair to a rich, abundant growth; it does more—keeps the hair soft and pliant.

Furthermore, Herpicide is a most pleasant toilet accessory; pleasing odor, and cooling to the scalp.

TERRIBLE CONDITIONS IN INDIA.

The depopulation of India through famine seems to be assuming alarming proportions. It is estimated that over 5,000,000 persons in India have died since 1896, from causes directly due to the famine. Famine is a terrible thing and proves conclusively that food is essential to the body. Yet it is not so much a question of how much food is eaten as how well it is digested. To insure perfect digestion and obtain the greatest amount of nourishment from your food, take Hostetter's Stomach Bitters. This is the old reliable standard medicine for the cure of stomach, liver, kidney and bowel disorders. It promotes appetite, cures dyspepsia, indigestion, constipation, biliousness, and keeps the bowels regular. Do not fail to give it a trial. It never disappoints.
