**10c Yard**

Summer Vests, to close  
**3½c Each**

## Cleaver Bros. Dry Goods Co.

MARKABLE one in the number of calls for office help, which exceeded its ability to supply. The fact that the college recognizes that young people in attendance should be both bookkeepers and stenographers, if they wish to obtain any good on business positions, and that a good English foundation to begin with is most important, creates a demand for the service of those who have had the advantages of the institution.

The Holmes college has now a three years' course of study consisting of the essentials of a high school course, which combined with a business education equips it for educating and training young men and women for business careers.

An advertisement of the school appears in another column in the East Oregonian.

**WHY GIRLS CANNOT THROW.**  
A Medical Man Tells Why They are Unable to Do So.

A great deal of fun is poked at girls because they cannot throw a stone or a snowball and hit the person or thing they are aiming at. The general idea as to why girls cannot throw as well as boys is that they have not acquired the knack by practice as their brothers have. Another explanation is given by a medical man who tends to show that girls could never learn the knack, however much they tried.

The reason for this difference is one of anatomy. The feminine collar bone is longer and is set lower than in the case of a male. The long, crooked, awkward bone interferes with the free use of the arm. This is the reason that girls cannot throw well.

When a boy throws a stone he crooks his elbow and reaches back with his forearm, and in the act of throwing he works every joint from shoulder to wrist. The girl throws with her whole arm rigid, whereas the boy's arm is relaxed.

**Deafness Cannot be Cured**  
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by giving internal remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Use cases out of ten are cured by catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give you hundred dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. J. J. CRENEY & CO., Toledo, O.

Sold by all druggists, 75c.  
Hall's Family Pills are the best.

**Notice to Contractors.**  
Sealed proposals will be received at Wheeler's photo studio up to 6 o'clock p. m. of August 8, for the erection of a two story building according to plans and specifications on exhibition at Wheeler's photo studio. The right is reserved to reject any or all bids for the work.  
Dated August 2, 1901.

**The Colorado Centennial.**  
The principal feature of the Colorado quarto-centennial celebration in Colorado City Friday was an address by Vice-President Theodore Roosevelt on "The Growth of the West" During the Last Quarter of a Century." On his arrival Colonel Roosevelt was welcomed by Governor Orman and staff, war veterans, school children and many others. The event marked the completion of Colorado of her first quarter century of statehood.

**Think About It.**  
If you will only think it over you will go to see Martin when you want to buy groceries. His motto is "best goods at lowest prices." His stock is very large and well selected. Martin has the best bakery department in the city.

**A Businessman's Close Call.**  
"I stuck to my engine, although every joint ached and every nerve was worked with pain," writes C. W. Bell, Iowa, "I was weak and pale, without any appetite and all run down. As I was about to give up, I got a bottle of Electric Bitters and, after taking it, I felt as well as I ever feel in my life." Weak, sickly, run down people again gain new life, strength and vigor from their use. Try them. Satisfaction guaranteed by DeWitt & Co. Price 50 cents.

**A BUSINESS EDUCATION.**  
The Holmes English and Business College furnishes it.

The Holmes English and Business College of Portland is one of the best in the class on the Pacific coast. It is the only day institution for the training of young men and women for business and a liberal patronage from all parts of the states of Oregon, Washington and Idaho, and whenever the college is known its work is appreciated and valued.

With the college, last year was a record.

You are not prepared for

### CLOSE TO "HONEST OLD ABE"

**JOHN TALT WAS FOUND IN A REMINISCENT MOOD.**

A traveling printer now in Pendleton who remembers an incident of the rebellion.

Thirty-eight years have passed since the battle of Chancellorsville, and the people who participated in the stirring scenes of those long-ago days have largely passed away. The past and present are bound together by links forged from different materials. The historians tell their stories in an official manner, but the common people who helped make that history tell it with a greater emphasis. In Pendleton at the present time is John Talt, a traveling printer, who was in Washington, D. C., a great portion of the time during the war of the rebellion. He saw Abraham Lincoln many times during that period and being found in a reminiscent mood related the following story of his impression of several prominent citizens:

**Old Abe Was Whittling.**  
Early in May, 1863, the steamer John Brooks was carrying United States mail and passengers from Washington, D. C., to Aquia creek, Va. At that time Mr. Talt was in the government service traveling back and forth between the above named points. At the railroad and telegraphic reports were too uncertain to rely on, and the battle of Chancellorsville was in progress, and results doubtful, news by boat from the front was eagerly sought in Washington. As the steamer rounded into the wharf at the foot of Seventh street, a large gathering awaited the important news. There were congressmen, senators, army and navy officers, but conspicuous in the gathering were General Halleck, Secretary of State Stanton and President Abraham Lincoln. Stanton and Halleck were in the front rank, too important to be approached by common people. "Honest Old Abe" sat on a coil of rope, his feet dangling, whittling with a jack-knife. Such was the character of the man who so shortly afterwards was launched into eternity while witnessing the play of "Our American Cousin" at Ford's theater, Washington, D. C.

### 44 BUSHELS TO THE ACRE

**E. S. Waterman Relates a Number of Things of Interest.**

E. S. Waterman of Waterman station on the W. & C. R. railway, and a great wheat raiser himself, was a visitor in Pendleton on Monday. One of the most important of several interesting things he had to tell was in regard to the wheat of A. B. McEwen. A half section, or 320 acres, of wheat owned by Mr. McEwen, adjoining the Hilldale station on the north, has just been harvested. From it Mr. McEwen obtained 6222 sacks, or enough in bushels to make the 320 acres average 44 bushels to the acre. The customary yield from the land is 25 to 30 bushels per acre. Mr. McEwen is well known at Athens, also in Pendleton, being a prominent Mason.

**Barbed Wire Telephone.**  
The barbed wire fence telephone has been put in successful operation between Athens, on the O. R. & N., and Hilldale, on the W. & C. R. railway. It is operated by the Puget Sound Warehouse company. It is the intention of the company to complete the fence telephone through to Helix. Mr. Waterman says the line in a great accommodation and saves many a trip to the farmers and wheat warehousemen of the county traversed by the line.

### HUNTERS WILL TAKE NOTICE

**Deputy Game Warden T. B. Wells Offers Good Advice.**

T. B. Wells, deputy game warden for this district, expressed great surprise and indignation this morning at the action of certain hunters who go out from Pendleton and kill game out of season and in other ways fail to comply with the provisions of the game law. It is not an easy matter by any means to secure a conviction in these cases, but as a word of warning it may be stated that Mr. Wells intends to prosecute to the full limit of the law those hunters who are not enough true sportsmen to obey the provisions thereof.

The East Oregonian on Monday, August 5, published a few of the laws that might be innocently violated by hunters and fishermen, on account of lack of knowledge, but that is no excuse for the violators. Any person hunting or fishing should study the law, know what he is after, and know that it would be legal if he killed his game.

One paragraph in the game laws as published in the East Oregonian was misleading in that it referred to some section of the state other than that portion of the state east of the Cascades of which Unmatta county is a part. That was in regard to prairie chickens. East of the Cascade mountains (except the county of Wasco) it shall be unlawful to hunt or kill prairie chickens until August 15, 1901.

The only kind of quail in this section of the state is the white quail. It will not be legal to kill them until October 15, 1901.

Limit is Ten Birds.

Another very important matter to which Mr. Wells wished to call the attention of hunters is that regarding the number of birds any one hunter may kill in one day. There have recently come to the attention of newspaper reporters and others stories regarding big bags of grouse. Some of the hunters even go so far as to make their bags that they killed as high as 23 in one day. One gentleman remarked that he thought a hunter had the right to kill as many as 25 in one day. Section 14 of the game laws passed at the last session of the legislature provides in brief: "It shall be unlawful within the state of Oregon for any person to kill, capture or destroy any greater number than 10 of game birds enumerated in this section in one day." This includes prairie chicken, grouse, native pheasant or ruffed grouse, pheasant, quail, partridge, etc., all in season when it is allowable to kill them.

### SHIPPERS GET NO PASSES

**FAVORS TO BE WITHDRAWN HERE-AFTER.**

Local Railroad Representatives Must Strictly Observe the Rule Issued From Headquarters.

That the latent idea in the railroad world, "community of interest," means something to the public, is proven by the issuance of and the receipt here of an imperative order to the effect that no more passes are to be given to shippers. The local agents are instructed to enforce the rule strictly, and hereafter the merchant or stockman who asks the agent to send in for transportation will be answered, "courteously but firmly," that such things can no longer be.

It has been the practice for railroads to give passes to heavy shippers who are possible patrons of a road, at points where there are competing lines. These passes have been, of course, purely bribes for business. It is not to be presumed that the railroad officials issued them for any personal reasons, but the truth is that these passes were cool-blooded propositions to get patronage.

The intimation is given that this rule, although not new to shippers, is this time made to be enforced. Hereafter, the rule has frequently been promulgated, in fact every January first has brought it on its rounds of the roads, always to be broken early in the year by some representative of some company that was over-anxious to secure business. Once violated, it was no longer effective.

But, that it has this time come to remain, it will be easy to believe, for the reason that it was for just such results that James J. Hill and J. P. Morgan proposed the community of interest to the railroad world. Well-protected people will admit that the rule will be effective so long as the present regime of consolidation obtains in the railroad world.

So, hereafter, shippers will walk up to the ticket offices and pay just like common folk, and the luxury of riding on a pass will no more be theirs.

**Poplar Trees Destroy Sewers.**

At a meeting of the council committee in Portland, City Engineer Chase in attendance, the matter of abating the nuisance of poplar shade trees about the city was made the subject of a lively and lengthy discussion. The matter has been in hand several times before by the committee, but no conclusion was arrived at, though all agreed that the poplar trees were a nuisance, and a costly one at that. City Engineer Chase stated that already this season the city had been at an expense of some \$400 in opening up and repairing sewers which had been choked and broken by the roots of poplar trees. There are several more breakages, and the cost of such repairs is increasing every year. Within the past year quite a number of those objectionable trees have been cut down and many more girdled, but there are still many left, and some stringent legislation is needed to get rid of them.

**Cable Mine Sold.**  
The sale of the California mine, in the Cable Cove district, was consummated at Baker City to a Minneapolis company for \$35,000. The principals in the deal were Henry Cable, after whom the rich Cable Cove district is named; Johanna Cable, Bessie F. Cable, and W. F. Cable, owners of the famous property; and the Turnagain Arm Gold Mining company, of which Joseph L. Michaels, of Minneapolis, is president.

**BIG WOOL SALE AT BAKER.**  
About 250,000 Pounds Disposed of to Boston Buyers.

One of the largest individual wool sales made in Baker county this year, and not in Eastern Oregon, took place yesterday when Mr. W. G. Ayre, the well known wool grower of Express, disposed of 800 sacks or fifteen carloads of wool to Mr. John Johnson of Boise, Idaho, representing the house of Halliwell, Donald & Co., of Boston.

The sale included both last and this year's wool clips. The price has not been made public, but Mr. Ayre received an advance over the figures offered him last week, realizing about \$1500 more than he would have got had he sold last week. However, Mr. Ayre lost about \$10,000 by holding last year's clip for higher prices, which shows that it does not always pay for the grower to speculate on his own product.

The fifteen carloads amount to about 250,000 pounds, a very nice shipment to go from one man's band of sheep.
