When those who compose our great temperance organizations realize number of "The National Magazine. the force of this truth, and reconstruct their reformatory methods that they may align to it, then will a genuine correction of the abuse of drink be accomplished.

The force of the assertion that the treating habit is the real curse, in the very nature of things, will appeal more strongly to men who have mingled in the resorts of men, than to women who have been mostly within the precincts of the home, or under the protection of their male friends or relatives when in contact with the world. To the men it will need no argument.

And they will concede that when the treating habit be eradicated the use of liquors will no longer be an abuse.

There is no reason why alcoholic liquors should not be handled with as much safety as is quinine. There is not much doubt that the drug would cause more suffering than the liquor if

used to the same extent of abuse. Yet, not the voters. there is no crying need for reform from the use of quinine, unless the

OREGON POLITICAL GOSSIP.

Portland, Aug. 19.—It is now be-coming recognized by the politicians of the Willamette valley, since the agita-tion inaugurated by the East Oregon-ian, that the section east of the mountains must be appeared at the next republican state convention by a substantial nomination. Geography promises to be an all-important feature in the make-up of the next state ticket. Probably it is this rapidly increasing sentiment that is causing the names of Eastern Oregon politicians to be discussed so freely in this, the political beadquarters of the state.

Among the men who have practical ly owned the republican party in Ore gon of late years and against whom feeling is not as friendly as it could be, there is small desire to give Eastern Oregon anything at the next convention. These men, however, are losing influence, yet are sufficently strong to make an interesting fight should combined opposition be brought to bear. These gentlemen, nominally called leaders - which in the past they were certainly-have asserted, positively, that the present incumbents are entitled to a second term and should be -nominated. In fact, they declare, that Geer, et al., are to be renominatsider the matter settled finally. these men represent the old ring and

Eczema sets the skin on fire. The acid poisons in the blood are forced out through the pores of the skin, causing intense redness, burning and itching. So terrible is the itching at times, especially when the body is over-heated, that the almost distracted sufferer feels that he could tear the skin to pieces, and that he must scratch or

go crazy. He knows from experience that this only makes matters worse, but, made desperate by the terrible burning and itching, he is for the time being indifferent to after effects. There burning and itching, he is for the time being indifferent to after effects. are several forms of Eczema, the moist, or weeping kind, that comes in little pustules which discharge a watery, sticky fluid, which dries and peels off in bran-like scales. So profuse is the discharge at times that large scabs or crusts form, which are both painful and troublesome, and not easily removed. Red, disfiguring bumps and sores are symptoms of Eczema. The dry form usually attacks the head, hands and feet; the skin, becoming hard and rough, often cracking open and bleeding, and attended with much itching.
