WILL HAVE NEW SEPARATOR

Mr. W. Gillett Will Again Be Operating Within a Week. William W. Gillett has returned from his trip to Eastern Washington. He reached Athens, he was taken to the hospital on Friday evening. He was taken to the hospital on Friday evening. He was taken to the hospital on Friday evening.

A Deep Mystery.

It is a mystery why women endure headache, nervousness, depression, melancholy, fainting and day spells when thousands have cured them. Electric Bitters will cure you each trouble. "I suffered for years with kidney trouble," writes Mrs. Cheryle of Peterson, Ia., and a lame back pained me so I could not dress myself but Electric Bitters cured me, and, although 73 years old, I am now able to do all my work. It overcomes constipation, improves appetite, gives perfect health. Sold by Tallman & Co. drug store.

BER'S NEW SEPARATOR

This machine will be running Wednesday, August 21. Thomas Kerr, whose separator and feeding outfit were destroyed by fire on Thursday, August 15, at his home on the North Cold spring country, did not allow any wheat to grow under his feet when it came to getting a new separator. Shortly after the accident he ordered a new 24-40 Russell separator, feeder, automatic stacker, etc., from Portland. The order was sent in through Neagle Brothers of this city.

DO YOU NEED

A CLOCK, WATCH, RING, WATCH CHAIN, CHARM, SET SILVER FORKS, KNIVES OR SPOONS, OR AN ALARM CLOCK or anything in the jewelry line? COME TO ME and I WILL GIVE YOU THE BEST OF GUARANTEE PRICES

Joe Basler, Main Street, Pendleton.

OIL STOVES - SEE W. J. CLARKE & CO. Opera House block. Full Line of Tents, Wagon Covers, Anti-rust Tinware, General Hardware.

IN A SEMI-ARID REGION

AN ENT MOODY'S VISIT WITH GOVERNMENT EXPERTS.

Mountain Waters Could Be Used For Irrigation. Bingham Springs, Aug. 20.—Special correspondence.—I note in the papers that Congressman Moody and irrigation experts from Washington, D. C., are in Oregon on a mission of inquiry, to ascertain the conditions affecting reclamation of arid and semi-arid lands. I presume many people think it is a mere junket on the part of the public expense are going about the country to see the sights. I am disposed to take a different view. People don't select hot midsummer days and travel across dusty alkaline plains in search of enjoyment. The idea is absurd. Further, we are prone always to ascribe wrong motives to our officials, and it refreshes us once in a while to take the opposite view. Certainly, if Congressman Moody and the agricultural department representatives look into this question of arid land reclamation, they will perform valuable public service. The form of the great west is dependent in large measure upon intelligent treatment of this theme by our federal government.

The Mountain Streams. Up here is brought forcibly to mind the fact that there is a wealth of water that might be used to increase the productivity of our lands. When one thinks of the vast volume of water flowing down these western mountains to the Columbia river, the enormous stretches of arid lands composed of decomposed basalt or volcanic ash, and the wonderful results that might come from bringing the water and the very rich ash lands into contact, when he thinks of these things he will concede the rational demand for governmental inquiry into the conditions governing. The problem is complicated. Anyone can master the general principles—that water on volcanic ash lands will cause wonderful production of fruits, vegetables and grains. But the manner in which the water is to be utilized, and the embarrassing questions of riparian rights and equitable distribution and conservation of the supply, are reasons for careful investigation by scientific men from the national capital.

A Thousand Contributing Rivulets. Even here, past where the Umatilla river flows, reaching Pendleton diminished in volume and only large enough to supply what W. S. Byers claims is his for flouring mill purposes, are a thousand small rivulets running all the summer long, and in mountain canyon in the west has as many. During the early months enough water will flow to supply Mr. Byers and thousands of acres of arid lands. Later, the lower part of the river near Pendleton runs almost dry. Imagine then a scientifically constructed storage system that would store surplus waters in the early summer in immense reservoirs, to be given out during the time when water is scarce. It would transform Umatilla county into a more productive region, a region already wonderfully rich in annually produced wealth. Here is the water. There near town are the lands. Two elements in a great potentiality. And it is because of this potential future for this semi-arid region that Congressman Moody's junket and the visit of the experts from the national capital hold promise of substantial results.

The East is Studying Us. It is in the working out of these problems of the utilization of Nature's resources for the development of an undeveloped region that the great west is to attain its possibilities. We of the west are only just now coming into the observant attention of the controlling east. Those who dispense official and governmental are beginning to study us. Chairman Burton and his committee on rivers and harbors from the national house have taken up the study of our "open river to the sea" question. That solved, and the storage of surplus waters in the spring accomplished, our country will be placed that compared with the present status will suggest to the future that some one discovered it with a modern Aladdin lamp.

CROOK COUNTY IRRIGATION.

60,000 Acres to Be Put Under Water by a New Company. The covering of 60,000 acres of arid land in Crook county is the aim of a new company, the Oregon Development company, \$1,000,000 authorized capital, incorporated last week at Salem. J. E. Morrison, of Minneapolis, Minn., is at the head of the enterprise. It contemplates bringing under irrigation a little valley on the upper course of the Deschutes river, known as Walker Basin. That basin includes about 100,000 acres of excellent sage brush land, and it is estimated that about 60,000 acres of that area can be brought under the proposed irrigation system. The soil is so very porous, however, that it will be an expensive job to carry the water. It will be necessary to cement the canals in order to prevent seepage that would soon exhaust the water supply. The soil is said to be exceptionally rich, and it is to make it ideal farming land. But the altitude is about 4500 feet above the sea, and the temperature is so low that only the hardy crops flourish there. It is adapted particularly to fattening cattle for the market.

Mr. Morrison's attention was first drawn to the Walker basin last April, and he then made a cursory examination of the place, which convinced him that it would be a good field for an investment in irrigation works. Then he made a trip to the East and began arrangements which have matured into an organization prepared to go ahead with the project. A surveying crew will be put in the field this week to locate routes for ditches and make estimates of the cost of the improvement.

MOODY PARTY DIDN'T STOP.

Went Through to The Dalles and Will Return Later. Congressman M. A. Moody and the party of irrigation and forestry experts from Washington, D. C., did not make the stop at Eastern Oregon soon as intended, but went through to The Dalles, Mr. Moody's home, and then to Portland to meet engagements today and tomorrow, Tuesday and Wednesday, August 20 to 21. They intend to return to Eastern Oregon soon and make the tour of the semi-arid counties. The party passed through Pendleton on Monday. The exact date of their return was not yet known, as stated to the East Oregonian, but it is thought it will occur during the coming week.

GOOD YIELD - LIGHT LAND.

F. J. Gibbins Ranch Produces More Than 30 Bushels to the Acre. The F. J. Gibbins farm in Cold Spring, 14 miles north west from Pendleton, has turned off a good crop this year, the average being something more than 30 bushels to the acre. Andrew Larson, who has had charge of the farm, came into town today with this report. He had 1981 sacks from 150 acres. The land is light and usually yields considerably less than 30 bushels. The farm is a part of what has always been known as the Dr. Campbell place. M. J. Logan, with whom Mr. Gibbins lives, at Cunningham, Wash., was in town with Mr. Larson, having come down from Cunningham to attend to business connected with Mr. Gibbins' affairs. Mr. Logan will return home tomorrow or next day.

WHO'LL BE S. P. PRESIDENT?

IDLE RUMOR THAT A. L. MOHLER TO SUCCEED C. M. HAYS.

More Likely That Samuel Morse Felton of the Alton System Will Be Named. Charles M. Hays has resigned the presidency of the Southern Pacific railway company, as was told the other day in the telegrams to the East Oregonian from San Francisco, and now the gossip are busy trying to appoint a man to take his place. A rumor got out from Portland and finds place in several newspapers that A. L. Mohler, president of the O. R. & N., is to succeed Hays. The prediction was made by a Portland railroad man who was usual "in a position to obtain the most accurate railroad information." The rumor will not be received with credence, though the remarkable changes in the railroad map and in control of properties make almost anything possible in these days.

A more reliable report is from the San Francisco Call. The Call says: "The resignation of Charles M. Hays as president of the Southern Pacific railroad is an assured fact and it can be stated on most positive authority that his successor will be Samuel Morse Felton, the president of the Chicago & Alton railway company, now located in Chicago. "With the selection of Samuel Morse Felton for the Southern Pacific railroad there can be no doubt that the Union Pacific railroad has absorbed the California system and the policy of the local railroad will be directed hereafter from the headquarters of the Union Pacific lines in Omaha."

Mr. Mohler, however, is accounted one of the most skillful administrative railroad officials in the entire country. He has achieved a great success in the O. R. & N. management. Short Line Reduces Rates. Idaho people will be pleased with the announcement that General Passenger Agent Burley of the Oregon Short Line has announced that the company will shortly adopt a uniform passenger rate of 4 cents per mile on all its lines in Idaho. The present maximum local rate is 5 cents per mile. The time for putting the reduced rate into effect has not been definitely decided upon but it is announced that the change will be made not later than January 1. Mr. Burley is quoted by the Salt Lake Tribune as saying: "Idaho has been making such strides in population in the territory tributary to our lines that the road feels justified in reducing the 5 cent mileage. "Western railroads can not run on the same mileage basis as eastern roads because they do not handle the traffic. Their running expenses are consequently much higher in proportion. Ten years ago, for example, Idaho had something over half the population it now has. In a sparsely settled country such as that was, the local business must be unimportant. It was, therefore, necessary for a 5 cent rate to be enforced. "Ultimately, I expect that the Short Line will be on a 3 cent basis. That is the lowest permanent basis on which a railroad can be run with profit."

Gold: Gold: Gold: The latest Eldorado is reported to be on Nome City Beach, Alaska. Thousands of people are hastening there, many of whom will return broken in health. Of what avail is gold when health is gone? Guard your health with the best of all medicines—Hosletter's Stomach Bitters, and you will always have true wealth. The Bitters are for people who have abused their stomachs, or are naturally weak. It will regulate the bowels, stir up the liver, invigorate the kidneys, and wholly cure indigestion, constipation, malaria, chills and fever. It is a natural tonic, absolutely free from dangerous narcotics. It should be taken to protect the system from attacks of malaria, fever and ague. It's a good medicine to keep on hand.

Railway Mail Clerks. The standings of the three young men who took the civil service examination here recently for admission to the ranks of railway mail clerks, have been made public. They are as follows: Charles L. French, Pendleton, 91 per cent; Clyde E. Finch, Pendleton, 90; William J. Moore, Walla Walla, 82. Roscoe A. Seeds, formerly a clerk in the grocery store of Oliver & Co., took the examination several months ago and is now running in a mail car between Detroit and Albany in western Oregon. For Sale. On account of departure I offer for sale my private house, corner Johnson and Webb street, containing eight rooms, also a four room cottage and two lots near school house. J. SHEUERMAN.

5 YEARS, 10, 15, 25 YEARS of Stomach Trouble. No matter how long standing. NAU'S DYSPEPSIA CURE WILL CURE OOOOOOOO We want the weakest stomachs to treat. "Nerve Waste."

One of the most helpful books on nerve weakness ever issued is that entitled "Nerve Waste," by Dr. Sawyer of San Francisco, now in its fifth thousand. This book is an expert and reliable physician in an agreeable contract to the vast sum of false selling which prevails on this interesting subject. It abounds in carefully considered and practical advice, and has the two greatest merits of wisdom and sincerity. It is endorsed by both the religious and secular press. The Chicago Advance says: "A perusal of the book and the application of its principles will put health, hope and heart into thousands of lives that are now suffering through nervous impotency." The book is \$1.00 by mail postpaid. One of the most interesting chapters—chapter 22, on Nervine and Nerve Tonic—has been printed separately as a single chapter, and will be sent to any address for stamp by the publishers, THE PACIFIC PUBLISHING CO., Box 208, San Francisco.
