The women of Norway do not propose to rest on their present success. Miss lic sentiment favors the cause and by making it broader and more general.

Under the present law only women who pay a certain amount of taxes can vote. An unmarried woman tiving at home is deprived of the ballot unless she has an income of her own; a married woman cannot vote unless either she or her bushand has a stated in ome. Thus many of the most intelligent and progressive women of the ountry are still outside of the suffrage Court Street, Everybody in Norway who earns dollar pays an income tax. It may be very small, but a certain percentage of each day's wages of every peasant goes into the government treasury, and the advocates of an income tax in the United States will find many arguments in this country to sustain them. Every person with whom I have talked has declared that it is the least ojectionable means of rising money for national and municipal expenses that has ever been tried here and that it stimulates the patriotism of the peo-ple, who realize that they are contributors to the support of their gov-ernment and should therefore take an active interest in its management.

Just under the skin are innumerable hair-like blood under the skin are innumerable hair-like blood wessels, and connecting these with the skin are millions of small tubes or glands, through which the poison is conveyed to the blood system. During the spring and summer, while the skin is most active and the pores well open, we are much more liable to be affected by Poison Oak and Ivy and other dangerous plants. Workers in brass, copper, lead and zinc have their health impaired and the blood supply poisoned through the absorption of fine particles of these metals and the acids used in polishing and cleaning them. these metals and the acids used in polishing and cleaning them. Inhaling the fumes of lead give painters that pallid waxy appearance of the skin. Barber's Itch is another disease that reaches the blood through the skin, and is a most obstinate one when it becomes firmly fixed in the system. After the poison has reached the blood and been disseminated throughout the system it is too late to resort to local applications. In many cases the blood is affected simultaneously with the appear applications or eruption on the skin, and all efforts should be directed to the purification and building up of the blood. Ugly eruptions and sores will continue to break out to break out to

to break out in spite of salves, washes, soaps or other external treatment.

S. S. S. is especially recommended for poisons of this character. So completely does it destroy the effects of the Oak and Ivy that there is no possibility of its reappearance, and it is equally as efficacious in brass or lead poisoning or Bar-ber's Itch; building up and purifying the blood and driving out of the circulation impurities of every kind, and removing every blemish, sore or eruption from the skin. There is no substitute for S. S. S.; it is the only purely vegetable blood purifier known, and the safest and best in all constitutional or blood diseases.
