TUESDAY, OCTOBER 29, 1901.
THE HALF MILE TRACK.

Frank Frazier Thinks it Good for
Racing.
"I am a strong believer in the half
mile track," said Mr. Frazier today,
and I believe that Walla Walla will
give the new track here. Pro-
posedly constructed a half mile track
just enough for all ordinary pur-
poses. I hope to see no mistake
made here, as I expect to participate
in all the next few years."
Mr. Frazier recalls the statements
of some people of Walla Walla that
it is impossible to get good horses
bred to meet on half mile tracks.
"At the present and the track he
has," said he, "and the entries will
be of the reputable class to make
it the best kind."
"I recently went over the records of
races on 2 1/2 Eastern tracks," said Mr.
Frazier, "and of the entire lot only
one was a five-eighths course, while
the majority were half-miles. As a
shower of the turf for years, I have
studied track statistics, and always
the half mile has been a popular
length of a course."

\$100 Dollars Reward, \$100.
Readers of this paper will be pleased to
know that there is at least one disease that
science has been able to cure in all its
stages. It is called HALL'S CATARRH CURE.
The only positive cure now known to
the world. Catarrh being a constitu-
tional disease requires a constitutional treat-
ment. HALL'S CATARRH CURE is taken internally,
acting directly on the blood and mucous sur-
faces of the system, thereby destroying the
cause of the disease, and giving the pa-
tient strength by building up the constitution.
It is the only cure that has been known
to cure. Send for list of
dealers. Address:
F. J. CHERRY & CO., Toledo, Ohio,
Sold by Druggists.

FOOTBALL ON FRIDAY.
Whitman Academy Will Meet Pendle-
ton Academy Here.
On Friday afternoon the Pendleton
Academy will endeavor to atone for
the defeat of last Saturday. Whit-
man Academy will be here. Manager
Hend has completed the arrangements.

CATTLEMEN PROSPEROUS.

**BUTTER CREEK STOCK
RAISERS ARE FEEDING.**

4000 Head Being Prepared for Fat
Beef Market—Hay is Plentiful, but
None for Sale—Will Market About
Christmas.

O. F. Thompson, a former sheriff
of the county, and a prosperous cat-
tle-raiser of the Butter Creek coun-
try, is here today. Mr. Thompson
states that the Butter Creek stock-
men have now 4000 head of cattle on
their ranches and that all are feeding
for the winter market. He himself
began feeding on the 6th of October,
and others about the same time. The
4000 cattle that are on feed are scat-
tered from the mouth of the creek to
the forks.
"Hay is plentiful," remarked Mr.
Thompson, "and yet none is for sale.
The stockmen wish to keep it for
feeding, as there is enough cattle
to consume the hay in the event the
winter should be somewhat severe."
"Of the 4000 cattle that are being
fed in our part of the county, at least
two-thirds of them are right now fit
for the fat beef market. But we will
not sell before about Christmas time."
"There is no hay market establish-
ed, a few sales having been made at
\$5 a ton, but none of consequence.
The cattle industry of the Butter
Creek country is in fine condition,
and we have nothing of which to
complain."

Butter Creek Honey.

An article that should encourage
Butter Creek honey-raisers, appeared
in the Portland Oregonian, of Mon-
day, Oct. 28.
"Noticing a large pile of honey
comb and beeswax in front of a seed
store on Front street a day or two
ago, a seeker after information stop-
ped inside to question the dealer in
regard to these articles. He found that
a very considerable amount of honey
is produced in this state, principally
in the foothills of the coast range, and
along the Lower Columbia. There is
some honey produced in the Willam-
ette Valley, but it is darker in color
than the honey from the mountains
and coast, where the bees collect it
from white clover and fireweed. The
honey springs up on a plant that has
been burned over, and it supplies very
good honey. Some of the whitest and
best honey coming to this market is
made off the alfalfa fields in Eastern
Oregon, and as irrigation becomes ex-
tended over that vast region, more and
more of this honey will be produced.
The alfalfa is cut several times in the
long Summer of that section, and
there is a succession of blooms to
keep bees busy all the time.
"A large lot of the very finest of
the honey came from Umatilla and
was produced along the Umatilla
River. This will astonish pioneers
who saw Umatilla many years ago,
and at that time no one could have
been made to believe that such a
drearly looking section could ever be-
come noted for the honey produced
there. In fact, one such pioneer said
that when he first saw that region in
1852, there was not a white man set-
tled between The Dalles and the
Rocky Mountains, and that neither
he nor any of his companions had
any idea that there ever would be."

DISEASES OF SHEEP.

**Prof. Pernot of Corvallis, Investi-
gated During the Year.**

In the annual report of the Oregon
Agricultural College at Corvallis,
Prof. E. F. Pernot, bacteriologist,
made his statement regarding sheep
diseases:
"A great deal of time and labor
were spent in investigating diseases
of sheep which were caused appar-
ently by pathogenic germs. In all the
dead sheep which were investigated,
and the sheep which were killed in
the last stages of the disease, no lesions
were found which could be re-
sponsible for the death of the animal,
excepting a bacillus somewhat
resembling anthrax, which was found
in every case in the liver and gall
ducts. Guinea pigs inoculated with
pure cultures of these germs, died
within 24 to 36 hours and the germs
were recovered principally from the
liver. Experiments in inoculating
sheep subcutaneously, and inoculating
and feeding rabbits with pure cultures
all gave negative results. Whether
the loss of sheep is primarily caused
by this germ or whether it is a sec-
ondary result in sheep which have
not been properly fed and cared for,
has not yet been determined, but the
work of investigation will continue
until definite conclusions are ob-
tained."
"The investigation of the effect of
wool on cross breeding sheep was
continued during the year and a
great many samples of wool were ex-
amined, measured, photographed
under the microscope and lantern
slides made for the purpose of illus-
trated lectures. Experiments were
also conducted in dipping sheep with
dips of different strengths for the
purpose of studying the effect produced
upon the wool fibre."

SOME DEPARTMENT ESTIMATES.

**Agricultural Expenses Looked for
During Coming Year.**

Washington, Oct. 29.—The estimates
for the department of agriculture for
the next fiscal year aggregate \$4,189,
540. This is against \$3,862,420 for
the current fiscal year, showing an in-
crease of almost a million dollars for
next year. This includes \$10,000 for
silk investigation, which is to be an-
tered upon for the first time. It is
to enable the department to experi-
ment, collect and disseminate infor-
mation relating to silk culture in this
country.
The total for the weather bureau
has been submitted by Chief Moore
and included in section 7 in Secretary
Wilson's estimate for congress is \$1,
128,000, an increase of \$169,770. There
is an increase of \$112,550 in salaries
and of \$58,000 for vegetable patholog-
ical work.
The total estimates for forestry are
\$260,180, an increase of \$112,900, and
for soil investigation \$173,000 an in-
crease of \$82,000. These increases
are to meet the expending work along
special lines.

BILL DEVERE'S SHORTCOMINGS.

"Common Sinner" Company Cut the
Performance.
Devere and his "A Common Sinner"
company appeared at the Frazer on
Monday night. The program was cut,
Devere failing to sing his much-adver-
tised "Laughing Song," and failing to
do anything but toll about the stage
and look and act as though he had
tarried too long over the black bot-
tle of the Kentucky pure juice of
the corn which he carried with him
for the greater part of the evening.
Mr. Devere would better exert himself
to avoid the appearance that certain-

THE PEOPLES WAREHOUSE.

It is against him and which warrant
the suspicion that the samples too
freely the liquor of which he is a
wholesale salesman in the make-up
of the play. Miss Mayme Taylor as
"Anna Gusher," also failed to sing "On
the Road to Mandalay." Kipling's
pretty poem that sounds well set to
music and that was promised in the
advance notices as a special feature.
Also she did not sing "Holy City,"
and there were several other respects
in which the company failed to make
good the pledges of the press agent.
The company is a good one, and
would have given more than satisfac-
tion had they not cut the program
unmercifully. Miss Daisy King sang
well "Honeysuckle and the Bee," and
she pleased the audience with "Davy
Jones' Locker." Sturgeon and Phil-
brick made a hit with "The Portent
Telling Man." Kennedy was good as
Scop, and Philbrick as a colored
comedian was another good feature.
If "Big Bill" Devere hopes to at-
tract any more good houses in this
part of the country he would better
keep his promises and not gain the
reputation of slighting his perform-
ances. He is capable of better things
than were seen here on Monday night.

acres at bottom land under irrigation,
balance good wheat land, well im-
proved.
560 acres good wheat land, in a
body, four miles from Pendleton;
terms half cash balance on time to
suit purchaser at 6 1/2 per cent in-
terest.

Parasites Cause All Hair Troubles.

Ninety-ninth of the diseases of the
scalp and hair are caused by parasite
germs. The importance of this dis-
covery by Professor Unna, of the
Charity Hospital, Hamburg, Germany,
can not be overestimated. It explains
why ordinary hair preparations, even
of the most expensive character, fail
to cure dandruff, because they do not,
and they cannot kill the dandruff germ.
The only hair preparation in the world
that positively destroys the dandruff
parasites that burrow up the scalp
into scabs called scurf or dandruff,
is Newby's Hericide. In addition to
its destroying the dandruff germ
Hericide is also a delightful hair
dressing, making the hair glossy and
soft as silk.

land, Oregon. Price \$1 a bottle or 6
bottles for \$5, express prepaid.

\$112,500 for a Prescription

The largest sum ever paid for a prescription
changed hands in San Francisco, Aug. 30, 1901.
The transfer involved in cash and stock \$112,
500.00 and was paid by a party of business men
for a specific for Bright's Disease and Diabetes,
hitherto incurable disease.

They commenced the serious investigation of
the specific Nov. 15, 1900. They interviewed
scores of the cured and tried it out on their
lives by putting over three dozen cases on the
treatment and watching them. They also got
physicians to name chronic, incurable cases,
and administered it with the physicians for
judges. Up to Aug. 25, eighty-seven per cent
of the test cases were either well or progress-
ing favorably.

There being but thirteen per cent of failures,
the parties were satisfied and closed the trans-
action. The proceeds of the investigation
committee and the clinical reports of the test
cases were published and will be mailed free
on application. Address JOHN J. FULTON COOK
PARTY, 430 Montgomery St., San Francisco, Cal.
